Stack's suggests that you employ not only prices realized but also other readily available sources of information in establishing numismatic market value.

*These prices represent the last price called by the auctioneer (the "hammer price") plus the 15% Buyer's Fee. Some of the lots may have been reacquired by the consignors and therefore have not actually been sold in accordance with paragraph 25 of the Terms Of Sale.

TERMS OF SALE

These terms of sale are designed to conform to the Amended Rules for Public Auction Sales in New York City by the Department of Consumer Affairs and the Bylaws of the Professional Numismatists Guild, Inc.

1. This public auction sale is conducted pursuant to these Terms of Sale by licensed and bonded auctioneers, Harvey G. Stack, #0522763 and Lawrence R. Stack, #0798114.

2. **Each bidder, by bidding in the sale, agrees that a 15% BUYER'S CHARGE will be added to the "hammer price" or winning bid of each lot as determined by the auctioneer.** This 15% BUYER'S FEE will be added to the invoice of each successful bidder over and above the actual sum bid or offered. The Buyer's Fee applies regardless of a bidder's affiliation with any group or organization, and is imposed on all bidders. No lots will be delivered or shown at the auction. Auction sales are strictly for cash and must be paid for promptly in U.S. funds. STACK'S reminds you that all bidders personally guarantee prompt payment in full. Checks are permitted with identification acceptable to STACK'S. On any accounts past due, STACK'S reserves the right to extend credit and impose periodic charges as stated in these Terms of Sale or on the invoice or statement. Buyer agrees to pay the reasonable attorney fees and costs required to collect on such past due accounts. All lots delivered in New York State are subject to applicable Sales Tax. Buyer agrees to pay any sales tax, use tax, and any other applicable taxes that now, or hereafter, are found to be due by virtue of the sale, and to indemnify and hold STACK'S harmless for any sales or other taxes due thereunder, including reasonable attorneys fees, costs and any interest or penalties assessed. Buyer shall also pay all shipping and handling charges where applicable.

3. Purchasers claiming exemption from such taxes must submit resale or exemption certificates or other proof of exemption. Out-of-state Purchasers taking delivery in New York must provide an OSR certificate or pay applicable taxes due. All purchasers represent that they are not seeking to acquire goods for personal, family, or household purposes, but are bidding for resale purposes; and those submitting OSR's additionally represent that they are professionals, knowledgeable and fully aware of what they are purchasing, a representation upon which STACK'S relies in agreeing to sell to Purchaser. Buyers picking up lots may be required to confirm this agreement in a separate writing.

4. STACK'S is not responsible for your errors in bidding. PLEASE BID ON THE CORRECT LOT.

5. All persons seeking to bid, whether in person, by an agent or employee, or by mail, must have a catalogue and register to bid. By submitting a bid, whether in person, by mail, or through an employee or agent, the bidder acknowledges receipt of the catalogue, and agrees to adhere to these terms of sale. The auctioneer may decline to recognize any bidder who does not have a catalogue and has not registered and been given a paddle number. Any prospective bidder may be required to establish credit references or submit a deposit of 25% of their bids. All new bidders should be prepared to establish credit with the auctioneer prior to registering to bid.

6. By bidding, purchasing or offering to purchase in this sale, even if as an agent, or on behalf of a corporation or for another individual, each bidder personally guarantees prompt payment and agrees to be personally liable for the consequences of bidding; all bidders also personally guarantee prompt payment in full, including without limitation, BUYER'S FEE, taxes, surcharges, postage, handling charges, storage costs and insurance charges.

7. STACK'S reserves the right to require payment in full before delivering lots to a successful bidder, and reserves the right to require the principals, and directors of any corporate bidder to execute a guarantee of payment (which, in any event they do by having an agent or employee bid in the sale) prior to allowing a bid to be placed or recognized.

8. STACK'S reserves the right to impose a late charge, based solely upon Purchaser's failure to remit full and timely payment, and which late charge is not related to any necessary storage of the material purchased. Said late charge is calculated at a rate of 1½% per month (18% per annum), based on the purchase price if payment has not been made in accordance with these Terms and Conditions of Sale. Purchases not collected within thirty (30) days of the date of sale may, at the sole option of STACK'S, be resold for Purchaser's account by STACK'S, with Purchaser liable for any deficit after STACK'S receives a commission for the same in accordance with its agreement, and thereafter deducts all expenses associated with the sale, including reasonable attorneys fees.

9. Bids are NOT accepted from minors. By bidding in this sale, the bidder represents and certifies that they are of legal age, are authorized to make the bid that they make, and that the purchase is not a consumer sale or consumer credit transaction.

10. **Title remains with STACK'S until paid for in full.** Should Purchaser take any action under Title 11 of the U.S. Code, or any state insolvency law, Buyer agrees to promptly return to STACK'S, any lots not paid for. The Buyer agrees to keep the lots fully insured until paid for. Risk of loss is on the Buyer.

11. The highest bidder as determined in the sole discretion of the auctioneer shall be the Buyer. If the auctioneer determines that a dispute has arisen between two or more bidders, the lot may be immediately put up and sold again. Bidders with whom the dispute previously arose shall be without further recourse for any damages whatsoever.

12. If you bid by mail, **mail your bid sheet early.** Mail bidders agree to and are subject to these terms of sale just as if they were floor bidders.

13. The auctioneer reserves the right to refuse ridiculously low bids, which in the auctioneer's sole discretion, are felt not to have been made in good faith. The auctioneer reserves the right to open the lot at a reasonable price determined solely by the auctioneer. The auctioneer shall also have sole discretion to set initial, and subsequent bidding increments, and to accept, or to decline to accept, challenges to those bidding increments. All bids not in whole dollar amounts may be rounded downward by the auctioneer. The auctioneer may open bidding on any lot by placing a bid on behalf of the Seller, a mail bidder, STACK'S, or another participant in the sale. The auctioneer may bid further on behalf of the Seller up to the amount of the reserve by placing successive or consecutive bids for a lot, or by placing bids in response to other bidders. The auctioneer may bid for his, or its, own account at any auction and may have access to information concerning the lots, and items contained in them, that are not otherwise available to the public. Estimates given are for the general guidance of the bidder and represent the opinion of the auctioneer as to the fair market value of the numismatic item at the time of cataloguing, based on experience and comparable sale, if applica-

ble. The actual price realized may be higher, or lower than the estimate. If a lot is reserved, the reserve may not exceed the maximum estimated price.

14. Auction sales are not approval sales. In the event of non-payment by the Buyer, STACK'S reserves any and all rights that it would be entitled to under the Uniform Commercial Code, including Buyer's consent to file a financing statement without need of Buyer's signature, and to offset any sums due on any future consignment or purchase or monies or goods in possession of STACK'S or its assigns.

15. All bidders are encouraged to carefully examine all lots prior to the sale. No lots will be shown at the sale. STACK'S assumes no risk, liability or responsibility for the material (or other) facts stated concerning the numismatic item, except as specified herein. All floor buyers should acquaint themselves with the property sold since STACK'S will assume that they have done so and requires that the Purchaser represent that they have. Bidders are deemed to have satisfied themselves as to all of the matters set forth in the terms of sale.

16. STACK'S, as agent, offers a LIMITED WARRANTY that any numismatic item sold is authentic (i.e., not counterfeit, that its date or mintmark has not been altered, and that the coin has not been repaired as those terms are used in the trade). Except as set forth in this limited warranty and as may be required by the arts and cultural affairs law, and any other law or regulation, all other warranties of authenticity of authorship, whether express or implied, are hereby disclaimed.

17. Except as otherwise stated herein, all items offered in this catalogue are GUARANTEED TO BE GENUINE and correctly attributed as defined below.

18. (a) NO LOT may be returned for any reason whatsoever without the prior written consent by STACK'S, or, in any event, if it has been removed from its original container. **No lots purchased by those who have viewed the lots may be returned,** unless the limited warranty provided in these terms of sale permits it.
(b) Grading is a subjective description in the opinion of the cataloguer as to the state of preservation, method of strike, and overall appearance of a particular coin or lot. The term "proof" or "specimen" is used to describe a method of manufacture, and is not a grade or condition or an attribution.
(c) STACK'S does not represent that a numismatic item has or has not been cleaned; that any toning is natural or artificial; that any coin catalogued will meet the standards, or the grade, of any third party or third party grading service; that a numismatic item has a particular provenance or pedigree; that a numismatic item is struck or not struck, or produced or not produced in a particular manner or style.
(d) Adjectival descriptions and terminology (which can and does vary among experts and knowledgeable purchasers), when utilized in the catalogue, are strictly the opinion of the cataloguer and shall not be deemed to be part of the description; i.e. it is an opinion only and not a warranty of any kind.
(e) Grading descriptions in this catalogue are provided strictly for the convenience of those who bid by mail and who are unable to personally view the coins, and represents the cataloguer's opinion of its state of preservation. Those attending the sale, and those bidders who actually view the lots should draw their own conclusions as to the state of preservation or grade of the numismatic item.
(f) STACK'S may utilize numerical or adjectival descriptions, and may include lots that have been graded by others. Opinions offered with respect to numismatic properties offered for sale by STACK'S are made at the time that the numismatic item is catalogued, and do not refer to any prior or subsequent time.
(g) Where STACK'S sells a numismatic item graded and encapsulated by a grading service, Buyer acknowledges and agrees that other grading services, STACK'S or knowledgeable purchasers might reach a different conclusion as to the state of preservation of a particular item, and that STACK'S has presented the service's description of the encapsulated item for accommodation only. Any such information provided by STACK'S is the opinion of the third party, without recourse against STACK'S in any way whatsoever.
(h) **Except as otherwise expressly stated in the Terms of Sale, STACK'S and its agents and employees make no warranties or guaranties or representations, and expressly disclaim all warranties and guaranties and representations, including, without limitation, a warranty of merchantability, in connection with any numismatic properties sold by STACK'S.**
(i) All oral and written statements made by STACK'S, are statements of opinion only and are not warranties or representations of any kind, unless stated as a specific written warranty, and no employee or agent of STACK'S has authority to vary or alter these Terms of Sale. Any alteration shall be effective only if in writing and signed by a member of the firm.
(j) If not so stated expressly, the grade, artisanship, provenance, or attribution is the firm's opinion only on which no third party, including the bidder, is entitled to rely.
(k) STACK'S assumes no risk, liability or responsibility for the material (or other) facts stated concerning the numismatic item, except as specified herein.

19. Unless otherwise stated, STACK'S acts only as agent for a Consignor and makes no independent warranty of title. STACK'S offers the following LIMITED WARRANTY to Buyers with respect to all numismatic items offered for sale. STACK'S warrants to all Buyers that the Consignor or the Seller has warranted good title to property offered for sale. Any such warranty is predicated on the Owner or prior owner making the same warranty to STACK'S, upon which the firm relies. In the event that it is finally determined that the Purchaser has not acquired transferable title, STACK'S shall reimburse the Purchaser (if full payment has already been made) in accordance with these Terms of Sale, and Buyer agrees that this is full compensation for any loss whatsoever, whether actual or otherwise. Tender of the check by STACK'S to Buyer at the address specified on the bid sheet or registration form shall end the obligation of STACK'S to the Buyer, even if the check is not endorsed or cashed. STACK'S and the Consignor make no representations or warranty that the Purchaser acquires any reproduction rights or copyright in property purchased at the sale.

20. STACK'S further expressly disclaims all warranties relating to the grade, condition, identification of the periods or date of coining or manufacture or methods of manufacture of property which is inaccurate, or may be proved inaccurate, by means of scientific process or research which is not generally accepted for use until after the sale.

21. STACK'S reminds the Buyer that the grading or condition of rare coins may have a material effect on the value of the

items purchased; that others may differ with the grading opinions or interpretations of STACK'S; that such difference of opinion (including whether the coin has been cleaned, or is or is not of a particular grade or quality) is not grounds to return an item purchased; and that all sales of items viewed by a Purchaser in advance of a sale, even if the sale is by mail, are final.

22. By purchasing in this sale, Buyer agrees that they shall have no recourse against the Consignor for any reason whatsoever. In the event that a warranty is offered with respect to grade or state of preservation or condition, it shall be a specific warranty, in writing, signed by a member of STACK'S, and shall specify its terms and conditions and duration. If any numismatic item is damaged in its removal from encapsulation, or during its encapsulation, it is at the sole risk of the Purchaser. Because of the fungibility of numismatic items, any item removed from its holder may not be returned for any reason whatsoever.

23. (a) On any claim made by a bidder, STACK'S must be advised in writing sent within seven days after receipt of the material, or the date of the sale, whichever is the later; these dates apply whether or not the Buyer has received the material. The disputed property must be returned to STACK'S in the same condition as sold by STACK'S, in the same holder.
(b) These conditions are binding and absolute unless varied in writing by a principal of STACK'S or if the bylaws, rules or regulations of the Professional Numismatists Guild, Inc., provide for a longer period, or give the Buyer a greater right, in which case such bylaws, rules or regulations shall prevail. Any and all claims of the Buyer made in violation of the Terms of Sale shall be deemed waived, and the Buyer shall be without further recourse.

24. If STACK'S, in its sole discretion, determines that any numismatic property is substantially and materially different from that represented in the catalogue of sale, or in any written advertisement or material, the sale shall be cancelled and STACK'S shall refund the purchase price to the Buyer. Unless provided otherwise in these terms or the PNG bylaws, that shall be STACK'S sole obligation to Buyer.

25. The auctioneer and cataloguer, STACK'S, reserves the right to include its own material in any auction sale. The auctioneer may have direct or indirect interests in these, and other items (other than its commission), and may collect a minimum price in addition to the selling commission. This paragraph shall be deemed a part of the description of all lots contained in the catalogue. The catalogue shall also be deemed a part of any invoice issued by the auctioneer. The auctioneer may make loans or advances to consignors and/or prospective purchasers. The Consignor may be permitted to bid on his, her or their own articles and to buy them back at the sale. Any Buyer who bids on or purchases their own goods is required to pay for them, in full, as the terms of sale provide for together with the full buyer's commission, and any other applicable surcharges, postage, handling, insurance fees and taxes, without rebate of any kind whatsoever, unless provided for otherwise by contract with the auctioneer. The auctioneer reserves the right to make accounting adjustments in lieu of payment. Settlement will follow the auction. The prices realized reflect the final price called by the auctioneer and may include a bid of a consignor reacquiring their lot.

26. STACK'S, the auctioneer, and employees are "insiders" and may have access to confidential information not otherwise available to the public with respect to value, provenance, availability, and other factors. Purchasers should make themselves acquainted with the numismatic items that they are purchasing and avail themselves of the services of outside consultants prior to engaging in any purchase. Bids are so much per LOT. No lots will be broken up unless otherwise stated.

27. No bidder shall have any claim against the auctioneer, or STACK'S, for improper sequence of offering a lot.

28. On bullion items, bullion-like items, and encapsulated items graded by a grading service, Buyer agrees that there shall be no right of return for any reason whatsoever. Buyer further agrees that due to market volatility, in event of non-payment, STACK'S shall be entitled to damages that are the greater of selling price or market, together with any supplementary or additional costs.

29. STACK'S at any time may rescind the sale in the event of non-payment or breach of the warranty of title.

30. The sole remedy that any participant in the auction shall have, whether bidding in person, by mail, or through an employee or agent, for any claim or controversy arising out of the auction shall be a refund of the original purchase price and premium paid, if any. Interest shall be paid by STACK'S at a rate of no greater than nine per cent (9%) per annum, up to a maximum of six (6) years, unless the rules of the Professional Numismatists Guild, Inc. provide for a higher rate of interest or a longer period of time, in which case such rules shall prevail. A lower rate, or shorter period, may be decided by the arbitrators. Upon payment as determined by the arbitrators, or in full at the maximum rates set forth above, or at an agreed rate, STACK'S shall be deemed released from any and all claims of the bidder arising out of or in connection with the sale of such property. Purchaser agrees to execute prior to delivery of any refund any documents reasonably requested to effect the intent of this paragraph. By bidding in this sale, all bidders consent to these terms and all other terms of these conditions of sale.

31. **STACK'S hereby disclaims all liability for damages, incidental, consequential or otherwise, arising out of or in connection with the sale of any property by STACK'S to Purchaser.** All bidders, even if unsuccessful purchasers, agree to abide by this condition, and all other conditions of sale.

32. All rights granted to the Purchaser under the within terms of sale are personal to the Purchaser. Purchaser may not assign or transfer any of these rights to any other person or entity, whether by operation of law or otherwise. Any attempt so to assign or transfer any such rights shall be absolutely VOID and unenforceable. No third party may rely on any benefit or right conferred by these Terms and Conditions of Sale and terms of warranty on any bidder or Purchaser.

33. "Purchaser" shall mean the original purchaser of the property from STACK'S and not any subsequent owner or other person who may have or acquire an interest therein. If Purchaser is an agent, the agency must be disclosed at the time of sale, otherwise the benefits of the warranty shall be limited to the agent and not transferable to the undisclosed principal.

34. Should any third party attempt to utilize any warranties contained herein, they shall first give STACK'S thirty (30) days written notice by Registered Mail or Certified Mail Return Receipt Requested during which time STACK'S may,

should it choose to contest the third party's claim, ask the Professional Numismatists Guild, Inc., or the American Arbitration Association to appoint a panel of three arbitrators skilled in the field to make such a determination at New York, N.Y. By seeking to use such remedy, the third party unequivocally and without reservation consents to binding arbitration, and its conclusive and binding determination of any alleged damages as a sole remedy. With respect to any other pertinent notice requirements, venue and personal and subject matter jurisdiction, said third party is bound to the provisions pertaining to bidders, buyers and purchasers, as otherwise provided for in these Terms of Sale.

35. In the event STACK'S shall, for any reason, be unable to deliver the property sought to be purchased, its liability therefore shall be limited to the rescission of the sale and refund of the purchase price and buyer's premium. **STACK'S hereby disclaims all liability for damages, incidental, consequential or otherwise, arising out of its failure to deliver any property purchased, and all bidders agree to this disclaimer.**

36. If it is determined that a bailment relationship exists while the material purchased is being held by STACK'S, for Purchaser, said relationship constitutes a gratuitous bailment only, solely for the benefit of the purchaser/bailor, as defined by the laws of the State of New York.

37. As a condition of bidding, bidder acknowledges that numismatic auction sales are unique in terms of their tradition and industry practices. Each bidder agrees that **any claim or controversy whatsoever arising out of this sale shall be settled as follows:** if demanded by either buyer, or STACK'S by binding arbitration at New York, New York, under the rules then obtaining of the Professional Numismatists Guild, Inc., or as PNG rules may provide, the American Arbitration Association. In the event that a dispute arises between STACK'S and a non-member of the PNG, this means that the American Arbitration Association, at New York, N.Y., shall have exclusive jurisdiction over the controversy. In any controversy concerning non-payment, STACK'S shall have the right to proceed by arbitration or by a proceeding in any court of competent jurisdiction in the City, County, and State of New York, whichever is first commenced by STACK'S. The arbitrator shall not have the power to alter the terms of condition of sale. Judgment on any award may be entered in any court of competent jurisdiction. The arbitrators, and any court, shall award the prevailing party costs and reasonable attorney fees. By bidding in this sale you agree to be bound by the arbitration provisions of the PNG as described above. Commencement of an arbitral proceeding, or confirmation of an award, as well as any notice requirements connected with such proceeding, and any other required service of process, may be made by STACK'S upon all bidders by registered or certified mail directed to the address of the bidder or purchaser as listed on the bid sheet or application or form required at the time that a bidder number is issued, or by facsimile transmission with proof of receipt. Bidder agrees that such service shall constitute full in personam jurisdiction. The venue for such proceedings shall be the City of New York, State of New York and each bidder agrees to in personam (personal) jurisdiction of the City of New York, State of New York. In all cases, the maximum liability of STACK'S for any item sold shall be limited to the official price of record of the item at this sale, without provision for consequential damages, or any other damages of any kind whatsoever, unless the PNG rules provide otherwise.

38. If the Purchaser fails to comply with one or more of these Terms and Conditions of Sale then, in addition to all other remedies which it may have at law or in equity, STACK'S may, at its sole option, either (a) cancel the sale, retaining as liquidated damages all payments made by the Purchaser, it being recognized that actual damages may be speculative or difficult to compute, or (b) sell some or all of the numismatic property and some or all other property of the Purchaser held by STACK'S, in a quantity sufficient in the opinion of STACK'S to satisfy the indebtedness, plus all accrued charges. More than one such sale may take place at the option of STACK'S. Such sale may take place without notice to Purchaser; if STACK'S gives notice, it shall be by regular mail to the address utilized on the bid sheet, consignment agreement or other address known to the firm. Such sale will be at STACK'S standard commission rates at public or private sale, within or without the City of New York, at which time (if the sale be at auction) the defaulting party shall not bid. The proceeds shall be applied first to the satisfaction of any damages occasioned by Purchaser's breach, and then to the payment of any other indebtedness owing to STACK'S, including without limitation, commissions, handling charges, the expenses of both sales, reasonable legal fees and collection agency fees and any other costs or expenses incurred hereunder. If a lot or numismatic item is not paid for, and is sold by STACK'S for Purchaser's account, in accordance with the Uniform Commercial Code, STACK'S shall not be required to account to the Purchaser for any excess proceeds. Purchaser is also liable to STACK'S if the proceeds of such sale or sales is insufficient in the opinion of STACK'S to cover the indebtedness. If other property of Purchaser is also sold, any excess of proceeds will be remitted to the Purchaser after first deducting the expenses set forth above. If Purchaser fails to remit sums due to STACK'S, Purchaser grants to STACK'S a lien with respect to such sum, with interest to accrue thereon at the judgment rate, until actually paid, which lien shall apply against any property of Purchaser, including any future goods of Purchaser coming into possession of STACK'S. **Purchaser hereby waives all the requirements of notice, advertisement and disposition of proceeds required by law, including those set forth in New York lien law, article 9, sections 200-204 inclusive, or any successor statute, with respect to any sale.** Purchaser waives a right to redeem.

39. The auctioneer reserves the right to postpone the sale by auction for a reasonable period of time as a result of any significant event which, in the sole discretion of the auctioneer, makes it advisable to postpone the event. No bidder or prospective bidder or purchaser or prospective purchaser shall have recourse as a result of any postponement. In any event, no person may bid without registering, and ALL REGISTERED BIDDERS including mail bidders and agents by registering or bidding **agree to all of the above Terms and Conditions of Sale.**

40. By bidding or offering to bid, bidders acknowledge that they have read all of the Terms and Conditions of Sale and warranty contained herein and that they accept these terms and conditions without reservation. STACK'S reserves the right to vary the Terms and Conditions of Sale by rider or other means communicated to bidders. By purchasing from STACK'S, whether present in person, or by agent, by written bid, telephone or any other means, the bidder agrees to be bound by these Terms and Conditions of Sale.

LOTS 1 - 1164

IMPORTANT NOTICE
In accordance with the terms of sale, each successful bidder also agrees to pay a buyer's charge of fifteen percent (15%) of the winning bid recognized by the auctioneer.

UNITED STATES COINS

U. S. PATTERN AND ERROR COINS

Lot No. 1

1 **1855 1¢. Judd 168. Original (R-4).** Bronze, PE. **Brilliant Proof,** nearly of Choice quality. The obverse toned a pleasing chestnut brown. The reverse displaying varying shades of medium brown with a few subtle light stains. PCGS PR63BN.

LOVELY JUDD 192 FLYING EAGLE PATTERN

Lot No. 2

2 **1858 1¢. Judd 192 (R-5).** Copper-nickel, PE. The adopted obverse design. The reverse with ONE CENT inside an oak wreath. **Gem Brilliant Proof.** Needle-sharp and exhibiting excellent surface quality. The protected areas of the design display lovely pale rose iridescence. Encapsulated in an early PCGS holder where it is conservatively graded PR64.

Lot No. 3

3 **1858 1¢. Judd 212 (R-5).** Copper-nickel, PE. **Choice Brilliant Proof** with claims to the Gem category. Fully struck legends and devices complemented by well balanced surfaces. Conservatively graded PR63 in an early PCGS holder.

Lot No. 4

Lot 5

4 **1859 1¢. Judd 228 (R-1).** Copper-nickel, PE. A transitional design with the adopted reverse of 1860. **Choice Brilliant Uncirculated,** virtually of full Gem quality. A well struck, rich satiny example with delicate golden surfaces. Graded MS64 in an early PCGS holder.

5 **1869 1¢. Judd 666 (R-4).** Nickel, PE. Bust of Liberty facing left similar to that of the adopted Three Cent Nickel design. **Brilliant Proof.** Typical hairlines and somewhat muted reflectivity beneath lilac-gray toning.

COMPELLING JUDD 1768 PATTERN CENT

Lot No. 6

6 **1896 1¢. Judd 1768 (R-6).** Bronze, PE. Charles Barber's design showing a shield beneath a scroll inscribed LIBERTY. **Choice Brilliant Proof,** virtually a Gem example. Reflective fields complemented by rich mint color just beginning to fade. Outstanding quality and much nicer than normally seen for this pattern.

Lot No. 7

7 **1941** Extremely Fine. ***Struck on a thick brass planchet.*** The U. S. Mint at Philadelphia experimented with different alloys for Lincoln Cents. Additionally, some Cents were accidentally struck on planchets intended for foreign coins which were heavier and thicker. Possibly this coin originates in this explanation. Whatever, this is a fascinating anomaly. The coin is encapsulated in an ANACS holder graded EF 40. Due to the encapsulation, the weight cannot be ascertained.

IMPORTANT 1866 NO RAYS TRANSITIONAL SHIELD NICKEL

Lot No. 8

8 **1866 5¢. Judd 507 (R-6).** Nickel, PE. A transitional shield nickel using the regular obverse design coupled with the No Rays reverse design adopted during 1867. **Brilliant Proof** with claims to the Choice category. Golden-brown patina over sharp devices. The fields displaying somewhat muted reflectivity. PCGS PR62.

Transitional items such as this are of the utmost importance to collectors. The piece offered herein provides a more affordable opportunity to add such a prize to a specialized collection.

Lot No. 9

9 **1869 25¢. Judd 733 (R-5).** Silver, RE. Standard Silver quarter with head of Liberty wearing a coronet inscribed LIBERTY. **Gem Brilliant Proof.** Toned a deep sea-green with traces of lilac and golden iridescence. Sharply struck throughout and exhibiting full glassy surfaces. PCGS PR65.

Lot No. 10

10 **1869 25¢. Judd 734 (R-6).** Silver, PE. Identical in design to the prior lot except struck with a plain edge. **Choice Brilliant Proof,** full mirrored fields. The obverse toned a handsome violet-mauve. The reverse a delicate gold.

Lot No. 11

11 **1862 50¢. Judd 295 (R-6).** Silver, RE. The obverse is of the adopted design. The reverse is similar to the adopted design, but with the motto GOD OUR TRUST inscribed above the eagle. **Brilliant Proof,** nearly of Choice quality. Glassy proof fields contrasted against needle-sharp devices. Toned a lovely pale mauve on either side.

Lot No. 12

12 **1863 50¢. Judd 338 (R-6).** Silver, RE. The regular obverse die coupled with a reverse similar to the adopted design, but bearing a scroll above the eagle upon which is inscribed GOD OUR TRUST. **Brilliant Proof,** virtually a Choice specimen. Glittering fields display light hairlines beneath a wisp of delicate toning.

VIRTUAL GEM 1869 JUDD 746 HALF DOLLAR

Lot No. 13

13 **1869 50¢. Judd 746 (R-7). Aluminum, RE. Choice Brilliant Proof,** virtually a full Gem example. Here is a glittering Standard Silver pattern showing Liberty in Phrygian cap, value as 50 CENTS (not Half Dollar) in a laurel wreath. Pollack lists only four auction appearances plus one example impounded in a major collection. Fully reflective and free of spotting. The reverse with a few trivial laminations. PCGS PR64.

It is interesting to note that this piece was struck when Aluminum was still a rare and expensive metal.

CHOICE PROOF GOLOID METRIC DOLLAR

Lot No. 14

14 **1879 $1.00. Judd 1626 (R-6). Goloid, RE.** 218 grains. The Goloid Metric Dollar designed by William Barber. **Choice Brilliant Proof** and exhibiting a pleasant swathe of golden toning on both obverse and reverse. Deep mirrored fields and a sharp strike promote this example's excellent visual appeal.

SELECTIONS FROM THE ESTATE OF BEN CORSON

AN IMPORTANT OFFERING OF U. S. PATTERN DOLLARS FROM 1879 AND 1880

The following selection of pattern coins includes some of the highest grade quality pieces we have seen in many, many years. Not only were these coins collected with a careful eye for condition, they are also companions to the more famous Stellas of 1879 and 1880. Both are representatives of the short lived, but hopeful, experiment in making an international coinage, an experiment that is slowly being recreated in Europe, today. The first pattern in this collection is the lovely 1879 Schoolgirl Dollar in copper, designed by George T. Morgan. The 1879 and 1880 Metric and Goloid Metric Dollar patterns that follow include one each of the Morgan and Barber designs, for a total of eight specimens.

THE FAMOUS AND RARE 1879 SCHOOLGIRL PATTERN DOLLAR

Lot No. 15

15 **1879 Schoolgirl Pattern Dollar. Judd 1609.** Copper, RE. **Gem Brilliant Proof.** A simply spectacular specimen of this ever popular and rare pattern. The piece is near pristine, with watery proof surfaces. Both sides are pleasingly toned in pale blue and rose over deep brown copper. The strike is sharp and fully detailed. **Very rare:** the Judd reference rates this pattern as a High Rarity-7, meaning only 4 to 6 specimens were known in 1982. The Pollock study calls it Rarity-7, with a dozen or fewer thought to survive. The obverse features George T. Morgan's head of a youthful Liberty facing to the left. There is a hair band across the top of her head which is inscribed LIBERTY and her hair falls down the back of her neck. She wears a pearl necklace. Morgan's design was taken from life, possibly from a friend's daughter, and her youth gave rise to the pattern's nickname, the Schoolgirl. It is one of the most beloved and cherished in all the pattern series. The reverse shows a defiant eagle facing to the left, its wings half raised, standing on a tablet inscribed with the national motto. Morgan used the same eagle design, in a smaller format, on his 1877 Half Dollar patterns (J.1512). Morgan was criticized for his eagle design as much as he was praised for his Schoolgirl obverse. ***(SEE COLOR PLATE)***

LOVELY 1879 J.1617 METRIC DOLLAR

The Barber Design

Lot No. 16

16 **1879 Metric Dollar. J.1617.** RE. **Gem Brilliant Proof.** Lovely, medium silver gray color graced by pale rose and iridescent blue toning. Both sides are fully reflective, with deep mirror flash in the fields and protected areas. This is a lovely example of this popular, international pattern proposal. The obverse shows William Barber's head of Liberty facing to the left, her hair tumbling down behind her neck. Her face is similar to George T. Morgan's design for the Silver Dollar. The reverse bears the coin's gold, silver, and copper contents expressed as parts per thousand in the center, with the same DEO EST GLORIA motto above that is also found on the $4 Stellas. The 1879 Metric Dollar was intended to be part of the international coinage design proposed by Minister Kasson when he returned from Austria. Like the 1879 Flowing Hair Stellas, this was a popular design and after the first 25 were made for the Committee on Coinage a considerable number (about 400) were struck for congressmen, senators, and other Washington V.I.P.'s. It is believed that the first 25 were made in metric alloy and that the rest were struck in silver. ***(SEE COLOR PLATE)***

The Judd reference (written by Walter Breen) states that original, Metric alloy strikes weigh 25 grams and restrikes are lighter in weight and were struck in silver. The more recent Pollock study shows that weights are not an accurate guide to the alloy the coin is made of, and that neither are the coin's color, sound when tapped, or specific gravity. The only way to tell a Metric from a Silver 1879 Metric Dollar is by non-destructive elemental analysis.

VERY RARE 1879 J.1622 METRIC DOLLAR

The Morgan Design

Lot No. 17

17 **1879 Metric Dollar. J.1622.** RE. **Gem Brilliant Proof.** Lovely, pale gray and rose toning can be seen on the obverse, while the reverse is a nice pale gold in color. Both sides are brightly reflective, with full Proof mirror flash showing in the fields and protected areas. **Very rare:** the Rarity-7 rating (meaning a dozen or less known) has not dropped in more than 20 years. Pollock traced only 8 specimens, some of which may have been duplicates. The obverse bears George T. Morgan's head of Liberty facing to the left, with her hair tightly drawn up in a bun at the back. The reverse is the metric type, with the coin's gold, silver, and copper contents expressed as parts per thousand inside a wreath with mottoes around the rim. The reverse type is the same as seen on J.1617 and was probably the same die. Like the 1879 $4 Stellas, the Metric Dollars were designed with different obverse types but the same reverse. Whether J.1622 was struck in Metric alloy or standard silver has not been discovered. ***(SEE COLOR PLATE)***

LOVELY 1879 J.1627 GOLOID METRIC DOLLAR

The Barber Design

Lot No. 18

18 **1879 Goloid Metric Dollar. J.1627.** RE. **Gem Brilliant Proof.** A beautiful specimen, toned in gray, blue and gold on both sides. The surfaces have the watery look of the best Proof coins. The fields are brightly reflective with full Proof flash. The front shows William Barber's head of Liberty facing to the left. She wears a Liberty cap like the one on the regular Silver Dollar, but with a broad band engraved with the word LIBERTY and the cotton leaves and wheat are bigger. The back shows the coin's gold, silver, and copper contents expressed as parts per thousand in the center, its weight in grams, with GOLOID METRIC DOLLAR above, 100 CENTS below, and the usual special motto adopted for the whole 1879-80 international coinage proposal, DEO EST GLORIA ("The Glory is God'S"). Like the 1879 J.1617 Metric Dollar, the Mint struck 25 specimens of the 1879 Goloid Metric Dollar for distribution to members of the congressional Committee on Coinage in Goloid metal (J.1626). Because the type was so popular, the Mint made an additional 400 examples, this time in lighter weight standard silver (J.1627). It used to be believed that originals were heavier than the so-called restrikes, but Pollock's study has shown that in 43 examples of J.1626 and 1627 the weight range between the heaviest and lightest was only 6.7 grains. Therefore, weights are no help in telling J.1626 and J.1627 apart. ***(SEE COLOR PLATE)***

MAGNIFICENT 1879 J.1631 GOLOID METRIC DOLLAR

The Morgan Design

Lot No. 19

19 **1879 Goloid Metric Dollar. J.1631.** RE. **Superb Choice Brilliant Proof.** A magnificent specimen, toned in pale cloudy gray and gold. Some light peripheral toning flecks are noted. Both sides show full mirror brilliance in the fields. The strike is sharp, with all design details showing to full advantage. **Very rare:** this pattern is given a full Rarity-7 rating by both Judd (Breen) and Pollock, meaning that only a dozen or fewer are known to survive. The obverse is George T. Morgan's design of Liberty's head, showing her hair coiled tightly at the back of her head. The type resembles that seen on the 1879 and 1880 Coiled Hair Stellas and the Presidential Life Saving Medal, all designed by Morgan. The reverse is the same design as seen on the 1879 J.1627 Goloid metric Dollar offered earlier. This type appears to have been struck in Goloid alloy, only, since none are believed known in silver. ***(SEE COLOR PLATE)***

Goloid metal was the invention of Pennsylvanian Dr. Wheeler W. Hubbell. Hubbell's idea was to make coins out of a combination of gold and silver in an exact 16:1 ratio. That way, there would be gold in silver coins and silver in gold ones. Hubbell hoped that this would put an end to the bitter wrangling over the coinage by the gold and the silver interests. At first, Congress warmed to his idea and a bill was proposed in 1877 requiring the Mint to strike Goloid coins. Congressional favor soon cooled, however, especially when Mint Director H.R. Linderman showed the Committee on Coinage that no one could tell the difference between a dollar made of silver and one made of Goloid metal just by looking at the two. Linderman showed Congress that there was a real danger that if the country adopted Goloid as its coinage metal, counterfeiters would soon make fake Goloid Dollars out of plain coin silver and pocket the difference in value from the missing gold, which was worth about 40 Cents per Dollar. Congress saw the danger and the idea for a Goloid coinage was dropped in 1878. Nevertheless, the Mint continued making Goloid pattern coins for the next two years.

OUTSTANDING 1880 J.1645 METRIC DOLLAR

The Barber Design

Lot No. 20

20 **1880 Metric Dollar. J.1645.** RE. **Gem Brilliant Proof.** An outstanding specimen of this pattern issue. Both the obverse and reverse are medium gray and rose-gold in color, while there is iridescent purple around the reverse rim. The central devices on each side are frosty. The fields are brightly reflective, with Proof mirror flash even in the tiniest places. **Rare:** probably High Rarity-6, with 20 or fewer different specimens believed to survive. The obverse is William Barber's design of Liberty facing to the left, the same one seen on the 1879 Metric Dollar, only here with the new date, 1880. The reverse, likewise, is the same as seen on Barber's 1879 Metric Dollar, as well. Breen believed that only 12 to 15 sets of the 1880 Barber designs were made and that no restrikes were coined. Breen was correct in writing that the 1880 Barber patterns are rarer than the 1879 ones. ***(SEE COLOR PLATE)***

RARE 1880 J.1648 METRIC DOLLAR

The Morgan Design

Lot No. 21

21 **1880 Metric Dollar. J.1648.** RE. **Gem Brilliant Proof.** A really quite lovely pattern. Both sides are bright white and untoned. The central devices are frosty. The obverse and reverse fields are brightly reflective with full, deep mirror Proof flash. **Very Rare:** like the preceding, probably High Rarity-6, with 20 or fewer specimens surviving. The Judd reference ranks this pattern higher, as a full Rarity-7 with only a dozen or less known. The obverse is George T. Morgan's head of Liberty that we have already seen on the 1879 J.1622 Metric Dollar offered earlier. The reverse is the by now standard Metric design for an international coinage. Close comparison of the obverse dies of J.1622 and J.1648 may be instructive, since they almost certainly were made using the same device punches. ***(SEE COLOR PLATE)***

LOVELY 1880 J.1651 GOLOID METRIC DOLLAR

The Barber Design

Lot No. 22

22 **1880 Goloid Metric Dollar. J.1651.** RE. **Gem Brilliant Proof.** Another really lovely pattern Dollar. Both sides are nicely toned in deep gray and pale rose shades. The central devices, Liberty's head and the reverse inscription, are lightly frosty. The fields on both sides are brightly reflective, wit deep Proof mirror flash. This is a **rare** pattern, ranked as a Rarity-6 in both the Judd and Pollock references. The obverse is William Barber's design that we have seen on the 1879 J.1627 Goloid Metric Dollar offered above. The reverse design is also the same one seen on J.1627. As with J.1648, it is almost certain that the 1879 and 1880 Barber Goloid Metric Dollar dies were sunk using the same device punches. ***(SEE COLOR PLATE)***

RARE 1880 J.1654 GOLOID METRIC DOLLAR

The Morgan Design

Lot No. 23

23 **1880 Goloid Metric Dollar. J.1654.** RE. **Gem Brilliant Proof.** A gorgeous example of this pattern Dollar. Both sides are toned in deep gray with rose and blue iridescence. The devices in the centers are frosty. The obverse and reverse fields are brightly reflective, with deep Proof mirror brilliance. **Very Rare:** ranked as a full Rarity-7 in both the Judd and Pollock references, meaning only a dozen or fewer are believed to survive. The obverse is George T. Morgan's design that we have seen before on 1879 J.1631. The reverse is also the same design, the standard Goloid Metric type. ***(SEE COLOR PLATE)***

U. S. GOLD PATTERNS

VERY RARE JUDD 1374 BICKFORD TEN DOLLAR

Lot No. 24

24 **1874 $10.00. Judd 1374 (R-6).** Gilt Copper, RE. Dana Bickford's design for a ten dollar gold piece exhibiting a diademed Liberty with an olive branch at her neck on the obverse. The reverse states the weight, fineness, and the word UBIQUE at the center. The exchange values for six different countries, including the United States, are expressed in roped sections around the reverse periphery. The word UBIQUE is a fitting legend for this coin as it makes reference to Bickford's desire to develop a coin with widespread international appeal and easily defined currency conversion rates. **Brilliant Proof** and displaying a considerable amount of reflectivity for a gilt copper coin. Boldly struck devices on either side. The fields exhibit moderate hairlines, however the overall "look" of the coin is really quite satisfying. A **very rare** and historically significant item. ***(SEE COLOR PLATE)***

With examples of this design struck in gold being basically noncollectable, the off metal pieces such as this are very much in demand.

RARE AND HIGHLY PRIZED JUDD 257 PAQUET DESIGN DOUBLE EAGLE

The Pittman Specimen

Lot No. 25

25 **1859 $20.00. Judd 257 (R-6).** Gilt Copper, RE. The obverse is a well known design by Anthony Paquet depicting Liberty seated with her right hand holding a fasces and her left hand supporting a shield. An eagle with wings partially extended is just behind and to the right of the shield. The reverse, also by Paquet reads UNITED STATES OF AMERICA; 20 DOLLARS; 1859, within a heavy oak and laurel wreath. **Choice Brilliant Proof.** Sharply struck. There are a few tiny rim marks which can be detected on either side as well as a couple of minor reverse lint marks. The fields exhibit quite a bit of reflectivity beneath delicate toning. This unadopted design is quite **rare**, the obverse of which was struck only to produce Judd 257 (R-6) and Judd 262 (R-7). NGC PF64. ***(SEE COLOR PLATE)***

Ex Pittman Collection (David Akers, October 1997, lot 779); previously Ex Kreisberg sale, September 1961, lot 1219.

U. S. GOLD COINS

U. S. GOLD DOLLARS

26 **1849** Open Wreath. Extremely Fine; Closed Wreath. Very Fine. Appealing examples of two major reverse types, second coin shows somewhat mushy strike. 2 pieces.

27 **1850 Choice Brilliant Uncirculated.** This is a very *rare and underrated* date in high grade. This coin is a beauty with a sharp strike and frosty lustre. There is full hair delineation and the stars and wreath are complete and sharp. Worthy of a premium bid over a common date.

28 **1850'C'** About Uncirculated. *Mintage of 6,966.* This low mintage date is the rarest collectible example of the type from the famed Charlotte Mint. The coin was well struck and it retains its original greenish-orange color. A couple of small digs in front of Liberty's chin detract but the coin is still very appealing and should be considered highly desirable.

29 **1852 Brilliant Uncirculated,** close to Choice. Plentiful light gold mint frost, a few minute contact tics define this pleasing Type IO coin. NGC MS62.

SUPERB 1852'C' GOLD DOLLAR

Lot No. 30

30 **1852'C'** Choice About Uncirculated. A superb example with claims to being fully Mint State. The coin has an outstanding original patina of deep coppery-orange. The surfaces are immaculate and *the coin has the perfect reverse* without the oft seen planchet lamination at "LA" of "DOLLAR." This is as nice as they come for the grade and is worthy of a premium bid.

31 **1853 Brilliant Uncirculated.** A nice original coin with a full, sharp strike. The surfaces are covered with a pinkish-orange lustre. This coin is very close to Choice Brilliant Uncirculated.

32 **1853** Another. About Uncirculated, perhaps better. Quite a bit of mint frost covers the surfaces but the coin is softly struck in the center which limits the grade.

CLASSIC 1854'D' DOLLAR

Lot No. 33

33 **1854'D' Brilliant Uncirculated.** Here is a Type 1 Dahlonega Dollar which is technically Uncirculated but has undergone cleaning. Close examination reveals traces of skillful retooling in the field near the first stars. *One of a total mintage of 2,935 pieces* struck at the Georgia Branch Mint.

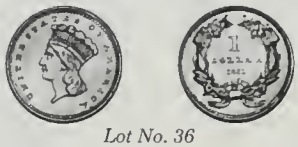
BEAUTIFUL 1855 TYPE II DOLLAR

Lot No. 34

34 **1855** Type II. **Brilliant Uncirculated.** This jewel-clear strike boasts a wealth of fine detail. The reverse shows bold die clash, a few light hairlines. Satisfying overall red-gold lustre creates the outstanding visual appeal of a higher grade.

35 **1856 Brilliant Uncirculated.** Very frosty and lustrous. Just a few too many surface marks across the obverse to call Choice. Very attractive nonetheless.

WELL STRUCK 1861 GOLD DOLLAR



Lot No. 36

36 **1861 Choice Brilliant Uncirculated.** A superb and interesting coin with a very sharp strike and strong evidence of die clashing across the reverse. In fact, part of the word LIBERTY can be seen impressed beneath the date. *The letters ERTY are printed upside down and backwards. This is a very rarely seen occurrence.* There is a pinkish and orange lustre across the surfaces which is tinged with greenish hues. The coin has strong claims to an even higher grade.

37 **1862 Very Choice Brilliant Uncirculated.** Sharply struck on obverse and reverse. Satiny clear surfaces enhanced by attractive, pale yellow gold. A superb example.

38 **1862** Another. **Choice Brilliant Uncirculated.** Cartwheel lustre, full LIBERTY enrich this Civil War date. NGC MS63.

39 **1862** A third. **Brilliant Uncirculated.** Rich, deep yellow lustre shows evidence of a gentle cleaning.

40 **1873** Open 3. **Very Choice Brilliant Uncirculated.** Wonderfully frosty and lustrous with a tinge of greenish-gold at the edges. The coin is sharply struck and the surfaces are without detracting marks or scratches. This is a lovely coin.

41 **1873** Open 3. Another. **Brilliant Uncirculated.** Pale frosty gold, smooth fields and bold strike combine in this example.

GLITTERING PROOF 1882 GOLD DOLLAR

Lot No. 42
(Enlarged)

42 **1882 Choice Brilliant Proof.** *One of only 125 Proofs struck* of a date also highlighted by an unusually low business strike mintage of 5,000 pieces. This full-mirror Proof is only a hairline from Gem and compares favorably in its bold quality to our Amon G. Carter Jr. specimen and to the Eliasberg coin; no Proof was offered in the James A. Stack collection. ***(SEE COLOR PLATE)***

LOVELY 1886 PROOF GOLD DOLLAR

Lot No. 43
(Enlarged)

43 **1886 Brilliant Proof,** close to the Choice category. *One of 1,016 Proofs struck,* a needle-sharp example showing filled loop in the 6. Glorious reflective mirror fields complement jewel-like devices. Similar to the Amon G. Carter and Eliasberg specimens; no Proof appeared in the James A. Stack collection. ***(SEE COLOR PLATE)***

U. S. QUARTER EAGLES ($2.50 GOLD)

U. S. EARLY QUARTER EAGLES

NO STARS 1796 QUARTER EAGLE

Lot No. 44
(Enlarged)

44 **1796** Breen 1. No Stars. Extremely Fine. Both strike and surfaces are balanced and appealing, giving the quality of higher grade. The rim is pinched at 3:00 and close examination under magnification shows highly skilled repair to portions of the edge reeding. This is nonetheless a very satisfactory example of a prized early type. ***(SEE COLOR PLATE)***

IMPORTANT 1807 QUARTER EAGLE

Lot No. 45
(Enlarged)

45 **1807** Br.1. Choice About Uncirculated, on the cusp of Mint State. Early die state without crack at date. A well struck example of *6,812 struck,* but careful study reveals a trace of skillful resurfacing in right obverse field. The reverse shows considerable mint lustre. ***(SEE COLOR PLATE)***

U. S. CLASSIC HEAD QUARTER EAGLES

NEAR GEM 1836 QUARTER EAGLE

Lot No. 46

46 **1836** Br.II-2. **Choice Brilliant Uncirculated.** Superb mint frost. Well struck everywhere except the highest hair curls of Miss Liberty and the left three vertical stripes of the shield, typical of this well known die variety. Characteristically, there is a die break extending from the rim above the sixth star across Liberty's profile to the rim between the lower two stars at the right. Here is a wonderful Mint State example of this important Classic Head Quarter Eagle.

47 **1839'C'** Extremely Fine with claims to a higher grade. The 3 and 9 of the date are boldly repunched on this particularly appealing example of a short-lived type. Comparable to the James A. Stack specimen.

U. S. LIBERTY HEAD QUARTER EAGLES ($2.50 GOLD)

EXITING 1846'C' QUARTER EAGLE

Lot No. 48

48 **1846'C'** Extremely Fine. With it's *very low mintage of only 4,808 pieces,* it is no surprise that this is one of the scarcest Quarter Eagles in the series. This coin retains it's original surfaces and greenish-yellow color. There is a small indentation at the bridge of the nose and a small scrape in the surface above the Eagle's head. This coin is a good opportunity for the dated gold specialist and the collector of Charlotte Mint Gold Coins.

WONDERFUL 1847'D' QUARTER EAGLE

Lot No. 49

49 **1847'D'** Choice About Uncirculated. A wonderfully problem-free and original example of a Quarter Eagle from The Dahlonega Mint. This coin would make a *first-rate type coin* as it is the commonest date of the type. Its superior color and strike, however, make it a quality example for either a date or type set.

50 **1878 Brilliant Uncirculated,** close to the Choice category. Attractive and fully lustrous.

51 **1903 Brilliant Uncirculated.** Lustrous with some scattered bagmarks.

52 **1906 Brilliant Uncirculated.** Sharply struck and attractive. Contact marks and hairlines are minimal. Perfect for type.

53 **1906** Another. Choice About Uncirculated. Pleasing surfaces.

U. S. INDIAN HEAD QUARTER EAGLES ($2.50 GOLD)

The following set comes from a very old collection that has many other important coins spread throughout the sale. Closer inspection is recommended on this set since this was put together in the mid 20th Century.

54 **1908 Brilliant Uncirculated.** Sharply struck for the date with glossy pale yellow gold surfaces.

SUPERB 1909 QUARTER EAGLE

55 **1909 Gem Brilliant Uncirculated.** An outstanding coin in every respect. The strike is incredibly sharp and the surfaces are immaculate. There is a pinkish gold color and rich lustre which gives this beautiful coin the finishing touches. True Gems of this date are very rarely available and this coin presents a real opportunity for the high grade collector.

56 **1910** Choice Extremely Fine. Evenly worn and toned a pale orange; **1913** Choice About Uncirculated. Only the lightest friction keeps this coin from the mint state classification. Frosty surfaces are pale orange in appearance. **2** pieces.

57 **1911 Very Choice Brilliant Uncirculated.** Nearly Gem Brilliant Uncirculated. Just a wispy hairline or two away from perfection. Unlike most examples of this date, this coin is *sharply and fully struck.* The clean surfaces exhibit a greenish-yellow gold lustre. This is a premium example of this date.

58 **1911'D'** Extremely Fine, used in jewelry. The key date in the series. There is a faint mintmark on the coin, but this is **not** the weak mintmark variety. The coin was mounted at one time on the reverse. It appears as if gold solder was used as it blends in nicely with the design.

59 **1912 Choice Brilliant Uncirculated.** Very well struck in pale yellow frosty gold. There is full lustre on both sides. This date is surprisingly scarce in this condition and is worth a good premium over a common date.

60 **1914** About Uncirculated. A good bit of lustre remains beneath medium orange patina. A scarce date; **1915** About Uncirculated. Evenly worn with smooth glossy surfaces and medium orange color; **1925'D'** About Uncirculated. Weakly struck in the center as is often seen on this date. Otherwise, the coin has clean surfaces which retain a lustrous greenish-orange coloration. **3** pieces.

61 **1914'D' Brilliant Uncirculated.** Virtually Choice Brilliant Uncirculated with frosty lustre and a good strike. A better example than most typically seen.

62 **1926 Choice Brilliant Uncirculated.** Full frosted surfaces and well struck in pinkish gold. This is a small edge disturbance at 12:00 which is hardly noticeable.

63 **1927 Very Choice Brilliant Uncirculated.** Sharply struck and covered with a rich satiny lustre of pink and orange. There are a few light marks here and there but the look of the coin is wonderfully fresh and original.

64 **1928 Brilliant Uncirculated.** Frosty lustrous surfaces and a good strike combine to give this coin a fully Mint State appearance.

65 **1929 Choice Brilliant Uncirculated.** A crisp strike and hard frosty surfaces are enhanced by a lovely pink and gold toning. This coin is a premium quality example of the grade level as the coin is virtually a grade better.

ADDITIONAL U. S. INDIAN HEAD QUARTER EAGLES ($2.50 GOLD)

HIGH QUALITY 1911'D' QUARTER EAGLE

Lot No. 66

66 **1911'D'** Choice About Uncirculated, virtually Mint State. Even, smooth red-gold lustre and a clear 'D' distinguish this specimen of one of the rarest Indian dates. David Akers rates the 1911'D' R-7 in MS-60 and the present example is very near this quality. Here is an ideal coin for a Type or date collection.

67 **1913 Choice Brilliant Uncirculated.** Fully lustrous with good gold color.

68 **1914 Brilliant Uncirculated.** Pleasing frosty lustre, a couple of contact tics hallmark this coin.

69 **1914 Brilliant Uncirculated.** A second high quality specimen.

70 **1914** A third. About Uncirculated. Toned in rich, deep gold shades.

71 **1914'D'** About Uncirculated. Prominent inner die line joins stars, reasonably bold 'D' appears on reverse.

72 **1926 Choice Brilliant Uncirculated.** Rich gold mint frost enhances both sides of this Roaring Twenties coin. PCGS MS63.

73 **1927 Choice Brilliant Uncirculated.** Virtually a Gem coin, with lovely rich gold toning and attractive lustre.

74 **1928 Very Choice Brilliant Uncirculated.** Lovely sparkling light gold joins a precise strike. NGC MS64.

75 **1929 Very Choice Brilliant Uncirculated.** Deep yellow gold lustre highlights smooth fields. PCGS MS64.

76 **1929** Another. **Very Choice Brilliant Uncirculated.** Another displaying a fascinating lighter gold lustre. PCGS MS64.

GLORIOUS SET OF U. S. THREE DOLLAR GOLD

This spectacular set is one of the jewels of this sale. It contains all the issued dates (the 1875 is a pattern issue) from 1854 through 1889. What makes this set so special is that the majority of the coins are fresh, problem-free specimens that have not been through the "Coin Doctor's Office." Stack's is proud to present this historic collection for your bidding pleasure.

77 **1854** About Uncirculated. A very sharply struck and problem-free example of this first year of issue. *This date is the only Three Dollar Gold that has the word DOLLARS in small letters.* This coin has the beautiful greenish-orange patina seen only on original, uncleaned examples.

RARE 1854'D' THREE DOLLAR GOLD

Lot No. 78
(Enlarged)

78 **1854'D'** About Uncirculated. Pleasing pale yellow gold in color, with original mint lustre around the obverse and reverse rims and in some of the protected areas. **A rare issue,** *with only 1,120 struck.* This is the only Dahlonega Mint $3.00 gold date. It is believed that probably only about 100 specimens survive today. Softly struck in places, as typical for the mint, Dahlonega did not have the ability to strike up the federal design types to their full effect. A few light marks are noted, commensurate with the coin's age and grade. David Akers' monograph on Three Dollar Gold Pieces found that the average grade for this issue was only VF, making this high grade specimen particularly desirable. ***(SEE COLOR PLATE)***

A LOVELY 1854'O' THREE DOLLAR GOLD PIECE

Lot No. 79

79 **1854'O'** About Uncirculated and Choice. This lovely coin has the distinction of being among the only New Orleans Mint Three Dollar Gold coins struck, as only 1854 dated coins were issued. Almost the entire issue was well circulated and those that have survived to this day are generally found no better than Extremely Fine. This coin has an unusually sharp strike and exhibits broad, distinct denticals and well struck devices and mintmark. Some semi-prooflike reflectivity surrounds the letters and wreath, and the surfaces have a greenish-orange patina of frosty lustre. A tiny edge nick at 4:00 obverse is the only minor detraction. This is an exciting coin for the specialist.

A SECOND SPLENDID 1854'O' THREE DOLLAR GOLD PIECE

Lot No. 80

80 **1854'O'** Another. About Uncirculated. A well struck example with original surfaces retaining some frosty lustre. This coin has a lighter coloration than the previously offered coin. The surfaces are a medium to light pale yellow and gold with tinges of coppery-orange. The coin is well struck although the mintmark is a tad softly struck as is typically seen on this issue. This will be a wonderful coin to add to a high grade collection.

81 **1855** Choice Extremely Fine. An attractive example retaining ample pale pinkish lustre suggestive of a higher grade.

82 **1855'S'** About Uncirculated, polished. *One of the rarest dates in the series with a mintage of only 6,600 pieces.* The date is virtually unobtainable in grades of Extremely Fine or better. Although polished at one time, this coin has excellent detail and has taken on a lovely pinkish-gold patina over the years. Should be seriously considered by the specialist.

83 **1856** Extremely Fine, mounted. Despite having been formerly used as a jewelry piece, this coin is quite attractive. There is evidence of a former mounting at 12:00, but this is really the only detraction. The surfaces are otherwise quite smooth and appealing.

HIGH GRADE 1856'S' THREE DOLLAR GOLD

Lot No. 84

84 **1856'S'** Medium S. Choice About Uncirculated. Virtually a fully Brilliant Uncirculated coin. Although this date has a high mintage for the series and can be found up to and including Extremely Fine without too much difficulty, in this condition the date is very rare. This coin's surfaces are smooth and mark-free and the strike is bold. A frosty lustre of medium orange gold covers the surfaces and only the lightest wear is evident. The coin is so nice that it would easily fit into a very high grade collection. *It is most likely that this coin is at or very near the condition census.*

85 **1857** Choice About Uncirculated. A lovely coin with pale pinkish gold lustre covering both sides. The strike is sharp and the edges are perfect. This is *a very underrated date*. It is quite difficult to find examples of this date in grades better than Extremely Fine.

86 **1857'S'** Extremely Fine, perhaps better. A pleasing example of this rare date with a good strike and sharp, squared away edges. There is a glossy pale orange toning to the coin which gives it the appearance of a full About Uncirculated. This is *one of the rarest dates in the series*. As such, this coin presents an opportunity for the specialist.

LOW MINTAGE 1858 THREE DOLLAR GOLD

Lot No. 87

87 **1858** Choice About Uncirculated. This is a very rare date with only 75 to 100 pieces estimated to exist today out of the original *mintage of 2,133 pieces*. Examples in this condition are very rare as most survivors are Very Fine or Extremely Fine. This coin is totally problem-free with smooth surfaces which have only light rub disturbing the frosty lustre. The strike on this coin is very sharp and the color is golden with medium orange highlights. Here is an exceptional opportunity for the specialist collector.

88 **1859 Brilliant Uncirculated.** A wonderful example with a smooth satiny lustre of medium orange gold and some russet highlights. This date is very difficult to find in such nice condition. According to Akers, *the average grade of this date is only Very Fine*. The opportunity to acquire a Mint State example should not be overlooked.

WELL STRUCK 1860 THREE DOLLAR GOLD

Lot No. 89

89 **1860 Brilliant Uncirculated.** *Mintage 7,155*. This date is very rare in this condition. Collectors seldom get a chance to acquire an 1860 better than Extremely Fine. This coin is well struck and has frosty pinkish gold surfaces with greenish hues. The coin exudes originality as it has never been cleaned or fooled with in any way. As such, it is most desirable to today's fastidious and knowledgeable collectors.

90 **1860'S'** Choice Very Fine with claims to Extremely Fine. *Mintage of 7,000 with a subsequent melting at the Mint of 2,592* which further reduced the amount available. This is another mint marked rarity in the series which is very difficult to obtain in decent, collectible condition. The coin is evenly worn with smooth problem free surfaces. An attractive patina has settled on the coin, further adding to its desirability.

91 **1861** About Uncirculated. With *a mintage of only 6,072*, the date must be considered very scarce. The coin has nice original surfaces with mellow orange-gold patination. There is a shallow scrape on the reverse between the left rim and the wreath which is well hidden and does not detract.

UNDERRATED 1862 THREE DOLLAR GOLD

Lot No. 92

92 **1862** Choice About Uncirculated. *This is a rare and underrated date in the series with a mintage of 5,785*. This coin is nearly Mint State with flashy prooflike reflectivity in and around the devices. The coloration is a greenish-gold which jumps off the surfaces. There are a few tiny little edge nicks which are insignificant and more than compensated for by the sharp strike. In fact, the eye appeal of this coin is so extraordinary that we would not be surprised to see it realize very competitive bidding and a Brilliant Uncirculated price.

CHOICE 1863 THREE DOLLAR GOLD

Lot No. 93

93 **1863 Choice Brilliant Uncirculated.** This is an outstanding example of this rare date which has *a low mintage of 5,039. Probably less than 200 pieces in all grades are extant*. Most grade no better than Extremely Fine. A coin of this quality is exceedingly rare and must be seriously considered by the astute collector. This coin exhibits the characteristic obverse and reverse clash marks seen on most specimens. The coin is sharply struck and has pinkish-yellow lustre covering the surfaces. The lustre is made even bolder by the die striation lines impressed into the surfaces. The edges are crisp and sharp with only one or two tiny nicks which do not affect the beauty of the coin.

94 **1864** Choice Extremely Fine. This date's *mintage was only 2,680*. The Civil War limited the production of all coinage during this period. This coin is well struck with the detail of a full About Uncirculated. The surfaces are glossy with a muted pale orange patination.

VERY RARE 1865 THREE DOLLAR GOLD

Lot No. 95

95 **1865** Choice Extremely Fine. This is a very rare date in any grade as its *very low mintage of only 1,165 would suggest*. This coin is a wonderful example for the collector as it is essentially problem-free and has a deep rich orange-gold patina covering the surfaces. Prooflike reflectivity around the devices gives the coin the appearance of an even higher grade. We would not be surprised to see this rare coin bring well above it's listed price in the guide books.

96 **1866** Choice Extremely Fine, with claims to About Uncirculated. This coin has *a very low mintage of only 4,030 pieces*. It is difficult to obtain in any condition. A lovely pale orange-gold patina has settled on this well struck coin. There is a small rim nick at 3:00 obverse, but overall the coin is perfect for a high quality collection.

97 **1867** Choice Extremely Fine. Another *very low mintage date in the series with only 2,650 pieces produced*. There is a tiny edge bump at 10:00 on the obverse and a small planchet lamination next to the U of UNITED. Otherwise, the coin is well struck with a pale orange toning and clean surfaces.

98 **1868** Choice About Uncirculated. This is a beautiful, near Mint State example of this rare date with only the slightest rub limiting the grade. The coin is very well struck and the smooth, clean surfaces have a light orange toning. This year's production was *only 4,875 pieces*. The vast majority of the small number extant do not approach this lovely quality.

99 **1869** About Uncirculated and Choice. The *mintage of this date was only 2,525 pieces*. This is a sharply struck coin. The semi-reflective surfaces have toned a medium orange with coppery highlights. The coin is pleasing in every respect and would be an excellent choice for a high quality collection.

100 **1870** Choice Extremely Fine. This is an appealing problem-free coin with *a mintage of only 3,535*. The coin is well struck and has a satisfying yellow-orange patina. There is some prooflike reflectivity in the devices. This is a very scarce date with, by some estimates, *less than 250 examples surviving in all grades*.

101 **1871** Choice Extremely Fine. *Only 1,330 pieces* of this rare date were minted making it one of the lowest number produced in the series. This is a wholly original coin with a muted yellow-green patina. There a few light surface marks consistent with the grade which do not detract from this coin's appeal. Such an attractive example of this date should generate considerable interest among knowledgeable numismatists.

102 **1872** About Uncirculated and mounted in jewelry. *Mintage 2,030.* There is an edge mounting removed at 12:00 leaving a solder spot. The coin has nice detail but the surfaces are glossy from an old burnishing. Over time, a nice orange-gold tone has covered the surfaces. Despite the detractions, the overall appearance is attractive.

HIGH GRADE 1873 CLOSED 3

Lot No. 103
(Enlarged)

103 **1873 Closed 3.** About Uncirculated. A very high grade for this issue, which usually comes in VF or EF condition. Both sides are a nice, pale yellow gold in color. The surfaces are brightly reflective with considerable prooflike mirror flash. Some light hairlines are noted but these are almost trivial. The 1873 Closed 3 is an enigmatic issue. The Mint has no record of striking these coins so there are no official mintage figures for it. Mint records only note making 25 Proof 1873 Open 3 pieces. ***(SEE COLOR PLATE)***

Lot No. 104

104 **1874 Very Choice Brilliant Uncirculated.** This remarkable coin is *very nearly a full Gem Brilliant Uncirculated*. Although the date is often available in the lower grades, in this condition it is very rare. The surfaces of this coin are virtually immaculate and have a semi-prooflike sheen caused by rich, full lustre. The color of the coin is a pleasing pinkish gold. The strike is a bit weak in portions of the headdress and wreath, but is otherwise very sharp. This is a simply outstanding example of the date and/or the type and would be perfect for either purpose.

PATTERN 1875 THREE DOLLAR GOLD

(Enlarged) *Lot No. 105* *(Enlarged)*

105 **1875 $3. Judd 1437 (R-7). Brilliant Uncirculated.** Aluminum gilt. RE. This fascinating coin presents a distinctly matte surface from gilding after striking as what the late Dr. Judd called a regular dies trial piece. Full LIBERTY, uneven obverse denticles identify this example.

Ex Nate S. Shapero Collection (Stack's, October 1971, lot 939). This coin is not listed in Andrew Pollock III's recent revision of Judd, though an example in Stack's 1971 A.N.A. Sale does appear.

HISTORICALLY RARE 1876 THREE DOLLAR GOLD

Lot No. 106

106 **1876 Brilliant Proof but lightly circulated.** Net grade of About Uncirculated. *This great rarity has a proof only mintage of only 45 pieces.* All of these were intended for collectors. However, a goodly number of this issue did get into circulation as $3.00 was a significant sum at the time. Although this coin did see some circulation, it still retains perfectly squared edges and a high wire rim. This is due to an extraordinary sharp impression and good luck. The physical wear on the surfaces has been equally kind leaving very few marks or scratches. Next to the lofty 1875, this date is the most sought after rarity in the series. For those numismatists trying to complete a collection in this series, we cannot overstate the importance of this coin. ***(SEE COLOR PLATE)***

Lot No. 107

107 **1877 Brilliant Uncirculated** in terms of wear. Has been cleaned. *Mintage only 1,488.* A very rare and popular date in the series. Although this coin has seen a rather brisk cleaning which has left fine hairlines, it is still far better than most surviving examples in terms of detail. The overall appearance of the coin is quite pleasing and the astute collector will bid competitively on this rarity.

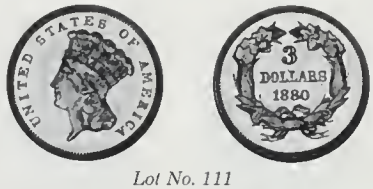
108 **1878 Brilliant Uncirculated.** This coin has strong claims to being called Choice Brilliant Uncirculated due to it sharp strike, wonderful color, and full lustre. The surfaces show a few stray hairlines and marks but none are in themselves distracting. This is the most often seen date in the series, but this coin's condition is far better than what is usually seen in the Mint State category. As such, it would make a first-rate type coin and is worthy of a premium bid.

109 **1878** Another. Choice About Uncirculated. This coin has an exceptionally sharp strike with correspondingly sharp, squared edges. The surfaces, despite having been wiped at one time, are very attractive and have an attractive medium orange toning.

PROOF-LIKE 1879 THREE DOLLAR GOLD

Lot No. 110

110 **1879 Choice Brilliant Uncirculated.** *Mintage 3,030.* An eye-catching prooflike coin with a deep, bold impression and lemon-orange golden color. There is a partial wire rim and deeply delineated denticles which frame the coin and characterize its perfect edges. The cameo devices contrast against the surfaces which are most prominently prooflike in the peripheries. The coin is amazingly well balanced due to its even and clean surfaces. This is quite a beautiful coin and will make a fine addition to a quality collection.



Lot No. 111

111 **1880 Brilliant Uncirculated.** Virtually a full Choice Brilliant Uncirculated. This is an rare and popular coin due to its *mintage of only 1,036 pieces.* It is very well struck with full detail and a sharp, high wire edge around most of the rim. The surfaces are semi-prooflike and have contrasting colors of pinks, reds, and gold. A few scattered bagmarks are noted on the obverse but the reverse is remarkably mark free. Frosty lustre covers the surfaces giving the coin a lovely sheen. This date has always been popular with collectors due to the fact that the even and round number of 1,000 business strikes were issued.

EXCEPTIONALLY RARE 1881 THREE DOLLAR GOLD

Lot No. 112

112 **1881 Choice Brilliant Uncirculated.** *Only 554 minted which is the lowest official mintage of any issue in this series intended for circulation.* Naturally, this is an exceptionally rare coin and, as the issue did go into circulation, only a small number of Mint State examples have survived. This is an outstanding coin of the first water. The smooth, semi-prooflike surfaces are lightly frosted. The coin is fully and sharply struck. The color is an warm pinkish-orange and the surfaces are devoid of any blemishes. The superb quality of this coin clearly places it at or near the condition census for the date. As such, specialists in the series should take note and bid accordingly.

LOVELY CHOICE 1882 THREE DOLLAR GOLD

Lot No. 113
(Enlarged)

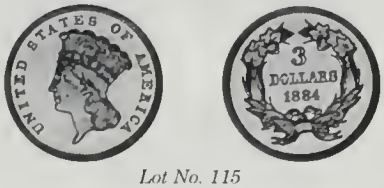
113 **1882 Brilliant Uncirculated** and Choice. *Only 1,576 minted.* This rare coin shows the characteristic recutting under the 2 of the date seen on all genuine specimens. The condition of the coin is very nearly Choice Brilliant Uncirculated as the surfaces are very clean and lustrous. The color is a lovely medium orange-gold with green hues. The strike is exceptionally sharp with broad denticles and a high wire edge. This is a lovely example of the date and would fit in nicely in a high grade collection. ***(SEE COLOR PLATE)***

VERY RARE 1883 THREE DOLLAR GOLD

Lot No. 114

114 **1883 Choice Brilliant Uncirculated.** This very rare coin's mintage of *only 989 pieces* makes it one of only three regular issues in the series with less than 1,000 pieces struck. This is a sharply struck coin with silky surfaces combining frost, lustre, and hints of semi-prooflike reflectivity. The color of the coin is a warm pinkish-gold which becomes redder and darker at the peripheries. There are some scattered light bagmarks and hairlines which in no way detract from the coin's magnificent appearance. This is another fantastic Three Dollar coin which should make specialists stand up and take notice.

REFLECTIVE 1884 THREE DOLLAR GOLD



Lot No. 115

115 **1884 Choice Brilliant Uncirculated.** Another very low mintage coin in the series with *only 1,106 struck.* This underrated rarity has an exceptionally sharp strike and many characteristics suggestive of a Brilliant Proof. The coin has an extraordinarily sharp strike and smooth, unbroken semi-prooflike surfaces from edge to edge. The surfaces of the coin are a flat pinkish-gold but there are hints of mint frost at the peripheries. As one would expect with such fragile surfaces, there are a few faint insignificant hairlines. The date is very rarely seen in this state of preservation and must be considered a rare opportunity for the specialist.

Lot No. 116

116 **1885 Brilliant Uncirculated,** used in jewelry. *This is the second lowest regularly issued date in the series with a business strike mintage of only 800 pieces.* When combined with the proof issues of this year, only 910 total coins of this date were produced. This coin does not appear to have seen circulation. However, there is evidence of a former jewelry mounting in a pin or pendant. This is manifest in light filing and areas of solder at sections of the front edge. These are confined to the front rim and do not extend into the fields, leaving them undisturbed and unimpaired. In fact, the reverse appears perfect. The coin retains it original surfaces and has a lovely pink-gold coloration. Despite its detractions, this is a desirable coin which should not be severely discounted.

CHOICE 1886 THREE DOLLAR GOLD

Lot No. 117

117 **1886 Choice Brilliant Uncirculated.** *Mintage 1,142 of which 1000 are business strikes.* This is a rare coin in any condition but exceptionally so in Mint State. Akers considers this date to be very underrated and surprisingly difficult to find in choice condition. The coin has a sharp, full strike, frosty lustre, and hints of semi-prooflike surfaces. There are wonderful pinks, oranges, and lemon-yellows in the coloration which give the coin a superb appearance. The fabulous condition of this coin probably places it in or very near the condition census for the date. We would not be surprised to see this example realize a record price.

SUPERB 1887 PROOF THREE DOLLAR GOLD

Lot No. 118
(Enlarged)

118 **1887 Very Choice Brilliant Proof.** *Only 160 pieces minted.* Rarely does an example of this date come along in such quality. This lovely coin is *virtually a full Gem Brilliant Proof.* The fields are remarkably clean, and, as would be expected with a coin of this caliber, the strike is boldly sharp and the edges are squared and perfect. The mirrored surfaces contrast against cameo devices and are highlighted by light pinkish and pastel-gold tones. It is doubtful if more than a handful of examples extant can compare to this coin. We would not be surprised to see this exceptional example realize a full Gem price after spirited bidding. ***(SEE COLOR PLATE)***

GEM BRILLIANT PROOF 1888 THREE DOLLAR GOLD

Lot No. 119
(Enlarged)

119 **1888 Gem Brilliant Proof**. A lovely coin, with pleasing yellow gold color. The fields are brightly reflective with full deep Proof mirror flash. The strike was sharp, giving the surfaces the watery look typical of high grade Proofs. All the design details in the dies can be seen to full advantage. *Only 291 proofs were struck this year.* This piece is specifically noted in Akers' list of auction appearances of Proofs. ***(SEE COLOR PLATE)***

Ex Stack's sale of October 23, 1970, lot 803; earlier, from the same firm's sale of September 19, 1969, lot 1058.

120 **1888 Brilliant Uncirculated.** *Only 5,291 minted.* The obverse of this coin has lovely smooth surfaces that are very nearly Choice. The reverse, although fully Mint State, has a few surfaces digs in and about the last 8 of 1888. There is a frosty coppery-orange lustre covering the coin. Overall, this is quite an appealing example of this scarce date.

CHOICE PROOF 1889 THREE DOLLAR GOLD

Lot No. 121
(Enlarged)

121 **1889 Choice Brilliant Proof**. Lovely pale yellow gold color with full mirror fields that have a definite watery look to them. A beautiful coin that is partially cameo-like. *Only 129 Proofs were struck in this final year of issue of the denomination.* David Akers noted that "Proofs are rare and have actually appeared at auction less often than those of some other dates with lower proof mintages." We note that neither Norweb nor Miles had proofs in their collections. ***(SEE COLOR PLATE)***

122 **1889** Choice About Uncirculated. A very scarce date as its *low mintage of 2,429* would suggest. This coin has a remarkably sharp strike with gold and orange surfaces. Only the lightest friction keeps us from assigning a higher grade to this superior example.

ADDITIONAL U. S. THREE DOLLAR GOLD COINAGE

123 **1856 Brilliant Uncirculated.** Bright and attractive with considerable prooflike "flash" on both sides. Not struck from the dies used to coin Proofs in 1856, but about as close as one can get.

124 **1864 Brilliant Uncirculated** and displaying evidence of a past light cleaning on both obverse and reverse. The 18 of the date repunched as is the case on all business strikes. This well struck, handsome example really gives an excellent overall appearance! *A total of only 2,680 pieces of this scarce date were struck.*

125 **1868 Brilliant Uncirculated.** Very close to Choice in grade. Both sides are fully lustrous, with nearly unbroken cartwheels visible. Pleasing, rich yellow gold color can be seen on both sides, and the fields are brightly reflective.

EXTREMELY RARE 1873 OPEN 3 THREE DOLLAR GOLD

Lot No. 126
(Enlarged)

126 **1873 Open 3. Brilliant Proof,** very near full Choice condition. **Very rare:** *only 25 Proofs were struck in this* **Proof only date.** Pale yellow-white toning around areas of the reverse, particularly around the rim, pale orange gold overall. There are a few light field marks and a hairline or two, noted for accuracy but really insignificant compared to the rarity of the coin. There are probably as few as a dozen survivors from the original mintage of 25. An opportunity for the Three Dollar specialist to acquire this seldom offered rarity. ***(SEE COLOR PLATE)***

127 **1874 Brilliant Uncirculated.** Only a few faint field hairlines keep this deeply lustrous coin from fully Choice condition.

128 **1877** Very Fine. An example of this rare date, one of *only 1,468 business strikes made.* Mounted, sweated, reeding reworked at the top of the obverse.

129 **1878 Choice Brilliant Uncirculated.** Bright yellow gold color with blazing mint lustre and full mint frost on both sides. A scattering of superficial ties on the obverse is noted.

130 **1878** Nearly Uncirculated. Bright yellow gold in color, some planchet imperfections on the reverse.

DESIRABLE 1880 THREE DOLLAR GOLD

Lot No. 131

131 **1880 Brilliant Uncirculated** despite hairlines and a rim cut at 6:00. Much appealing lustre, *one of only 1,000 business strikes* produced and a critical component for any date collection.

VERY RARE 1885 PROOF THREE DOLLAR GOLD

Lot No. 132
(Enlarged)

132 **1885 Very Choice Brilliant Proof.** *A total of 110 Proofs were struck for collectors in 1885.* That year, the regular issue intended for circulation was exceedingly sparse, so the Proof issues tend to be considered very rare by virtue of the paltry total mintage of only 910 pieces combined. This is a **superb** example of a Proof of which very few examples have survived to this day. The coin is wonderfully struck with every detail fully enhanced. The edges are perfect and the mirrored surfaces glimmer beneath light pastel-orange gold tone. There a few wispy hairlines across the placid surfaces. These pale in significance to the outstanding eye appeal of this beauty. ***(SEE COLOR PLATE)***

A COMPLETE SET OF 1879 AND 1880 GOLD $4.00 STELLAS

The Most Famous of All United States Pattern Coins

Stack's is proud to offer for your bidding competition a complete set of the famous and popular 1879 and 1880 Gold $4.00 Stellas. This complete set includes the 1879 Flowing Hair Judd 1635 Gem Brilliant Proof, the 1879 Coiled Hair Judd 1638 Gem Brilliant Proof, the 1880 Flowing Hair Judd 1657 Gem Brilliant Proof, and the 1880 Coiled Hair Judd 1660 Gem Brilliant Proof. The quality of these coins is, in a word, outstanding. The 1879 Flowing Hair piece is a magnificent example. The 1879 Coiled Hair and the two 1880 coins are, without a doubt, among the finest we have ever seen. The 1880 Coiled Hair piece is a stunning specimen that would grace even the most fastidious of collectors. The 1880 Flowing Hair coin has one of the deepest and strongest strikes we have seen on any Proof coin, gold or silver.

It would not be hard to argue that the 1879 and 1880 Stellas are the most famous of all United States Pattern Coins. They have all the features required in a great numismatic collectible: great rarity, great beauty, and great history. From the time they were first struck, in 1879, the Stellas were recognized by all who saw them as the pinnacle of the coiner's art. The fame they won the day they were first made has never departed. If anything, the Stellas have become ever more popular and famous over the century and more that has passed since they were struck. The first year's issue, the 1879 Flowing Hair design, was immediately sought after by the great and powerful in Washington, D.C. Congressmen, senators, and friends of the powerful all strove to acquire a specimen of the new proposed $4.00 denomination. The 15, or so, pieces the Mint made at first, to show members of the congressional Coinage Committee, were soon distributed. The Mint was prevailed upon to make more to satisfy the demand, and specimens were still being struck in 1880 for V.I.P.'s.

The exact number struck of each date and variety has been a matter of contention since 1880! Research in later years has led to a better understanding of the mintages. The standard numismatic handbook, A Guide Book of United States Coins, has the following mintage figures: 425 1879 Flowing Hair Stellas, 10 1879 Coiled Hair Stellas, 15 1880 Flowing Hair Stellas, and 10 1880 Coiled Hair Stellas were struck. The high mintage for the first variety coined, the 1879 Flowing Hair style, is explained by the enthusiastic popularity of the issue among the Washington powerful. The extremely low mintage figures for the three later varieties was because the Mint's only struck enough for distribution to the Coinage Committee, and made none for sale to the public. The Mint decided that popular demand for the $4.00 denomination would be filled by striking the 1879 Flowing Hair type.

The history of the $4.00 Gold Stellas is well known, because it was recorded as it was happening. The coins owe their origin to the proposal of Mr.John Kasson, who was the United States Minister to Austria in 1879. While in his Austria, Kasson found that none of his U.S. gold coins would be accepted in the shops without a lot of tedious and complicated figuring of exchange rates. Kasson had once been chairman of the congressional Committee on Coinage, and he was familiar with the coins of most major nations in the world. Kasson thought about the problem he had with the exchange rates and came up with a numismatic idea that would make his name famous among collectors. When he returned to the United States, Kasson

suggested that the Mint should be authorized to strike a special gold coin, whose intrinsic value would be nearly equal to that of the Austrian 8 Florin gold coin. The closest United States equivalent to the Austrian coin, by intrinsic value, would be a gold piece valued at $4.00. Kasson sent his suggestion to the coinage committee, which ordered the Mint to strike samples of a $4 gold coin for the committee's approval.

With congressional approval, and even the backing of the secretary of state, who thought that Kasson's idea was a good one, the Mint was ordered to design and engrave dies for the new denomination. Engravers Charles E. Barber and George T. Morgan were each commissioned to make an obverse design. Barber's design showed Liberty facing to the left, with her hair flowing down behind her neck and was like his father's 1878 pattern Half Eagle. Morgan's design showed Liberty's hair coiled on top of her head. Only one reverse design was made, which showed a large star in the center symbolic of the name of the denomination, the Stella.

*Since the new Stella was intended to circulate as a universal coinage, acceptable everywhere, some way had to be found to show its value in terms that people in any country could understand. Just having "$4" on the coin as its denomination would not tell a foreigner what it was worth in his own country's money. Accordingly, the obverse of the Stella spells out exactly what the coin is made of. The obverse is engraved 6*G*.3*S.7*C*7*G*R*A*M*S*, signifying that there were 6 grams of gold, .3 grams of silver, and .7 grams of copper, giving the Stella a total weight of 7 grams. Anyone in a foreign country could figure out what this much gold, silver, and copper would be worth in his own money, thereby easily establishing the value of the Stella in any country. On the reverse, the denomination is actually given three separate times, expressed as ONE STELLA 400 CENTS FOUR DOL.! The national motto, E PLURIBUS UNUM, and a special motto particular to the Stella, DEO EST GLORIA (translated as "The Glory is God'S") are also engraved on the reverse.*

When the Mint received the order to make the new Stella, it was faced with the problem of how to make a gold coin whose value was half way between the $3.00 and $5.00 gold piece. The new coins were not only an odd denomination for the Mint, but they were also supposed to be made of a very unusual alloy. Instead of being the usual .900 fine gold and the rest a mix of copper and other elements, the Stellas were to contain a significant amount of silver as well. The silver was to be added to the gold content to bring the exchange value of the coin close to that of the Austrian 8 Florin.

The Mint solved the problem of the unusual alloy very easily. No one outside the assay shops of the western states was better at refining precious metals than the United States Mint at Philadelphia. The right alloy mix of gold, silver, and copper was soon achieved.

Now the Mint faced the one problem that could not be solved so easily. The Mint had to find some way of rolling out the $4.00 planchet stock to the right thickness and setting the planchet cutters to the right diameter so that the metal disks that would become $4.00 Stellas would be the right weight and have exactly as much of the new alloy as they were supposed to contain. How was the Mint to create the new $4.00 coin without incurring significant re-tooling costs for a coin that was still in the pattern proposal stage?

We do not know who came up with the solutions to these problems, which were ingenious. They accomplished the goals without costing the Mint an extra penny. First, the Mint decided to use the same diameter planchet cutter that it used for the $5.00 coins. We can see this, today, just by comparing the diameters of a $4.00 and a $5.00 coin, which are the same. Once the final size of the $4.00 had been decided, the next step was to be sure that each planchet weighed exactly the right amount for the new denomination.

In the Mint, planchet weights were controlled by balancing the diameter of the coin with its thickness. To illustrate this, think of two coins of the same size but of different thicknesses. The thicker coin has more metal in it than the thinner one does and so it weighs more, even though the two coins are both the same size in diameter. Planchets were made by punching round coin blanks out of strip. The Mint controlled planchet thicknesses by adjusting the gap between the two steel rollers through which the planchet strip was passed. There was a dial on the side of the rollers that adjusted the gap spacing to the right amount for each gold denomination, from a Dollar through a Double Eagle. To make the new $4.00 denomination, the dial on the rollers was turned until it was halfway between the settings for a $3.00 and a $5.00 coin. Then, the planchet strip was fed through the rollers, which squashed it to the desired thickness.

Every Stella shows faint parallel striations on it. These can range from very noticeable to almost invisible, but careful examination will show they are on every specimen known. It used to be thought that the striations were a sign of a restrike, and that real "originals" did not have striations. This is incorrect, however, and the reason why is simple. The striations were a result of the Mint's solution to the problem of making an odd denomination coin like the $4.00 Stella. Getting the diameter right was, as we have said, easy. All that was involved was choosing one of several options already available, in this case, the $5.00 size planchet cutters. Getting the thickness exactly right was much harder. The Mint's solution was only an approximate one. The dial settings on the planchet rollers were accurate for $3.00 and $4.00 coins because the Mint had been making those coins for years. To get the right thickness for a $4.00 coin meant guessing at where the mid point should be between the settings for the $3.00 and $5.00. It seems that the Mint decided to err on the heavy weight side and every Stella planchet made was just a little thicker than it should have been. The Mint made the decision to roll out heavy planchets because it was very used to dealing with this sort of problem and had been doing so since 1795.

The striations we see on Stellas are actually adjustment marks, just like the ones we see on early U.S gold Half Eagles, for example, and they were made on the coins in the same way. After each Stella planchet was punched out of the strip the blanks were collected and taken to the weighing room, where their weights were checked. This procedure was the same for all United States gold coins. The overweight blanks were sent to the adjusting room, which was staffed by women employees. There, each blank was scraped by hand with a special file and weighed again after each filing. Each pass of the file left many thin, parallel lines behind on the blank. This was called adjusting the weight, and the filing went on until the planchet had reached the correct weight for its denomination. When the adjuster was satisfied with her work, the filed blank was sent to the coining room, where it was struck with the $4 dies and became a Stella. The lines left behind on the blank when it was filed were mostly obliterated by the force of striking the coin, but they still show on Stellas. Because the adjusting techniques were more refined and the planchet stock was better sized, adjustment marks on Stellas are not as heavy as they are on early gold.

The finished coins were sent to the congressional Committee on Coins for their approval. We know how the committee felt about the new coins. Word of them quickly spread through Washington and, as we have seen, the Mint was asked to make more 1879 Flowing Hair Stellas to satisfy demand for the beautiful and odd denomination coins. In 1880 new dies were made and a very small number of Stellas was struck, but by then, Congress had decided not to adopt the $4 denomination. Unfortunately, Kasson's idea for an international coinage never went further than the pattern stage. Congress did not approve of the idea of making an American coin to suit the needs of foreign nations, and preferred, instead, to stay with the usual denominations already in circulation. The $4.00 Stella patterns Kasson left to a later generation of collectors are a legacy that we are sure he would be proud of.

THE 1879 AND 1880 PATTERN $4.00 STELLAS

LOVELY 1879 FLOWING HAIR STELLA

(Enlarged)

Lot No. 133

(Enlarged)

133 **1879 Flowing Hair Stella. Judd 1635. Gem Brilliant Proof.** A really lovely coin. Both sides are a pleasing, pale yellow gold in color. Liberty's features on the obverse and the star on the reverse are fully frosty. The fields around Liberty and the star are bright, fully reflective, and have deep mirror brilliance with full Proof flash. The strike on both sides is sharp, with all the design details showing to their fullest. The obverse striations, seen on all Stellas, are here very minor. This is, without a doubt, one of the finest 1879 Flowing Hair Stellas we have ever handled. **Rare:** of the 425 struck we estimate that less than half of that mintage survives today and many are known holed, mounted, or otherwise damaged. The obverse shows designer Charles E. Barber's head of Liberty facing to the left, with her hair falling down behind her neck. The date is underneath. Spelled out around is the amount of gold, silver, and copper contained in the coin, along with its total weight. The reverse, by an unknown engraver, shows a large star in the center with the denomination given in three different ways. ***(SEE COLOR PLATE)***

GORGEOUS 1879 COILED HAIR STELLA

(Enlarged)

Lot No. 134

(Enlarged)

134 **1879 Coiled Hair Stella. J.1638. Gem Brilliant Proof.** A truly gorgeous specimen. Like its Flowing Hair sister, this coin is a nice, pale yellow gold in color. On the obverse, Liberty's head and her hair are lightly frosted, while the star on the back is similarly frosty. The surfaces around Liberty on the front and the star on the reverse are brightly reflective with full mirror Proof flash. Both sides were sharply struck and show all the details in the dies. The striations are trivial. Also like the preceding, this is one of the finest examples of this rarity we have ever handled. **Extremely rare:** only 10 specimens were struck in 1879 and all were made for presentation to the congressional Committee on Coins. The number that survive today cannot be known for certain, but we estimate that it is lower than the number struck. The obverse features designer George T. Morgan's bust of Liberty facing to the left, her hair coiled on top of her head. The date is underneath. Around the rim is engraved the coin's metallic content and its weight. For his Stella, Morgan copied his father's design for the 1878 pattern Half Eagle. The reverse shows a large central star with the denomination spelled out in three different ways, the national motto, and a special motto that says all glory belongs to god. ***(SEE COLOR PLATE)***

SUPERB 1880 FLOWING HAIR STELLA

Lot No. 135

(Enlarged) *(Enlarged)*

135 **1880 Flowing Hair. J.1657. Gem Brilliant Proof.** A superb, super sharp example. Both sides were struck under very high pressure and show more sharpness of detail and depth of impression than we have seen on any other of this date and type. The stars and letters around the rims on both sides are so deep they look almost like they are underneath the surface of the coin! The obverse and reverse are a pleasant, light yellow gold in color. The central devices on each side are fully frosty and the fields surrounding them are bright, fully reflective and have deep mirror flash. The obverse striations are light and almost unnoticeable. This is truly a glorious specimen and it is, beyond question, one of the finest known. **Extremely rare:** only 15 specimens are believed to have been struck. Of that number, probably about a dozen still survive but almost none of them look as nice as this one does. The obverse shows Charles E. Barber's design, with Liberty's hair flowing down behind her neck. This was the same type that was on the 1879 Flowing Hair Stella and the same device punches were used to make both the 1879 and 1880 obverse dies. The difference in design is in the date, here 1880. The reverse is the same as seen on the 1879 types, with a centrally located star with the denomination expressed three ways and two Latin mottoes, one special to the Stella and related patterns. ***(SEE COLOR PLATE)***

MAGNIFICENT 1880 COILED HAIR STELLA

Lot No. 136

(Enlarged) *(Enlarged)*

136 **1880 Coiled Hair. J.1660. Gem Brilliant Proof.** A magnificent specimen. Both sides show full, deep blazing gold color. The strike on each is full, strong, and beautifully sharp. Liberty's features on the front and the star on the back are lightly frosted and cameo-like. The fields surrounding the central devices on the obverse and reverse are fully bright, with deep mirror brilliance flash in even the tiniest place. The surfaces around the letters and design types have the watery appearance one expects to see in the finest Proof coins. The obverse striations, which are on every Stella ever made, are faint on this wonderful coin. We can say without any hesitation whatsoever that this 1880 Coiled Hair Stella is one of the finest United States Mint proof gold coins of any denomination we have ever handled. Its quality is beyond question. **Extremely rare:** only 10 specimens are believed to have been struck, all of them meant to be show to members of the congressional Committee on Coins. Today, fewer than that number survive. The obverse bears George T. Morgan's bust of Liberty facing to the left, with her hair coiled on top of her head in a neat, demure bun. Morgan liked this way of representing Liberty on his coin designs and adopted it for other patterns of the period. Around the rim is the coin's gold, silver, and copper content and its weight. The date, 1880, is below. The reverse bears a large star in the center from whence we get the name of the coin, since the Latin word for star is Stella. Around the star are two lines of inscriptions, including the name of our country, the denomination, and two different mottoes. On the star is the name of the coin, Stella, and the denomination given once again as 400 cents. ***(SEE COLOR PLATE)***

U. S. HALF EAGLES ($5.00 GOLD)

U. S. CAPPED BUST RIGHT HALF EAGLES

WELL STRUCK 1795 HALF EAGLE

Lot No. 137

137 **1795** Breen 1-A, Small Eagle. Extremely Fine. A very pleasing and problem-free example of this popular first year of issue Half Eagle. *Only 8,707 pieces were minted.* The coin was well struck and the even wear has kept the detail intact. The surfaces are remarkably smooth and retain a wholly original greenish-yellow gold coloration. There are very few marks or scratches, certainly far fewer than is usually seen at this grade level. It would not be an overstatement to call this coin Choice for the grade. This is a virtually perfect coin for the collector who desires an affordable example of the type that will always be nice to look at.

SHARPLY STRUCK 1796 HALF EAGLE

Lot No. 138

138 **1796** Br.1. About Uncirculated. This yellow-gold example presents a very pleasing "arm's length" appearance with its centering and crispness of detail. Close study under a glass shows evidence of restoration in obverse field and on Liberty's cheek. Reverse is very harmonious with one or two trivial marks.

U. S. CAPPED BUST LEFT HALF EAGLES ($5.00 GOLD)

A PAIR OF LOVELY 1812 HALF EAGLES

Lot No. 139 (Enlarged)

139 **1812** Breen 1-B. **Brilliant Uncirculated.** Here is a wonderful, sharply struck example of this popular early type. There are **no** adjustment marks, strike irregularities, or surfaces blemishes in the planchet, making this a premium example. There is a rich, deep orange and russet gold tone to the surfaces which is only seen on uncleaned and totally original coins such as this. Every detail is bold and the rims of this coin are virtually perfect. The collector looking for an outstanding example of this type at this grade level, need not look any further than this coin. ***(SEE COLOR PLATE)***

140 **1812** Br.1-B. Another. Choice About Uncirculated. Virtually Brilliant Uncirculated. Richly frosted surfaces exhibit evidence of "clashed" dies and light obverse adjustment marks. The coin is wonderfully original and in many ways is nicer than some that are fully Mint State.

U. S. CLASSIC HEAD HALF EAGLES

141 **1834** Br.II-3. **Brilliant Uncirculated,** or nearly so. Somewhat reflective fields show bit of rubbing, though there are no noteworthy contact marks.

SPLENDID 1836 HALF EAGLE

Lot No. 142

142 **1836** Second Head, Large 5. **Brilliant Uncirculated** with the look of a fully Choice example. Glorious light green-gold lustre drenches both sides of this coin. A hairline or two, but this coin is by no means "softly struck on the hair curls around the face" as Akers writes is common for the date.

HIGH GRADE 1838'D' HALF EAGLE

Lot No. 143

143 **1838'D'** Choice About Uncirculated. Just a hair's breadth away from a full Mint State designation, an extremely high grade for this Dahlonega Mint issue. The vast majority of these are in Very Fine or lower grades. Both the obverse and reverse are an attractive, rich yellow gold in color. The strike is sharp on both sides, as well, with full detail showing in Liberty's hair and in the eagle's feathers. Original mint lustre and frost can be seen in the protected areas of both sides. This is the only Dahlonega Mint date with the Classic head type.

U. S. LIBERTY HEAD HALF EAGLES

IMPORTANT 1839 HALF EAGLE

Lot No. 144

144 **1839** Choice About Uncirculated. This date is not only the first year of issue of the Liberty Head style Half Eagle, but is also a *one-year only type coin*. As such, it's importance in numismatics cannot be overstated. *The collector cannot complete a comprehensive U. S. gold coin type set without an example of this date.* Coins of this date are most often found in grades of Extremely Fine or less, but this is a scarce coin in any condition. Outstanding About Uncirculated examples such as this coin are very rare. This coin is fully struck and problem-free with appealing rich orange-gold toning. It would make a first rate addition to a high grade type collection.

145 **1840** Nearly Uncirculated. Very attractive rich yellow gold in color with light coppery toning. Struck with the Broad Mill rims described in Breen 6522 as "Very rare above EF." This example is one of the nicest we have seen in recent years.

146 **1842'C'** Large Date. Extremely Fine. Not as rare as its counterpart of the Small Date variety, but rare nonetheless in its own right. The coin has light marks and one edge bump consistent with the degree of circulation it sustained.

HIGH GRADE 1844'O' HALF EAGLE

Lot No. 147

147 **1844'O'** Choice About Uncirculated. This is an incredibly nice example of a No Motto New Orleans Mint Half Eagle due to its superior sharp strike and near perfection for the grade. This coin must have been an early strike as the detail is needle sharp throughout. Further, The surfaces are immaculate and are framed by perfect edges. The entire coin has a rich greenish-orange gold color which is totally original. The specialist will know that this coin represents rarely seen quality.

148 **1845'D'** About Uncirculated. This coin has little, if any, actual circulation. However, the surfaces are quite granular and dull, probably as a result of decades of submersion in salt water.

149 **1849'D'** About Uncirculated. More sharply struck than usually seen on this date. In fact, it is virtually 100% fully struck. The surfaces are a wonderful original muted yellow-orange gold with tinges of green. Lustre is hidden underneath the patina. There is encrustation in the letters attesting to the fact that the coin has never been cleaned. These qualities, combined with the fact that this is a better date in the series, make this a highly desirable coin for today's Dahlonega Mint collector. The coin's only detraction is a small edge ding beneath the 8 of the date.

150 **1852 Brilliant Uncirculated,** virtually in the Choice category. Subtly glowing light gold lustre deepens to red-gold at the peripheries.

151 **1854'C'** Choice Extremely Fine. This is the variety with the faint mintmark. The mintmark can easily be seen with magnification. This is a rare date in the series and is a wholly original coin with pale orange color tinged with greenish hues. There is dirt encrusted in the devices attesting to the fact that the surfaces have never been cleaned. This is always important to Southern Gold specialists as so many coins have been dipped or "buzzed" and original coins are becoming quite scarce. In addition, this coin is problem-free in every respect making it a very desirable piece.

WONDERFUL 1855'C' HALF EAGLE

Lot No. 152
(Enlarged)

152 **1855'C' Brilliant Uncirculated.** Sharply struck, using bright yellow Southern gold which has taken on a delicate sunset glow over impressive original mint brilliance. Southern gold had a higher silver and lower copper content. Hair curls around Liberty's face are particularly bold. Fields are slightly prooflike, showing only light hairlines, and fewer contact marks than normal. This offering represents one of the finest of the few extant. *Only 39,788 were struck.* The vast majority of the handful of survivors grade lower than this presently offered specimen. ***(SEE COLOR PLATE)***

153 **1857'D'** Extremely Fine, or thereabouts. Moderately scuffed, with a tiny 'X' etched in the left obverse field. Surfaces are finely granular.

154 **1872'S'** Choice Extremely Fine. A very scare date in all grades and rare in this grade or better. Over time, a coppery orange tone has settled on the surfaces giving the coin a nice original appearance.

RARE 1877 HALF EAGLE

Lot No. 155

155 **1877** Choice About Uncirculated. *An exceptionally low mintage of only 1,152 pieces* gives this coin status as one of the lowest mintage dates in the entire Half Eagle series. The surfaces of the coin are prooflike and sharply struck. There is a coppery toning about the devices which highlights the detail nicely. A good opportunity for the collector to buy a genuinely rare coin.

156 **1880 Choice Brilliant Uncirculated**, or better. Well struck. Attractive rose iridescence.

157 **1882 Choice Brilliant Uncirculated.** Full frosty lustre, a few tiny tics define this attractive Liberty coin. NGC MS63.

158 **1893 Brilliant Uncirculated.** Light yellow lustre is full and appealing.

Lot No. 159

159 **1893'CC' Brilliant Uncirculated.** This the last year of issue from the famed Carson City Mint. The coin has a frosty and brilliant lustre which is most appealing. The strike is sharp and there are no detracting marks across the surfaces. There are a number of tiny edge nicks on the obverse rim. These do not minimize the desirability of this coin.

160 **1899 Brilliant Uncirculated.** This frosty yellow-gold obverse is distinguished by the recut 99 in the date.

161 **1901 Choice Brilliant Uncirculated.** Delightful cartwheel lustre.

162 **1901/0'S' Choice Brilliant Uncirculated** or better. Fully lustrous and boldly struck but shows very subtle evidence of a past cleaning.

Lot No. 163

163 **1901'S' Choice Brilliant Uncirculated,** virtually of Gem quality. Glowing satiny lustre and excellent surfaces give this rich yellow-gold specimen plenty of eye appeal. PCGS MS64.

164 **1901'S'** Another. **Choice Brilliant Uncirculated** and nearly a Gem example. Bright yellow-gold and a sharp strike complement lovely satiny mint bloom. PCGS MS64.

165 **1902 Brilliant Uncirculated.** Bold lustre, close study shows a spot removed, a reverse edge irregularity.

166 **1907 Choice Brilliant Uncirculated.** Bright and lustrous. A few very subtle hairlines are noted.

U. S. INDIAN HALF EAGLES ($5.00 GOLD)

DESIRABLE 1908'S' HALF EAGLE

Lot No. 167

167 **1908'S' Choice Brilliant Uncirculated.** This date is especially desired by collectors due to its *very low mintage of only 82,000 pieces.* This coin is well struck with smooth coppery gold surfaces. A few light marks are noted but do not detract. The mintmark is sharp and well defined. This date is one of the most desired dates in the series and is especially in demand in this difficult to find condition.

168 **1909'D' Brilliant Uncirculated,** nearly Choice with the raised 'line' sometimes seen through the stars.

169 **1911 Choice Brilliant Uncirculated.** A pleasing example, with full mint bloom still remaining and nice, medium yellow gold color.

170 **1911** Another. Extremely Fine. Rich yellow gold color.

RARE CHOICE 1911'D' HALF EAGLE

Lot No. 171
(Enlarged)

171 **1911'D' Choice Brilliant Uncirculated.** A very rare coin in this grade. *The low mintage of 72,500 struck* meant that most circulated actively at the time and few managed to survive with their lustre and surfaces intact. This specimen is fully lustrous, with satiny frost in the feathers and on the reverse. The coin is toned in a rich, medium yellow gold color, making for a very attractive appearance. This is a coin destined for an advance connoisseur's collection. ***(SEE COLOR PLATE)***

172 **1911'S' Brilliant Uncirculated.** A high grade example with strong claims to the Choice category. Both sides of this light yellow gold piece are lustrous and attractive.

173 **1912 Choice Brilliant Uncirculated.** An exceptional strike, smooth fields and rich color give the appeal of higher grade.

174 **1912** Another. **Brilliant Uncirculated,** close to fully Choice. Even lemon-yellow lustre laves both sides.

175 **1912** A third. **Brilliant Uncirculated.** Frosty yellow-gold covers fields with minimal marks.

Lot No. 176

176 **1914 Very Choice Brilliant Uncirculated.** Akers assigns a rating of Low R-6 to this Philadelphia date, stating "in MS-64 and higher, the 1914 is certainly rare." This near Gem exhibits a vibrant frosty lustre.

Lot No. 177

177 **1914'D' Choice Brilliant Uncirculated.** A lovely coin with distinct claims to full Gem status. Both sides are fully lustrous and frosty and are a beautiful, rich orange gold in color.

Lot No. 180

180 **1800** Breen 1-A (High R-4). **Brilliant Uncirculated.** This coin's wonderfully detailed strike shows star 7 boldly repunched, star 8 too low, advanced die cracks atop LIBERT. The fully Choice reverse is free of cracks, and both sides exhibit the most vivid, luxuriant deep yellow mint frost imaginable, making this a coin of outstanding quality. ***(SEE COLOR PLATE)***

OUTSTANDING 1801 EAGLE

Lot No. 181

181 **1801** Br.2-B. **Brilliant Uncirculated.** An outstanding example of the date with claims to being Choice Brilliant Uncirculated. This coin is fully struck with no adjustment marks, wonderful greenish-yellow gold color, and superior surfaces. Further, the edges are perfect. The future owner of this coin is going to be very happy as early Eagles in such nice problem-free condition are difficult to obtain at any price.

U. S. LIBERTY HEAD EAGLES ($10.00 GOLD)

182 **1856** About Uncirculated. Much lustre, close study reveals six parallel scratches in lower left obverse field.

VERY RARE CHOICE 1879'S' EAGLE

Lot No. 183

183 **1879'S' Choice Brilliant Uncirculated.** This date is almost never found in such superlative condition. Well worn examples are all the norm; Mint State coins are very rare. As such, this **underrated** coin is truly an opportunity for the rare date gold coin specialist to acquire a lovely example.

184 **1880 Brilliant Uncirculated.** Brightly lustrous and pleasing, with mint frost in the fields, this coin has strong claims to Choice status.

HIGH GRADE 1880'O' EAGLE

U. S. INDIAN HEAD EAGLES ($10.00 GOLD)

RARE 1907 WIRE RIM EAGLE

Lot No. 195

195 **1907 Indian. Wire rim. Periods after E PLURIBUS UNUM. Choice Brilliant Uncirculated** or thereabouts from an overall standpoint. The obverse is fully Choice save for some very subtle, hard to see hairlines. The reverse is that of a near Gem coin. The surfaces have the shaded matte-like appearance that the designer, Augustus Saint Gaudens, originally intended they have. The Indian's head is sharply outlined against the satiny field. On the reverse, the eagle stands out with full detail on the frosty fields. The wire rim can be seen around considerable portions of both sides. *Only 500 are believed to have been struck,* for presentation to friends and dignitaries. The design was changed after this small mintage, removing the periods after E PLURIBUS UNUM and incorporating more of a rim in future. ***(SEE COLOR PLATE)***

196 **1907** No Periods. **Choice Brilliant Uncirculated**, or better. Sharply struck. Vivid mint lustre, with a gorgeous blend of sunset and lime green iridescence. A single tiny copper spot resides atop Miss Liberty's headdress, mentioned merely for the sake of identification. It is a remarkable representative of this important first year of issue variety without IN GOD WE TRUST.

197 **1907** No Periods. Another. **Brilliant Uncirculated,** virtually of Choice quality. Rich yellow-gold surfaces complemented by plenty of satiny mint lustre. The reverse is easily Choice or better.

198 **1908** No Motto. **Brilliant Uncirculated.** Satiny smooth surfaces have only a few scattered light hairlines, requiring magnification to see. A sunset glimmer enhances its visual appeal, justifying claims to Choice. *A mere 33,500 example of this date and type were struck.*

199 **1908** With Motto. **Brilliant Uncirculated,** with claims to Choice. Orange-peel lustre shows some bagmarks.

200 **1910'D' Choice Brilliant Uncirculated.** Although not a rare date, these Denver coins are elusive with this degree of visual appeal.

201 **1926 Choice Brilliant Uncirculated.** Assertive lemon-yellow lustre creates bold visual appeal.

202 **1932 Brilliant Uncirculated.** Smooth, assertive gold lustre adds to the appeal of a full strike.

203 **1932 Brilliant Uncirculated.** Another of boldly lustrous beauty.

204 **1932 Brilliant Uncirculated.** A third. Bagmarks appear on both lustrous sides.

205 **1932 Brilliant Uncirculated**. A fourth. Brightly lustrous with some minute contact marks.

213 **1881'S'** About Uncirculated. Naturally lustrous, with moderate contact marks.

APPEALING 1889'CC' DOUBLE EAGLE

Lot No. 214

214 **1889'CC'** Choice About Uncirculated. Natural mint lustre has a touch of sunset toning and the surfaces possess only light hairlines. Contact marks are widely scattered and trivial. This example has exceptional eye appeal, appearing much nicer than many that are Mint State. Carson City Mint Double Eagles are extremely popular keepsakes of the Old West.

215 **1890 Brilliant Uncirculated.** Frosty mint lustre on either side. Typical obverse bag abrasions. The reverse with a pair of scrapes at the lower rim. *Only 75,995 pieces were minted of this scarce date, most of which are inferior to the example offered here.* PCGS MS60.

A REMARKABLE OFFERING OF HIGH GRADE 1896 DOUBLE EAGLES

The following thirteen lots constitute an unprecedented opportunity to acquire high grade examples of this very elusive condition rarity. Hand picked by the consignor from a "virgin" hoard of nearly 100 pieces, this grouping includes several coins which, without question, fall within the condition census for this date. Although average quality Uncirculated 1896 Double Eagles are readily available, examples in the Gem range are almost never encountered. Likewise, even coins of nearly Gem quality are rarely available. We encourage prospective buyers to "strike while the iron is hot" as it is almost a certainty that a circumstance such as this will not happen again!

Lot No. 216

216 **1896 Gem Brilliant Uncirculated.** A gentle blush of rose toning complements wonderful satiny mint lustre. There is a small bagmark at Liberty's eye and temple as well as a trivial obverse rim mark at 4:30. The fields, facial features, and other devices, however, are otherwise free of all but the most trivial of imperfections. Stunning quality for this date and certain to attract considerable attention. ***(SEE COLOR PLATE)***

Lot No. 217

217 **1896 Gem Brilliant Uncirculated.** A second. A fully struck, pale orange-gold example. The obverse with prooflike reflectivity and only a few scattered light surface marks. The reverse with rich satiny mint lustre.

Again we must remind prospective bidders not to come to the false conclusion, based upon the content of this offering, that Double Eagles of this date within this grade range are readily available. They are, in fact, quite rare and should be recognized as such.

Lot No. 218

218 **1896 Gem Brilliant Uncirculated.** A third and truly outstanding specimen. An abundance of glowing mint frost accompanied by a razor-sharp strike give this coin compelling visual appeal. Other than a few minor marks at the central obverse, the surfaces are nearly flawless.

Lot No. 219

219 **1896 Gem Brilliant Uncirculated.** A fourth. This outstanding example displays splendid pale orange-gold toning with delicate rose obverse accents. The lustre and "look" of this coin is as fresh as the day on which it was minted.

Lot No. 220

220 **1896 Choice Brilliant Uncirculated.** A fifth example, just bordering on the Gem category. A hint of pink-gold toning over surfaces which are drenched in mint frost. There is a small bag abrasion at Liberty's forehead, otherwise this piece is easily a full Gem.

Lot No. 221

221 **1896 Choice Brilliant Uncirculated.** A sixth example, virtually of Gem quality. Boldly struck on either side. Another incredibly "fresh" specimen displaying gorgeous satiny mint lustre over yellow-gold surfaces.

A REMARKABLE OFFERING OF HIGH GRADE 1896 DOUBLE EAGLES—CONTINUED

Lot No. 222

222 **1896 Choice Brilliant Uncirculated.** A seventh example and a virtual Gem. There are a few light facial marks on this otherwise full Gem specimen. Boldly struck, deep yellow-gold surfaces. The obverse exhibits reflective fields contrasted against cameo devices. The reverse is dripping with rich mint frost.

Lot No. 223

Lote No. 224

223 **1896 Choice Brilliant Uncirculated.** An eighth example and virtually a Gem. There are a few well concealed obverse contact marks hidden in Liberty's hair, otherwise this coin is easily of full Gem quality. The fields and facial features are all quite smooth. Likewise, the lustre and strike are worthy of distinction.

224 **1896 Choice Brilliant Uncirculated.** A ninth example, nearly worthy of a Gem designation. A full strike and glowing cartwheel lustre combine with lovely pale orange-gold toning give this specimen compelling visual appeal.

Lot No. 225

Lot No. 226

225 **1896 Choice Brilliant Uncirculated.** A tenth example, nearly in the Gem category. The obverse displays a few scuffs at right as well as a scattering of microscopic specks. Really a premium example nonetheless, with excellent surfaces and lustre on either side.

226 **1896 Choice Brilliant Uncirculated.** An eleventh with claims to the Gem category. The obverse is somewhat prooflike and displays a faint blush of rose toning. The reverse is a frosty orange-gold.

Lot No. 227

Lot No. 228

227 **1896 Choice Brilliant Uncirculated.** A twelfth with claims to a full Gem status. A sharp, satiny orange-gold specimen with just a trace of pinkish highlights in the obverse devices.

228 **1896 Choice Brilliant Uncirculatcd** or better. A thirteenth and final example. Sharply struck on both obverse and reverse. A pale orange-gold example with rather reflective obverse fields.

229 **1896'S' Choice Brilliant Uncirculated.** Splendid deep-gold lustre shows some minute contact tics.

230 **1901 Brilliant Uncirculated.** Bold original mint brilliance.

231 **1901'S' Brilliant Uncirculated.** A fully lustrous and brightly reflective specimen that is nearly Choice in condition.

232 **1902'S' Brilliant Uncirculated.** Frosty, with a touch of rose toning. Contact marks are moderate, though it is free of hairlines or friction.

233 **1904 Gem Brilliant Uncirculated.** A razor-sharp strike, unbroken satiny mint lustre, and outstanding surface quality combine to give this coin wonderful visual appeal. Conservatively graded PCGS MS65.

234 **1904.** Another. **Choice Brilliant Uncirculated** and just a whisper away from a full Gem designation. This fully struck, delicate rose-gold example displays a pleasant satiny glow. There is a very minor planchet depression in the right obverse field, otherwise this specimen is easily a Gem. PCGS MS64.

235 **1904.** A third. **Choice Brilliant Uncirculated,** virtually a Gem example. Pale orange-gold toning over full satiny mint bloom. This sharply struck coin is conservatively graded PCGS MS64.

236 **1907 Brilliant Uncirculated,** and nearly Choice. Fields are somewhat reflective against frosted engraved features, complementing bold mint lustre.

U. S. SAINT GAUDENS DOUBLE EAGLES ($20.00 GOLD)

A PAIR OF MAGNIFICENT MCMVII HIGH RELIEF DOUBLE EAGLES

Lot No. 237

237 **1907 MCMVII High Relief, Wire Rim. Gem Brilliant Uncirculated**, if not actually slightly finer. A simply magnificent specimen of this ever popular issue. Both sides are a lovely, pale yellow gold in color. The surfaces are about as pristine as they could be. The strike is sharp, with all the columns of the Capitol Dome showing and the eagle's breast feathers sharp and clear. Many collectors consider this type struck in high relief to be the pinnacle of United States coin design. President Theodore Roosevelt certainly thought so, because he ordered them to be struck regardless of the time it took. Roosevelt knew how important coins were in the world marketplace. He knew that they were not only tools for commerce, but that they also said a lot about the country that made them. Beautiful, well made coins were spokesmen for the cultural excellence of their country. Accordingly, when Roosevelt became president he commissioned the well known sculptor Augustus Saint Gaudens to redesign the coinage along the lines of the ancient Greeks' coins, which everyone considered to be the finest ever made. Saint Gaudens designed the new $20 to be struck in very high relief, like an old Greek coin, and made Liberty look much like an ancient goddess. When the Mint tried to strike the new coins, they found that it took the press too long to be-ring up all the details in the dies. Because the Mint was angry that Roosevelt had given the job of redesigning the coinage to an outsider, it deliberately tried to sabotage the coinage of the new $20's. When President Roosevelt was told about the Mint's obstruction, he sent a personal order to the Mint demanding that the new coins be struck as their designer intended them to be. What we see, today, in the MCMVII 1907 High Relief $20 is what President Roosevelt and Saint Gaudens wanted the coins to look like. ***(SEE COLOR PLATE)***

Lot No. 238

238 **1907 MCMVII High Relief, Wire Rim. Brilliant Uncirculated** and nearly of Choice quality were it not for some subtle evidence of a past very gentle cleaning. The devices are quite sharp and the surfaces are free of any significant marks or detractions. ***(SEE COLOR PLATE)***

239 **1907** No Motto. **Brilliant Uncirculated.** Pretty golden toning. Desirable as a two-year only type without IN GOD WE TRUST.

GEM 1908 No Motto DOUBLE EAGLE

Lot No. 240

240 **1908** No Motto. **Gem Brilliant Uncirculated.** A near flawless coin and a wonderful example of the type. Both sides are a lovely pale golden yellow in color. The coin has all of its original mint lustre and sharp, unbroken cartwheels can be seen on both sides. Liberty's features are boldly visible and the eagle's feathers are sharp and separate. A couple of mostly hidden reverse tics are noted.

241 **1908** No Motto. Another. **Brilliant Uncirculated** and a Choice example were it not for an area of reverse hairlines around a partially removed small stain.

242 **1908** No Motto. An third. Choice About Uncirculated. Bold yellow gold shows a hint of orange peel surface.

CHOICE MATTE PROOF 1908 With Motto DOUBLE EAGLE

Lot No. 243

243 **1908** With Motto. **Choice Matte Proof.** Attractive, medium yellow orange gold in color unlike the olive drab described by Breen as typical of the year's Proofs. Liberty on the obverse and the eagle on the reverse both stand out against the matte surfaces with a semi-cameo like effect. Both sides show nearly undisturbed matte surfaces, with just a scattering of hairlines to be noted in the left obverse field. The edge of the rim at the left shows some unusual raised lines. *Only 101 matte Proofs were struck.* ***(SEE COLOR PLATE)***

244 **1908'D'** With Motto. **Choice Brilliant Uncirculated.** Akers calls this date R-4 in Choice. This coin is a deeply lustrous example boasting the sharpest detail.

245 **1909'S' Brilliant Uncirculated.** Soft mint frost, with a glimmer of warm sunset iridescence.

246 **1910 Choice Brilliant Uncirculated.** Bright, satiny mint frost. Contact marks are minimal, with the fields being particularly attractive.

247 **1910'D' Brilliant Uncirculated.** Lustrous and attractive. The obverse is Choice, while the reverse is nearly so.

248 **1910'S' Choice Brilliant Uncirculated,** close to the Gem category. Marvelous satin brilliance enhances a bold strike.

249 **1913 Brilliant Uncirculated,** with claims to Choice. Attractive natural mint lustre.

250 **1914'D' Choice Brilliant Uncirculated.** Satin-like, with minimal surface marks and bright orange iridescence.

251 **1923 Very Choice Brilliant Uncirculated.** Attractive pale light golden color. Smooth satiny surfaces have an eye catching rose iridescent glow.

252 **1923'D' Gem Brilliant Uncirculated.** Sharply struck. Satin-like, with virtually perfect surfaces and lovely sunset toning. This issue is well known for its exceptional visual appeal and is always a popular choice for inclusion in a gold type set.

253 **1924 Choice Brilliant Uncirculated.** Lovely full reflective gold.

254 **1925 Brilliant Uncirculated.** This coin has few surface marks, but was lightly cleaned at one time.

255 **1927 Very Choice Brilliant Uncirculated.** Lovely medium gold natural color. Pale rose hues cling to protected areas around the devices. Quite attractive.

256 **1927** Another. **Brilliant Uncirculated,** nearly of Choice quality. Better than average surfaces enhanced by pleasing satiny mint lustre.

257 **1928 Choice Brilliant Uncirculated.** Attractive "old gold" natural toning.

U. S. COMMEMORATIVE GOLD

The following wonderful set of Gold Commemoratives comes to us from the same magnificent collection that contained the Three and Four Dollar gold coins. From this information alone, the astute collector should make ample time to view this gorgeous selection.

U. S. COMMEMORATIVE GOLD DOLLARS

258 **1903 Louisiana Purchase. Jefferson.** About Uncirculated, used in jewelry. Well struck with decent surfaces of pale pinkish-orange gold. Evidence of a rim mounting removed at 12:00 on the reverse.

SUPERB 1903 McKINLEY GOLD DOLLAR

Lot No. 259

259 **1903 Louisiana Purchase. McKinley. Gem Brilliant Uncirculated.** This is a superb coin of intense appeal. The strike is very sharp, the surfaces are immaculate, and the coin retains an impeccable satiny lustre of rich orange-gold. There are a couple of small areas of russet toning out toward the obverse edge and the denticles show evidence of die crumbling particularly on the obverse. These are mentioned for the sake of the mail bidder and in no way detract from the amazing quality of this example. *This coin must certainly be among the finest known of the type* and is worthy of a strong bid.

260 **1904 Lewis & Clark. Choice Brilliant Uncirculated.** Gives the appearance of a near Gem coin. Prooflike, glistening surfaces of greenish-orange gold have superb eye appeal. Unfortunately, there are a few small areas in the obverse field which were lightly wiped leaving hairlines. Still a very pretty coin.

261 **1905 Lewis & Clark.** Extremely Fine, polished and used in jewelry. The obverse is decent and the rims are fine. The reverse appears to have been mounted.

262 **1915'S' Panama-Pacific. Choice Brilliant Uncirculated,** perhaps better. Sharply stuck and beautifully preserved. There is a coppery orange-gold toning and the surfaces exhibit very few marks of hairlines.

263 **1916 McKinley Memorial. Brilliant Uncirculated.** Sharply struck in pink gold. At first glance the coin appears to be Choice Brilliant Uncirculated. Closer examination reveals a thin diagonal line through Mckinley's cheek and some hairlines in the obverse field.

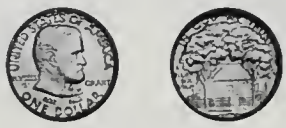
BEAUTIFUL 1917 McKINLEY GOLD DOLLAR

Lot No. 264

264 **1917 McKinley Memorial. Very Choice Brilliant Uncirculated.** *A rare coin with a mintage of only 5,000 pieces.* This beautiful coin is nearly a full Gem Brilliant Uncirculated due to it's rich lustre of yellow and orange gold and superb strike. Only a few light hairline slide marks at the obverse high points limit the grade. These are unobtrusive and barely visible except under high magnification. This coin is so appealing we would not be surprised to see it realize a premium price for the grade.

265 **1922 Grant. With Star. Very Choice Brilliant Uncirculated.** *Mintage of 5,016.* A rare and popular issue. The coin is very near the Gem category due to is lovely surfaces which are covered with a yellow-gold satiny lustre. There are a couple of areas of light russet toning on either side which are barely noticeable. Would make a wonderful addition to a high quality collection.

NEAR-GEM 1922 GRANT NO STAR GOLD DOLLAR



Lot No. 266

266 **1922 Grant. No Star. Very Choice Brilliant Uncirculated.** *Mintage of 5,000.* This is a fully frosted and spot free near Gem quality example of the type. The surfaces are very clean and have mellowed into a satisfying golden-orange tone. A couple of tiny pin pricks and a small edge nick on the rim are all that limit the grade. These distractions are insignificant compared to the overall quality of this example.

267 **1922 Grant. No Star.** Another. **Choice Brilliant Uncirculated.** With it low mintage of only 5,000 pieces, this is a rare and desired coin. Lemon-yellow frosty surfaces have a hint of golden lustre at the edges. There are no copper spots or surface blemishes whatever, which is a premium for this type.

U. S. COMMEMORATIVE QUARTER EAGLES

268 **1915'S' Panama-Pacific.** About Uncirculated. *Mintage of 6,749.* A rare coin which has seen honest, even wear. The surfaces are a mellow coppery-orange gold and there is quite a bit of lustre remaining beneath the toning. This coin is a nice problem-free example of this popular type coin and would fit in well in a high grade set.

269 **1926 Sesquicentennial. Choice Brilliant Uncirculated.** A better than average strike and fully lustrous surfaces make this a superior example of this issue.

270 **1926 Sesquicentennial.** Another. About Uncirculated and Choice. Rub evident on the high points, but the surfaces have an outstanding rich orange-gold lustre and patina.

ADDITIONAL U. S. COMMEMORATIVE GOLD

CHOICE LEWIS & CLARK GOLD DOLLARS

271 **1904 Lewis and Clark. Choice Brilliant Uncirculated,** nearly a Gem specimen. Full satiny mint bloom over rich yellow-gold surfaces. This very scarce issue is seldom seen with this degree of eye appeal.

Lot No. 272

272 **1905 Lewis & Clark. Choice Brilliant Uncirculated.** Attractive mint frost. There are no detracting marks, merely a few light hairlines.

TERRITORIAL GOLD COINS

ATTRACTIVE C. BECHTLER HALF EAGLE

(Enlarged)

Lot No. 273

(Enlarged)

273 **1834 C. Bechtler. $5.00.** K.17(R-5). Rutherford. 140 gr., 20 carats. Plain edge. Extremely Fine. This is one of the pioneer gold coins which came from our Eastern gold strikes in North Carolina, not from our Western States. This coin was produced in the years 1834-1837. *It is dated August 1, 1834 because Congress reduced the weight of U. S. Gold Coins on this date.* This was to show that the weight of these coins conformed to the new standard. This coin has its original yellow-green patina with darker russet highlighting the devices. There is a striking weakness in the LER of BECHTLER and a portion of the corresponding reverse. The rest of the coin is well struck. *Kagin estimates that less than 75 pieces exist in all grades.* NGC EF40.

SHARPLY STRUCK NGN HALF EAGLE

(Enlarged)

Lot No. 274

(Enlarged)

274 **1849 Norris, Gregg, & Norris. $5.00.** K.4(R-4). Period after ALLOY. Reeded Edge. Choice About Uncirculated. This coin is an outstanding example of this rare California territorial gold coin issue. NG&N is the first of the major private coiners that issued specie from the California gold strikes. Few examples extant are as sharply struck as this coin. There is a bold 5 in the shield and the rest of the strike is similarly sharp. The surfaces are original and uncleaned and boast superb greenish-gold color with tinges of orange. There is a small struck through area at the reverse edge which blends in with the rest of the design. ***(SEE COLOR PLATE)***

RARE 1851 LETTERED EDGE USAOG $50.00 SLUG

Lot No. 275

275 **1851 United States Assay Office of Gold $50.00 Slug. 880 THOUS. Lettered Edge. Breen 7704.** Choice Extremely Fine. A handsome example of this **rare,** one-year issue. The issue of 1851 is the classic California gold slug, with its high, rounded raised rims and sunburst style engine turned reverse design. The edge is lettered AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA 1851. Each of these words was hand punched on one of the eight sides of these octagonal slugs (except the words OF GOLD, which shared a side). Augustus Humbert was a New York City watch maker who was appointed to be the official assayer for the U.S. government in San Francisco. His job was to accept gold from miners and bankers, refine and assay it into standard fineness, and make $50.00 slugs out of it. The Federal government agreed to accept these slugs as payment for taxes and customs dues, and local bankers were happy to have a semi-official coinage, even if it was in big denomination slugs like $50's. Accordingly, Humbert's venture was a success at first and his coins were universally accepted. Things changed later on, but the issues of 1851 were well received because they filled an urgent need. ***(SEE COLOR PLATE)***

RARE 1852 USAOG $50.00 SLUG

Lot No. 276

276 **1852 United States Assay Office of Gold $50.00 Slug. 887 THOUS. Reeded Edge. Br.7709.** Choice Extremely Fine. A very attractive example of a **rare**, one-year issue. Both sides are nicely toned in rich yellow gold with some coppery overtones. On the obverse, the eagle's breast feathers are sharp and vertical lines can be seen in the Union shield. On the reverse, the engine turned ornamentation is clear, sharp, and most of the lines are separated. The piece is notably free from the heavy edge and rim dents these big, heavy slugs picked up over the years. Many collectors believe that the issues of the USAOG should be considered regular federal coins since they were made with federal approval and were meant to be an officially sanctioned coinage substitute. ***(SEE COLOR PLATE)***

MAGNIFICENT 1855 WASS, MOLITOR $50.00

Lot No. 277

277 **1855 Wass, Molitor $50.00. Br.7930. About Uncirculated.** A lovely, lustrous specimen of this huge, heavy gold coin, which may have once been in a prong mounting. Both sides have the light, pale yellow gold color characteristic of refined California gold. While most of the native silver had been removed from the gold, enough remained to give Wass, Molitor's coins a pale look not unlike that seen on earlier California gold coins and even some of Christoph Bechtler's issues. The obverse of this heavy gold issue shows a small head of Liberty facing to the left. She wears a coronet on her head and was designed to resemble the obverse type of the federal issue $20.00 gold coins. There are 13 stars around the rim, and the date, 1855, is underneath Liberty's head. The reverse has the denomination in the center inside a wreath. At the top is inscribed SAN FRANCISCO CALIFORNIA while below is WASS MOLITOR & Co. Above the 50 in the denomination is the coin's gold fineness, 900 THOUS, meaning 90% gold, or in other words, the federal standard for gold coins. Most of these that survive are badly nicked or dinged, as Breen noted. This specimen is remarkable for being so free from annoying little marks. A **rare** coin. How many Wass, Molitor $50's survive is a matter of debate. Breen thought there were probably fewer than 70 pieces in all, while Jerry Kimmel once recorded exactly 54. Whatever the real number may be, Wass, Molitor $50's are not offered for sale very often, so this is an important opportunity to acquire a high grade specimen. ***(SEE COLOR PLATE)***

S.C. Wass and Agoston Molitor were both refugees from Hungary. They fled from their homeland following the revolution of 1848, because they both had been named as leaders of the resistance to tyranny. They independently emigrated to America and settled in San Francisco, where they joined forces and opened an assaying business in 1851. The gold coins they made, $5's and $10's dated 1852, were noted for their good weight and gold content, and they soon became the standard of excellence in the San Francisco marketplace. When the U.S. Assay Office closed in 1853 and the San Francisco Mint delayed its opening, the citizens of San Francisco prevailed upon Wass and Molitor to issue coins again, Accordingly, in 1855 the firm struck $10's, $20's, and $50's. As soon as the Mint re-opened in 1855, the firm of Wass, Molitor closed its doors. Molitor went into the assaying business on his own and was quite successful.

HISTORIC E.G. FECIT CONTINENTAL DOLLAR

Lot No. 289

289 **1776 Continental Dollar.** CURRENCY, E.G. FECIT. Newman 3-D, Hodder 3-B. Choice Extremely Fine. Pewter. 257.7 grains. A sharp strike provides bold facial features on the radiant sun and sundial. This reverse shows an early state of the die break through the upper links, GEORGIA, N.HAMPS. and MASSACHS. Obverse shows some deep toning with a dark deposit on 1 and C, the reverse is largely silver with a planchet depression at 10:00.

Researchers have long debated the origin of this enigmatic coinage, which exists in several varieties in Silver, Brass and Pewter. One theory holds that the Silver pieces were intended as Dollars, the Brass as Cents, but what value the intended value of the Pewter specimens was is not known today. The signature "E.G." is generally believed to be that of Elisha Gallaudet, engraver of the Continental Currency notes bearing the sundial and chain-link devices.

U. S. CLASSIC HEAD HALF CENTS

Lot No. 319

319 **1809** Br.2. Good-6. Dark olive brown in color. Some minor rim tics. Major devices clear and legible. **A rare variety,** rated High Rarity-6 by Breen in his Encyclopedia in 1983, today considered **Rarity-6**. This variety never comes in high grade and Good or Very Good is about the best most collectors can hope for. Breen's old CC went no higher than an EF, for instance.

Lot No. 320

320 **1809** Br.6. **Mint State-60.** Deep tobacco brown in color. Surfaces clear and hard. Both sides struck softly at the left, as usual on the variety, but the centers very sharp.

OUTSTANDING 1826 B.1 HALF CENT

The Cohen and Breen Plate Coin

Lot No. 323

323 **1826** B.1. **Mint State-64,** brown. An outstanding specimen, with satiny brown and pale red color and surfaces. Full and unbroken cartwheel lustre on both sides. Sharply struck, showing all the die file marks of State IV of the dies to the right of the date. An important specimen which was once the **Cohen plate coin** (2nd edition) and is now the **Breen plate coin** for Die State IV.

324 **1828** Br.3. 12 Stars. **Mint State-60.** Here is a brown example with plentiful red around the reliefs. This obverse presents the anomalous 12 stars along with incuse reversed L and upright of N on cheek, presumably from die clash. This is a very high quality specimen of an important Classic Head variety.

MINT STATE 1829 HALF CENT

Lot No. 325

325 **1829** B.1. **Mint State-65,** brown. Rich olive and dark gold in color. Immaculate fields, showing full lustre. Very sharply struck. A lovely coin, far nicer than almost every other one we have seen in recent years, and a near perfect choice for the type. NGC MS65BN.

326 **1834** Br.1. **Mint State-64.** Full mint red shows the first traces of deeper toning on this virtually immaculate example of this early die state.

327 **1834** Br.1. About Uncirculated-55; **1853** Br.1. Extremely Fine-45; **Large Cent, 1817** N.11. Fine-15/Very Fine-20. Appealing examples of these major types. **3** pieces.

The Garrett Specimen

Lot No. 328
(Enlarged)

328 **1844** Br.1, G.1 (R-6). **Proof-60.** Large Berries reverse testifies to original Proof status. Deep saddle brown surfaces show some field mark from careless handling long ago. The Garrett collection cataloguer noted, "The piece was either kept *very* carelessly in a cabinet, or more likely was 'spent' and saw a brief career in circulation..." Olive-brown and boldly reflective.***(SEE COLOR PLATE)***

Ex Garrett Collection (Bowers & Ruddy Galleries, November 1979, lot 37).

Lot No. 329

329 **1853** Br.1. **Mint State-64**, red and brown. An amazing Half cent, with flaming red color on both sides. The super sharp strike is complemented by blazing cartwheel lustre. PCGS MS64RB.

U. S. LARGE CENTS

U. S. FLOWING HAIR, CHAIN REVERSE CENTS

CLASSIC CHAIN AMERI. CENT

Lot No. 332

332 **1793** Sheldon 1 (CQR R-5). Wide Date, Chain AMERI. Fine-12 or thereabouts. Light tan, obverse has an ancient toned-over scratch and a few contact marks. Reserve is quite sharp with full legend, nearly full CENT and areas of deeper patination. An old edge bruise can be found over U.

HIGH GRADE SHELDON 3 LARGE CENT

Lovely glossy smooth medium brown, bold die clash appears before Liberty's nose and chin. A full strike results in clear legends and devices on this amazingly high quality example of an historic date and type. ***(SEE COLOR PLATE)***

Lot No. 334

334 **1793** S.3 (R-3). Chain, AMERICA. Another. Very Good-10, close to Fine. Another pleasing example, displaying very appealing deep glossy saddle brown with a faint edge bruise right of date. Legends are full on both sides, but the reverse is particularly sharp.

Lot No. 335

335 **1793** S.4 (R-4). Chain AMERICA. Fine-12/ Fine-15. An exceptionally high quality planchet, problem-free wear appropriate to this define this very satisfying example of a key type. All legends and devices are sharp and the overall appeal of this coin is undeniable.

U. S. LIBERTY CAP LARGE CENTS

CLASSIC 1794 STARRED REVERSE CENT

Lot No. 336

336 **1794** S.48 (High R-6). Starred Reverse. Fine-15. This great rarity features a circle of 94 tiny stars around the reverse border. Deep brown, lightly porous fields contrast with light tan reliefs. The reverse shows an edge bruise and several corrosion spots away from the stars but this is one of the finer examples of this famous sub-type available to today's collectors.

This distinctive if mysterious variety was first publicized by A.J. Gilbert before 1850. As the late Walter Breen wrote, "most survivors are much worn." Numismatic historiographer Pete Smith wrote a major monograph on this variety some years ago but the exact purpose for this design modification is still not certain.

Lot No. 337

337 **1794** S.50. Very Good-8/Fine-12. Deep brown color, some light obverse pinscratches. Soft at upper right on the reverse but otherwise all major design details are fully visible. A very scarce variety.

Lot No. 337

338 **1794** S.56. Very Fine-20. The "Office Boy" reverse variety. Golden brown color on both sides. Several obverse flaws, mostly small save for on the Cap. Blundered edge variety, the denomination there reading ONE HUNDRED DOLLAR thereby raising the value of the coin by 1 million percent!

Ex Anderson-Dupont Sale (Stack's, September 1954, lot 80A).

FASCINATING TRIPLE-STRUCK 1795 CENT

Lot No. 339

339 **1795** S.78. Plain Edge. Fine-15. Reverse shows ONE CENT centrally placed. This light brown coin was triple struck on an overweight 11.94 gram planchet and shows three bold profiles on Liberty and cap. Legends are fragmentary as a result of the strike but the overall visual quality is highly pleasing. The coin is undoubtedly unique in this form.

U. S. DRAPED BUST LARGE CENTS

Lot No. 340

340 **1796** S.103 (High R-4). LIHERTY. Fine-15, sharpness of Very Fine. Pleasing deep brown covers both sides, a wealth of detail adds to the coin's outstanding appeal.

341 **1796** S.106. Sharpness of Very Fine but very pitted on both sides. Still, one of the scarcer varieties.

Lot No. 342

342 **1798** S.166. Sharpness of Extremely Fine-40. Deep brown verging on black. Well struck, with considerable design detail visible in the leaves and Liberty's hair strands. Porous surfaces.

343 **1800** S.207. Extremely Fine-45, sharpness of About Uncirculated. This bold variety presents a triangular rim break under second 0 in reverse fraction. Uniform medium brown, this is a glossy coin of remarkable beauty.

344 **1802** S.242. Extremely Fine-40. Deep brown with some gray and red overtones. Both surfaces quite granular, particularly behind Liberty's head. Early obverse state.

345 **1803** S.243. No Stems. Extremely Fine-45. Dark glossy brown with advanced rim breaks at upper obverse.

346 **1803** S.245. Extremely Fine-40. Small date, Small Fraction. Brown and black in color, evenly distributed on both sides. Surfaces appear granular under magnification but smooth and somewhat glossy to the unaided eye. Rim irregularity above LIB.

347 **1803** S.253. Very Fine-25. Close Date. Medium brown color with traces of pale blue. Some light scratches.

348 **1803** S.265. Sharpness of About Uncirculated-50. Large Date and Fraction. Deep brown color evenly covering both sides. The surfaces are uniformly granular with an interesting, "matte" appearance. Struck from the broken state of the reverse die.

U. S. CLASSIC HEAD LARGE CENTS

LOVELY 1809 LARGE CENT

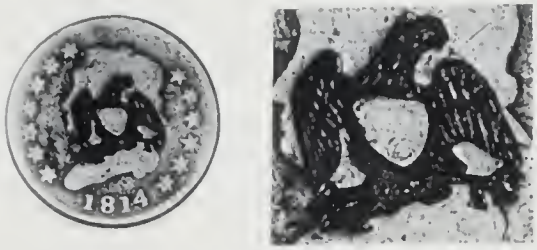
Lot No. 349

349 **1809** S.280. Extremely Fine-45, virtually About Uncirculated-50. A simply wonderful example of this **Rare** date. The chestnut brown surfaces are incredibly smooth for a coin of this type. There are a few small areas of light deposits hidden in the reverse and a small pinprick in the neck. These in no way detract from the overall beauty and desirability of this remarkable coin.

350 **1811** S.287. Very Fine-20. Normal Date. Dark brown and gray, the colors typical of the date. Both sides lightly granular.

Lot No. 351

351 **1812** S.289. Very Fine-25/Extremely Fine-40. Large Date. Glossy dark brown. Some light scratches on both sides.



Lot No. 352

352 **1814** S.295. Very Good-8. Plain 4. Deep brown. Counterstamped in the center of the obverse with a large displayed eagle of the federal gold style as designed by Kneass, without the Union shield. Apparently unlisted in Brunk.

Lot No. 353

353 **1814** S.295. Good-6. Plain 4. Counterstamped in the lower center of the obverse in a small oval with a small displayed eagle of the older federal gold style as designed by Scot. Apparently unlisted by Brunk.

355 **1821** N.2. Extremely Fine-40. Bold inner circle on obverse, reverse legend is far from denticles. Medium glossy brown, a scarce date of the Matron Head series.

Lot No. 356

356 **1823** N.2. Extremely Fine-40. Perfect Date. Deep red-brown.

357 **1833** N.2. **Mint State-62.** Curved even date, pleasing light glossy tan-brown distinguish this piece.

359 **1853** N.6. **Mint State-64.** Wonderfully smooth fields, meticulous devices sport a glossy medium brown of high visual appeal.

360 **1857** N.1. **Mint State-64,** red and brown. Large Date. Full sharpness of detail. Mint color fading to gold. Some areas of staining.

U. S. SMALL CENTS

U. S. FLYING EAGLE CENTS

CHOICE 1856 FLYING EAGLE CENT

Lot No. 361
(Enlarged)

361 **1856 Choice Brilliant Proof.** A glorious specimen of the first year the new, Flying Eagle type, was struck. Both sides of this light gold and brown specimen are fully reflective, with Proof flash in the fields and protected areas. The eagle on the obverse and designer Longacre's wreath on the reverse stand out against the fields with a definite cameo-like appearance. The strike was sharp on both sides, and the eagle's breast feathers are defined and bold and the cotton bolls show inner details, as well. Some minor and not at all annoying flecks are noted. The 1856 date was struck in Proof to show to members of the congressional Committee on Coinage what the new Cent would look like. Members so liked the new coin that they spread word of it around Washington. Bowing to public acclaim, the Mint struck between 1,000 and 2,000 specimens (no one is sure exactly) for distribution to V.I.P.'s and for sale to the handful of collectors active at this early time in the hobby's history. Apparently, a number of specimens was not distributed this way, for some were released into circulation during the Civil War years. The 1856 Flying Eagle Cent may have been struck as a pattern but it has become accepted by collectors as part of the regular issue of the type. ***(SEE COLOR PLATE)***

GEM PROOF 1857 FLYING EAGLE CENT

Lot No. 362
(Enlarged)

362 **1857 Gem Brilliant Proof.** An outstanding example of the first year of regular issue of the new Cent type. Both sides of this lovely example are cameo-like. The fields have full, deep mirror proof flash. The strike is sharp and all the design details can be seen to their fullest. According to the Guide Book, 485 Proofs were struck. Snow puts the number much lower, at only 50. Breen did not venture a guess, writing only that he knew of about a dozen. No matter what the actual mintage, it is doubtful that more than a handful can compete with the overall beauty of this little jewel. ***(SEE COLOR PLATE)***

U. S. INDIAN HEAD CENTS

Lot No. 364

364 **1860 Choice Brilliant Proof.** Rounded bust point. The sharpness of strike, squareness of edge, and the degree of reflectivity lead us to believe that this is a Proof rather than a high grade business strike. *Only about 50 Proofs of this variety still survive.*

Lot No. 374
(Enlarged)

374 **1877 Brilliant Proof.** Fully red color on bright and flashy surfaces. Sharp strike, as expected, with complete detail showing in the designs on both sides. Some light spotting is noted. *Only about 900 were struck* in this key date. ***(SEE COLOR PLATE)***

378 **1885 Brilliant Proof**. Medium to deep rose recoloration, but still attractive over hard mirrored surfaces.

379 **1888 Choice Brilliant Proof.** Glorious ruddy red covers both sides of this near Gem.

380 **1889, 1891, 1892, 1896, 1901, 1903 Brilliant Uncirculated.** Subdued to brighter lustre. A degree of cleaning or retoning ascribed to all, but still a pleasing group. 6 pieces.

381 **1890, 1894, 1897 Choice to Very Choice Brilliant Uncirculated.** The first and third with rose toning. A handsome trio. 3 pieces.

383 **1894 Very Choice Brilliant Uncirculated.** Deep rose and mauve toning accentuate this near **Gem.**

384 **1895 Gem Brilliant Uncirculated.** Virtually full mint red, showing just a hint of brown. NGC MS65 RB.

385 **1897, 1898, 1899 Choice Brilliant Uncirculated.** The last displaying a blush of light brown on portions of the obverse. 3 pieces.

386 **1900, 1904, 1905 Choice Brilliant Uncirculated** or better. Varying degrees of mint color from bright salmon to mauve and red. 3 pieces.

420 **1866** Extremely Fine/About Uncirculated; **Silver 3 Cents. 1854** Choice Very Fine; **Nickel 3 Cents. 1868 Brilliant Uncirculated; Capped Bust Half Dimes. 1832** Valentine 3. Extremely Fine/ About Uncirculated. Aeceptable examples of obsolete denominations. **4** pieces.

421 **1867 Doubled Obverse Dic.** Choice About Uncirculated, nearly Mint State. Breen 2392. Light brown with traces of faded mint eolor around the peripheries.

U. S. THREE CENTS (SILVER)

The following set of Trimes comes to us from the same wonderful collection that gave us the Lincoln Cent Set offered earlier in this sale. Close examination is suggested as many of the coins have been off the market since the middle of this century.

422 **1851, 1851'O'. Brilliant Uncirculated** and Extremely Fine respectively. Both showing signs of having sustained a past uniform cleaning long ago. **2** pieces.

423 **1852** A strong About Uncirculated example. Pale toning over frosty mint lustre; **1855** Choice Very Fine. A couple of minor hairline scratches, otherwise evenly worn. **2** pieces.

424 **1853 Choice Brilliant Uncirculated.** Pale golden toning over unbroken satiny mint lustre. Well struck at the centers with only a hint of weakness at the peripheries.

A SPLENDID 1854 THREE CENT SILVER

Lot No. 425

425 **1854 Gem Brilliant Uncirculated.** A delicate blush of olive and golden iridescence is complemented by an unusually bold strike. The obverse is fully struck throughout as is nearly all of the reverse. Quality such as this is rarely encountered on Type II Three Cent Silver pieces!

426 **1856, 1860.** Both grading Choice About Uncirculated and nearly worthy of a full mint state designation. The former displays russet toning with a small hidden scratch at the central reverse. The latter is toned a rich russet-gold with iridescent rose and lilac highlights. **2** pieces.

427 **1857 Choice Brilliant Uncirculated** with claims to the Gem category. Splashes of lavender, gold, and mauve iridescence complemented by rich satiny underlying mint lustre. The visual appeal of this coin is truly outstanding!

GEM 1858 THREE CENT SILVER

Lot No. 428
(Enlarged)

428 **1858 Gem Brilliant Uncirculated.** Incredibly vibrant underlying mint lustre awash in shades of violet and mauve iridescence. The overall strike is well above average, exhibiting hold central detail on either side. An artist could not have painted a prettier picture of a Three Cent Silver piece! ***(SEE COLOR PLATE)***

429 **1859 Brilliant Uncirculated** with claims to a Choice designation. Lovely gold, emerald, and lilac peripheral iridescence.

430 **1861** About Uncirculated. Gently cleaned many years ago, now with pleasing iridescent russet-gold toning; **1862 Brilliant Uncirculated.** Toned a very deep lilac-gray with rose iridescence over muted satiny lustre. **2** pieces.

431 **1863 Choice Brilliant Proof** or thereabouts. Needle-sharp devices are contrasted against full mirrored fields. The peripheries with delicate olive-gold iridescence. *One of only 460 proofs struck of this issue.*

432 **1864** Extremely Fine or better in terms of detail with rather heavy die clashing evident in the obverse field. The surfaces on either side have been polished long ago and the coin has since acquired russet-gold peripheral iridescence. *Only 12,000 business strikes were coined of this date.*

433 **1865** About Uncirculated and exhibiting noticeable die clashing on either side. The date with traces of recutting. Russet and iridescent peripheral toning partially conceals signs of a past gentle cleaning. *Quite scarce with a business strike mintage of only 8,000 pieces.*

434 **1866 Brilliant Proof,** virtually a Choice specimen. The reverse is fully Choice. Mauve, gold, and lilac peripheral iridescence over sharp, mirrored fields. *One of 725 proofs coined of this date.*

435 **1867 Brilliant Proof.** Light mauve-gold iridescence at the obverse periphery. Examination of the surfaces under magnification reveal a number of tiny marks and scuffs. *A mere 625 proofs and 4,000 business strikes of this date were produced.*

436 **1868 Brilliant Proof,** nearly of Choice quality. Olive-russet obverse peripheral toning over sharp, reflective surfaces. *Of the 4,100 pieces struck of this date, only 600 were proofs.*

Lot No. 437

437 **1869 Choice Brilliant Proof** with claims to the Gem category. Toned a satisfying pale violet on either side. Dazzling fields contrasted against razor-sharp cameo devices. *A total of 600 proofs are reported to have been struck of this date.*

438 **1870 Brilliant Proof.** The obverse exhibiting muted reflectivity beneath very deep sea-green and olive-gold toning. The reverse is easily Choice or better with excellent color and eye appeal. *A total of 4,000 coins were minted of this date, of which 1000 pieces were proofs.*

439 **1871** In all likelihood, a mishandled **Proof.** Noticeably polished long ago and now displaying iridescent peripheries. Although we are describing this coin as a proof, we do leave open the possibility that it could be a business strike as the original surfaces have, for the most part, been concealed. *One of only 4,360 total coins struck of this date.*

440 **1872 Brilliant Proof.** Gently polished in the distant past and now acquiring pleasing golden and sea-green iridescence at the peripheries. *The total quantity minted of this date is a mere 1,950, of which only 950 are proofs.*

441 **1873 Brilliant Proof.** Fully struck, glassy fields reveal evidence of an old gentle cleaning which does not remove from this coin's initial visual impression. Toned a handsome iridescent russet-mauve on either side. *A very scarce proof only date with a total mintage of just 600 pieces.*

ADDITIONAL U. S. THREE CENTS (SILVER)

442 **1852 Choice to Gem Brilliant Uncirculated.** Splendid smooth silver-white.

443 **1854 Very Choice Brilliant Uncirculated.** Light die clash, silver-white surfaces dramatize this lovely near gem. NGC MS64.

444 **1855 Brilliant Uncirculated.** Better struck at the centers than many, though there is a bit of peripheral weakness apparent at the stars and the tops of some of the obverse lettering. Attractive light toning. This is the desirable Type 2 obverse, with three lines defining the star. It is the scarcest type of the series, as such.

445 **1862 Brilliant Uncirculated.** Appealing autumn-leaf gold, green and steel.

446 **1871 Choice Brilliant Uncirculated.** Reflective fields beneath gold and iridescent toning. The uppermost obverse star point is weakly struck as is the corresponding area on the reverse. This might possibly have been a poorly made Proof.

Lot No. 447

447 **1873.** Closed 3. **Gem Brilliant Proof.** Glass-mirror fields reflect russet and old gold coalescing around the devices. Meticulously struck, *one of only 600 pieces* comprising this Proof-only date.

448 **1873.** Another. **Choice Brilliant Proof**, and nearly Gem. Sparkling rose and sea-green toning covers blazing mirror-like fields, accenting heavily frosted devices. It is a gorgeous example of this key date Proof-only trime.

U. S. THREE CENTS (NICKEL)

449 **1865 Brilliant Uncirculated.** Light touch of red-gold, sharp strike enrich this coin; **1866 Brilliant Uncirculated.** A subdued silver glow suffuses pale gold; **1867 Brilliant Uncirculated.** Somewhat frosty silver-gray surfaces show bold die clashing. 3 pieces.

450 **1875 Choice Brilliant Uncirculated.** Silvery frost covers smooth surfaces.

Lot No. 451

451 **1883 Gem Brilliant Proof.** Superb color and surfaces. Essentially retaining full mint bloom, there is a hint of pretty rose toning on the frosted portrait of Miss Liberty, enhancing the eye appeal of this desirable scarce date.

452 **1884 Brilliant Uncirculated.** Light gray natural color. Fleck-free surfaces are satin-like, as opposed to mirror-like, typical of this date. It is a nice example of one of the lower mintage dates of the series, showing only scattered light hairlines.

U. S. SHIELD NICKELS

HANDSOME GEM 1866 RAYS NICKEL

Lot No. 453

453 **1866** Rays. **Gem Brilliant Uncirculated.** A meticulous strike boasts full star centrils, lettering and stripe lines with just a hint of rosy toning. NGC MS65.

454 **1866** Rays. Another. **Brilliant Uncirculated.** Pale golden toning on both sides. Some light flecks.

455 **1866** Rays. About Uncirculated. Softly struck. Variety with date numerals slanting up to right progressively higher. Struck from a severely broken set of dies; **1867** Nearly Uncirculated. Polished. 2 pieces.

456 **1866** Rays. **Brilliant Uncirculated; 1883** Liberty. No Cents. **Very Choice Brilliant Uncirculated; 1913** Buffalo, Type I. **Choice Brilliant Uncirculated.** A concise, high quality trio of basic types. 3 pieces.

Lot No. 457

457 **1867** No Rays. **Gem Brilliant Proof.** Glorious silver mirror and frosted devices, full centrils on stars testify to a needle-sharp strike.

458 **1867** No Rays. **Choice Brilliant Uncirculated**, and a borderline Gem. Mostly lustrous, with a touch of pale golden color. Pleasing surfaces have minimal marks and only scattered microscopic flecks which require magnification to see. There is a curious reverse rim cud at 12:00, mentioned for the sake of identification.

459 **1871 Brilliant Proof**, fleck-free and virtually Choice. Satin-like surfaces have a pretty sunset glimmer.

U. S. LIBERTY HEAD NICKELS

460 **1883** No CENTS. **Brilliant Proof,** close to the Choice category. Silver mirror fields, a minute freckle on neck.

461 **1883** No CENTS. **Choice Brilliant Uncirculated** with claims to Gem. A fascinating diagonal die crack spans left obverse field; **1883** With CENTS. **Choice Brilliant Uncirculated** or virtually so, with a few hairlines on unusually prooflike fields. 2 pieces.

462 **1883** No CENTS. **Choice Brilliant Uncirculated; 1889 Brilliant Uncirculated.** Bold lustre, some light gold. **2** pieces.

463 **1883** With CENTS. **Very Choice Brilliant Proof.** A glittering near Gem with golden toning.

464 **1883** With CENTS. Reeded Edge. Very Fine. This coin is a fascinating anomaly. Many No CENTS Nickels were reeded outside the Mint for gilding and circulation as $5 Gold pieces. Such treatment of a With CENTS coin would seen pointless, but the reeding is of remarkably high quality, suggesting use of a broach.

465 **1884 Brilliant Proof.** Bold mirror fields, two tiny frosty patches can be found in obverse field.

Ex Stanislaw Herstal Collection (American Auction Association, February 1974, lot 65).

466 **1889 Very Choice Brilliant Proof,** close to the Gem category. Splendid vibrant deep rose amplifies this coin's beauty.

467 **1890 Brilliant Proof.** Glittering silver mirror fields show a trace of pink.

Ex Stanislaw Herstal Collection (American Auction Association, February 1974, lot 71).

468 **1892 Gem Brilliant Proof.** Pervasive light red-gold adds dimension to flashing mirror fields.

GEM 1903 NICKEL

Lot No. 469

469 **1903 Gem Brilliant Uncirculated.** Glowing pale red overlies frosty silver.

470 **1909 Gem Brilliant Uncirculated.** Full cartwheel lustre shows a sheen of light gold.

OUTSTANDING 1919'S' NICKEL

Lot No. 489

489 **1919'S' Very Choice Brilliant Uncirculated.** Far better struck than most. There is a tiny planchet lamination on the Indian's cheek, otherwise this lovely golden-violet toned jewel would be a Gem. It is truly an outstanding example.

490 **1920'D' Choice Brilliant Uncirculated.** Strictly choice, in spite of a rather poor strike. Sunset toned surfaces are mark-free.

Lot No. 491

491 **1920'S' Very Choice Brilliant Uncirculated**, despite some minor reverse spots. Excellent satin-like mint lustre. Better struck than most.

492 **1921** and **1923 Very Choice Brilliant Uncirculated.** Both have pleasing mint lustre. **2** pieces.

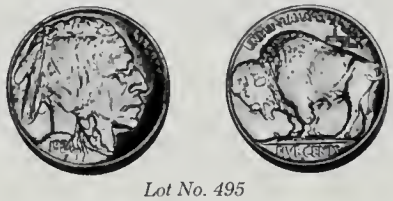
WONDERFUL 1924'D' NICKEL



Lot No. 495

495 **1924'D' Very Choice Brilliant Uncirculated.** Bright silvery natural mint lustre. Virtually free of marks and flecks. This example represents a wonderful opportunity to purchase a borderline gem example, a coin kept from the higher classification due merely to some lack of detail atop the buffalo's head.

OUTSTANDING 1924'S' BUFFALO NICKEL

Lot No. 496
(Enlarged)

496 **1924'S' Very Choice Brilliant Uncirculated.** Here is a sharply struck borderline gem example of this key condition rarity San Francisco Mint issue. SCARCE 1800 HALF DIME

Lot No. 541
(Enlarged)

541 **1800** Valentine 1A. About Uncirculated. Lustrous, although lightly cleaned at one time. Well struck overall. This distinctive variety has a die break at the rim below 00 of the date, extending into the drapery of Miss Liberty. Much of the reeded edge has been tooled smooth, or nearly so. Still, it is a nice appearing example and a worthy high grade representative of this important and scarce Heraldic Eagle reverse type.

BEAUTIFUL 1801 HALF DIME

Lot No. 542
(Enlarged)

542 **1801** V.1. About Uncirculated. This is one of the rarer dates of the type and high grade examples such as this coin bring a significant premium when available. This coin has a sound planchet of good metal. There is no porosity whatsoever. The strike is excellent with virtually full detail throughout. Small areas of the denticles are weakly struck as seen on most examples. However, the face, hair, bust, letters, and stars are very strong and sharp. Ample frosty lustre covers both sides and the surfaces are silvery with faint russet toning at the peripheries. This coin beautifully presents this classic early American design of the sensual Draped Bust Lady Liberty and the bold Heraldic Eagle. NGC AU50.

543 **1831** V.5. Choice About Uncirculated. Delightful coppery-gold toning coalesces at the peripheries.

566 **1857 Brilliant Proof.** Lightly cleaned, otherwise it appears Choice. Hairlines are minimal. It is a much rarer date as a Proof than those struck commencing in 1858 and sold to the public. *Generally, no more than a few dozen Proofs are believed to have been struck.*

567 **1857 Very Choice Brilliant Uncirculated,** close to Gem with marvelously full strike and lavender-pink toning.

CHOICE 1916'D' DIME

Lot No. 587
(Enlarged)

587 **1916'D' Choice Brilliant Uncirculated.** Full Split Bands. A lovely example of this key issue, one that is very near to Gem status. Full mint lustre can be seen on both sides. The lustre cartwheels are unbroken on both sides. The strike is sharp in the centers and the bands on the fasces are split and separate. Bright and lustrous, with just a trace of palest russet toning. This is a very rare coin in this condition, with the lowest mintage of the series. ***(SEE COLOR PLATE)***

588 **1916'S' Very Choice Brilliant Uncirculated**. Full Split Bands. 591 **1920'S' Choice Brilliant Uncirculated**, or better. Full Split Bands. Attractive mint frost has a uniform golden glow. A single tic on Liberty's cheek prohibits a higher classification.

EXCEPTIONAL 1921 MERCURY DIME

Lot No. 592

592 **1921 Choice Brilliant Uncirculated**, and nearly a Gem. Full Split Bands. Superb original mint lustre has a pale golden iridescent glow. Contact marks are confined to a few trivial tics on Liberty's cheek requiring strong magnification to see. This example was struck using a well worn obverse die, resulting in unevenly textured metal flow, and additionally, it shows some interesting clash marks on both sides. Still, it has wonderful eye appeal and would be an impressive addition to any mint state set of Mercury Dimes.

GEM 1921'D' DIME

Lot No. 593

593 **1921'D' Gem Brilliant Uncirculated.** Full Bands distinguish this glowing Denver rarity, highlighted by a blush of metallic gold in the fields. NGC MS65FB.

594 **1923'S' Brilliant Uncirculated.** Full Split Bands. Lightly cleaned and hairlined, with traces of old toning. There is a tiny reverse planchet imperfection at 12:00, possibly as struck, a result of debris on the die.

601 **1942/1 Brilliant Uncirculated.** Bands are sharp and nearly fully split. Virtually Choice, it retains flashy original mint lustre. Rare thus, as most have a rather lackluster appearance, even at the higher Mint State levels. It is an excellent representative of this famous and desirable overdate.

602 **1945 Gem Brilliant Uncirculated.** Powerful silver flash, an unusually sharp wartime strike with about 85% split bands.

U. S. TWENTY CENT PIECES

Lot No. 603

603 **1875'S' Choice Brilliant Uncirculated.** Very close to full Gem status. Both sides of this example are bright and fully lustrous. The surfaces are satiny with complete mint frost. (Enlarged) *Lot No. 607* *(Enlarged)*

607 **1818** Browning 2. **Choice Brilliant Uncirculated.** Naturally frosty and nearly pure white, showing an attractive touch of gold a portions of the periphery. It is quite well struck overall, with no detracting marks. Heavy die clashing is evident on both sides, contributing to the character of this classic early Quarter. The die variety is recognized by the die break commencing at the seventh star, arching over Miss Liberty's head and connecting the top three stars at the right, then to the rim at 2:00.

CHOICE 1818 BROWNING 6 QUARTER

(Enlarged) *Lot No. 608* *(Enlarged)*

608 **1818** B.6. **Very Choice Brilliant Uncirculated.** A very high grade example of this variety, lodged securely in the **Condition Census.** Deeply toned, in iridescent gold, gray, and pale blue shades. PROOFLIKE 1828 QUARTER

Lot No. 611
(Enlarged)

611 **1828** B.1. **Prooflike Very Choice Brilliant Uncirculated.** A remarkable coin, one that was obviously carefully saved from the time it was struck. The surfaces on both sides are bright, flashy, and fully mirror like. The central devices are sharply struck. The coin is complemented by an attractive toning scheme of pale blue, gold, and medium gray, with a light wash of rose overall. This important coin may be hallmarked by a cluster of small ties near the point of Liberty's bust. ***(SEE COLOR PLATE)***

612 **1834** B.1. **Brilliant Uncirculated**, and virtually Choice. Well struck and nicely toned. Fields are somewhat reflective on this early impression, struck from perfect dies. This distinctive variety utilized the second reverse die of 1833, characterized by no period after 25 C.

613 **1835** B.7. **Brilliant Uncirculated.** Attractively toned. The obverse lustre is a bit subdued, while the reverse is bright and frosty, enhanced with bold sunset peripheral toning. These dies were first used to strike Proofs, then utilized for business strikes. It is the only variety of this date without a period after 25 C, and is remarkably elusive in Mint State. The offered coin may well be Condition Census caliber.

614 **1836** B.3. **Brilliant Uncirculated.** Nearly Choice in grade, this specimen in brightly lustrous and frosty. Struck from the late obverse state, the die broken in a series of spidery cracks.

615 **1837** B.2. Extremely Fine. Appealing lavender and glowing rose complement a bold strike.

622 **1859 Choice Brilliant Proof.** A lovely, deeply toned and fully mirror like specimen. Breen 4018, the very rare Type I obverse and reverse hubs. Most of the 800 Proofs struck in 1859 were from the more usually seen Type II hubs.

623 **1860'O' Brilliant Uncirculated,** or thereabouts. Smooth surfaces, toned in nice light hues of rose and sky blue. This issue represents the final year of Quarter coinage in the pre-Civil War South, and is quite rare this nice.

SUPERB 1861 QUARTER

Lot No. 624

624 **1861 Gem Brilliant Uncirculated.** From Bowers and Merena's sale of March 25, 1985, lot 2236, where it was catalogued further as "MS-67. Prooflike. Well struck, except for the stars at the right obverse which are a bit flat at the centers. The surfaces are lustrous and satin smooth. Frosted devices contrast with mildly reflective fields. A hint of golden toning surrounds the peripheries. An extremely thin line is present on the reverse extending from below the final S of STATES to the eagle's left wing. Civil War era coinage is extremely scarce in this superlative state of preservation."

625 **1861** Very Fine to Extremely Fine; **1872** Choice Very Fine; **1877** Very Fine to Extremely Fine; **1878'CC'** Very Fine. Differing values of red and gold, problem-free examples. **4** pieces.

CHOICE 1865'S' QUARTER

Lot No. 626

626 **1865'S' Choice Brilliant Uncirculated,** very nearly a Gem. Nicely toned, in light silver gray and palest gold. An extremely high grade for this San Francisco Mint issue and certainly one of the finest known. Breen notes of this issue "prohibitively rare UNC."

Lot No. 633

633 **1877'S'** Normal 'S.' **Choice Brilliant Uncirculated.** Wholly prooflike fields glitter with a gentle tawny gold for exceptional beauty.

634 **1882 Very Choice Brilliant Proof.** It is nearly pure white, possessing a faint golden glimmer at the peripheries. Devices are frosted, with deep mirror-like fields showing an absolute minimum of hairlines. There is a tiny area of planchet roughness in the right obverse field, as struck, and an unusual minute reverse planchet lamination at 9:00 on the reverse rim. Trivial defects to be sure, and not a deterrent to the desirability of this offering.

635 **1882 Choice Brilliant Proof**, with claims to Gem. Another. Beautifully toned in light shades of russet and ice blue, accenting deeply reflective fields and sharp frosted devices. It is an eye catching example of this desirable low-mintage 1880's date.

Lot No. 674

Some traces of old encrustation, STA re-engraved on the reverse.

Lot No. 675

675 **1795** O.125 (R-5). **Brilliant Uncirculated** or virtually so. Curl pierces first star, reverse shows berries arranged 9 and 8. Only a hint of weakness is evident on the eagle's breast, the coin shows overall lustre of unusually high quality with hints of light russet-gold. 676 **1795** O.127a. Very Good. A very scarce variety made more interesting by its very late die states. Pale gold and medium gray toning. Obverse and reverse die cracks as described for this sub-variety but those on the obverse appear heavier suggesting the coin is in even later states than described there.

HIGH GRADE 1801 HALF DOLLAR

Lot No. 678

678 **1801** O.101. About Uncirculated as to wear, silver plated long ago to enhance its appearance. In terms of wear, this is undoubtedly one of the finest known, as it exceeds even the Norweb sale specimen for sharpness. Lot No. 679

679 **1803** O.104. Extremely Fine. The obverse is a lovely combination of pale silver and light gold, with traces of iridescent lustre still remaining. The reverse has been recolored and shows tooling.

SPECTACULAR 1807 DRAPED BUST HALF DOLLAR

Lot No. 682

682 **1807** O.109a. **Brilliant Uncirculated.** Marvelous high rims enclose boldly lustrous fields showing how this coinage looked as the coins fell from the dies. A glass reveals a small planchet lamination at the chin, which someone lightly smoothed, in a vain attempt to remove the flaw. Flashing silver creates maximum quality.

U. S. CAPPED BUST HALF DOLLARS

683 **1807** O.114. Very Fine. Nice gray toning with areas of gold and blue showing; **1838** Very Fine. Spectacularly toned in rainbow shades. An interesting coin which has almost no reeding showing on the edge and a weight about 0.3 grams below normal. **2** pieces.

684 **1819** O.114. Choice Very Fine; **1827** O.114. Fine; **1831** O.119. About Uncirculated. First two display deep toning, last is pale rose. **3** pieces.

685 **1822** O.113. **Brilliant Uncirculated** or virtually so. This coin shows a patch of razor-thin die lines near bust point not noted in the Overton-Parsley revision.

PROOFLIKE 1823 HALF DOLLAR

Lot No. 686

686 **1823** O.112. **Choice Brilliant Uncirculated,** prooflike and suggestive of a specially made specimen. Both the obverse and reverse surfaces are fully mirror-like and brilliant. Prooflike "flash" extends into the reverse shield lines, as well. The central devices are very faintly frosty and were sharply struck. The denticles on both sides are all there and well struck up. Enhancing the coin's desireablilty even more is the attractive, pale gold toning that can be seen on both sides. While only one true proof 1823 Half is known (the 1864 Levick-1890 Cleneay-Newcomer O.111 coin), this specimen is about as close as one can otherwise get to the real thing.

Lot No. 687

687 **1826** O.104. **Choice Brilliant Uncirculated** with claims to Gem. Needle-tip 2, forelock free at top. Pleasing tawny red-gold overlies rich reflective fields.

PROOFLIKE 1826 HALF DOLLAR

Lot No. 688

688 **1826** O.125. **Choice Brilliant Uncirculated,** prooflike and a superbly struck specimen. Both sides are bright and fully mirror like, with prooflike "flash" even in the protected areas of the reverse shield. Liberty's bust and the eagle on the back are both lightly frosty. The coin's appearance is further enhanced by light gray and very pale rose toning. Our consignor writes, jokingly, that he bought it at the Mint in 1826 as a proof and the coin's quality almost bears him out! A hidden reverse hairline is the only defect that requires mention here.

689 **1827** O.115. **Brilliant Uncirculated.** Square Base 2. Light silver gray toning is uniform on both sides. Mint lustre can be seen around the stars on the obverse.

690 **1830** O.113. Choice About Uncirculated. Bold strike is enhanced by clear rose and gold.

Lot No. 691

691 **1831** O.101. **Brilliant Uncirculated.** A highly lustrous specimen, with cartwheels on both sides that look golden against the gray fields. Well struck and pleasing.

692 **1833** O.102. **Brilliant Uncirculated.** Soft light gray lustre, with a bit of sunset toning around the devices. Smooth surfaces possess only a few light obverse hairlines, otherwise this pretty coin would be Choice.

693 **1835** O.106. Choice Very Fine/Extremely Fine; **1836** Lettered Edge. O.118 (R-4). Very Fine/ Extremely Fine; **1838** Reeded Edge. Very Fine. All show problem-free wear, last was cleaned long ago. **3** pieces.

Lot No. 694

694 **1837** Reeded Edge, 50 CENTS. **Choice Brilliant Uncirculated.** Here is an exceptionally appealing example of this short-lived Type, seldom found in Mint State. Wonderfully smooth reflective fields gleam under clear deep rose-gold of the rarest beauty.

695 **1837** Another. **Brilliant Uncirculated**, and nearly Choice. Nice light gray toning emits a colorful sky blue and golden glow upon reflection in the light. The centers are sharply struck, with characteristic weakness at the rims. Interesting die breaks connect the peripheral stars and lettering. Important as the short-lived type with the "50 CENTS" reverse.

U. S. LIBERTY SEATED HALF DOLLARS

696 **1840** Small Letters. **Brilliant Uncirculated.** This handsome coin boasts colorful red-gold over steel gray and is only a contact tic or two from fully Choice. PCGS MS62.

697 **1840** Small Letters. Choice Extremely Fine. Light lavender is highlighted in gold; **1854'O'** Arrows. About Uncirculated. Light red-gold, bold New Orleans mintmark distinguish this piece. **2** pieces.

Lot No. 698

698 **1844'O'** Normal Date. **Choice Brilliant Uncirculated.** Nicely toned in pale gold, this coin has distinct claims to Gem status. A very tough date to find in this grade.

699 **1845 Brilliant Uncirculated.** Flashing silver, a glass reveals a few contact tics, hairlines.

700 **1853** Arrows & Rays. **Brilliant Uncirculated**, or nearly so. Pleasing natural color. Showing only a few light hairlines. It is an important one-year only type coin with this reverse.

703 **1855'O'** Arrows. Choice About Uncirculated. Attractive light golden, violet, and sky blue toning.

704 **1858 Brilliant Uncirculated.** Silver-white with partial prooflike flash and a subtle hint of gold.

A PAIR OF VERY SCARCE MINT STATE 1860'S' HALF DOLLARS

Lot No. 705

705 **1860'S' Choice Brilliant Uncirculated.** Bright, lustrous and untoned with satiny surfaces. A well struck example of a tough coin to find in this grade.

706 **1860'S' Brilliant Uncirculated** with nearness to Choice. Subtle tawny gold covers smoothest fields, large, bold 'S' asserts quality of strike.

Lot No. 707

707 **1862'S' Choice Brilliant Uncirculated.** Well struck. Frosty, showing only scattered light obverse contact marks. It is an important type coin without the motto IN GOD WE TRUST.

708 **1865** About Uncirculated. *Repunched date.* Pure white as a result of cleaning. The 1 & 5 are sharply doubled, with the center digits showing only a hint of repunching. Recognized as Breen-4924, and noted as scarce.

709 **1867 Choice Brilliant Proof.** Flashy mint brilliance. Quite impressive visual appeal.

Lot No. 710

710 **1868 Very Choice Brilliant Uncirculated.** With it's sharp strike, smooth mark-free surfaces, and attractive multicolored iridescent toning this coin has to be *one of the finest examples of this date extant*. Gem examples are nearly non-existant and this coin has strong claims to that grade. Here is a real opportunity for the Seated Half Dollar specialist. PCGS MS64.

Lot No. 711

711 **1873** Closed 3. No Arrows. **Very Choice Brilliant Proof.** A wonderfully pleasing example of this transition year Half Dollar. Needle-sharp detail is highlighted by light russet toning. The coin is virtually a full Gem with almost no hairlines.

712 **1874** Arrows. **Choice Brilliant Uncirculated.** A blush of red-gold covers smooth surfaces.

713 **1874** Arrows. Another. **Brilliant Uncirculated.** Lustrous, with a few light hairlines.

714 **1874** Arrows. A third. About Uncirculated. Faint lustre, deep toning around the reliefs identify this example.

715 **1874** Arrows. Choice Extremely Fine; **1875 Brilliant Uncirculated.** First coin cleaned, second harshly burnished. **2** pieces.

1874'S' HALF DOLLAR WITH LONG ARROWS

Lot No. 716

716 **1874'S' Very Choice Brilliant Uncirculated,** with prooflike surfaces. Long arrows on the obverse, tall mintmark. Breen 4983, called there "Very rare." Both sides of this example are deeply toned in gold and gray. The obverse and reverse fields are brightly mirror like and reflective.

717 **1875'S' Very Choice Brilliant Uncirculated.** Bright frosty lustre and complete cartwheels characterize this piece.

718 **1877 Brilliant Proof.** Lustrous, somewhat hazy surfaces. Lightly toned around the rims.

LOVELY MINT STATE 1882 HALF DOLLAR

Lot No. 719

719 **1882 Very Choice Brilliant Uncirculated.** Attractively toned in shades of electric blue at the rims, blending to violet and sunset at the centers. Fields are somewhat reflective, showing only a few scattered obverse tics, otherwise this impressive coin would be Gem. Well known among the low mintage dates of the 1880's, *a scant 4,400 business strikes were coined.*

Lot No. 720

720 **1885 Very Choice Brilliant Proof.** Nearly deserving of a full Gem designation with clearly outstanding eye appeal. The fully frosted white devices contrast favorably against the deeply mirrored surfaces. *Only 930 examples were coined.*

721 **1891 Brilliant Proof.** A pinkish lavender toned obverse conceals moderate hairlines, while the reverse has rim toning opening to a fully lustrous center. Desirable as the final year of the classic Liberty Seated Half Dollar design, *just 600 Proofs were struck.*

U. S. BARBER HALF DOLLARS

722 **1892 Choice Brilliant Uncirculated.** Fully struck. Deep mint frost retains much original lustre, complemented by a trace of lavender iridescence. The reverse is wholly gem caliber, while the obverse is nearly so.

723 **1892** Another. **Brilliant Uncirculated.** Frosty silver shows gray-gold at the rims, light bagging.

724 **1892'S' Brilliant Uncirculated.** Lightly cleaned once, and now acquiring a pleasing golden tone over subdued mint frost. The reverse stars nearly all show signs of crude removal and recutting.

725 **1894 Very Choice Brilliant Proof.** Boldly struck with nicely frosted cameo devices enhanced by an attractive multicolored iridescent toning about the peripheries. *Mintage 974 pieces.*

726 **1894** Another. **Very Choice Brilliant Proof.** Glittering mirror fields and frosty devices, hints of white toning around stars.

727 **1894'S' Gem Brilliant Uncirculated,** fully prooflike. A lovely example and a very worthwhile type coin. Both sides are beautifully toned in rainbow hues. The toning is enhanced by the brightly reflective, "flashy" mirror fields.

Lot No. 728

728 **1895'O' Choice Brilliant Uncirculated.** Frosty and well struck. A touch of russet toning circles the obverse periphery. Not an easy issue to locate this nice.

CHOICE 1897'O' HALF DOLLAR

Lot No. 729

729 **1897'O' Choice Brilliant Uncirculated,** prooflike. A wonderfully bright example with prooflike fields and sharp lustre cartwheels. This is a tough issue to locate in any grade with choice examples particularly rare.

730 **1901 Brilliant Proof.** Nearly full mint brilliance. The obverse surface is a bit hazy, with scattered light hairlines, while the reverse is wholly Gem caliber, possessing deep watery fields and heavily frosted devices.

731 **1903 Very Choice Brilliant Proof.** With *only 755 pieces minted* this coin is indeed scarce. There is an appealing old-time pastel iridescent toning on the surfaces giving the coin a **nearly Gem** appearance. A few light hairlines limit the grade but the collector would be hard pressed to find an example as nice. PCGS PF64.

732 **1903 Choice Brilliant Uncirculated.** Bright and fully lustrous, with attractive golden toning. Slight repunching shows on the 3 in the date.

SPLENDID 1907'D' HALF DOLLAR

Lot No. 733

733 **1907'D' Very Choice Brilliant Uncirculated.** Fully frosty surfaces mark this attractive specimen.

734 **1911 Choice Brilliant Proof.** Bold mint brilliance casts a pretty russet glimmer, complementing deeply reflective fields and frosted device. Scattered light hairlines do not detract from the exceptional eye appeal of this borderline gem example.

Lot No. 735

735 **1913 Very Choice Brilliant Proof.** This the first in a trio of **rare** later date Proof Barber Half Dollar. This date has a *mintage of only 627 pieces* and is made further desirable due to the rarity of Mint State examples. The surfaces are very clean and have an even gold and russet toning covering both sides.

736 **1913 Brilliant Proof.** Another. Light gray natural toning. There are a few well concealed light hairlines, but no detracting marks. Nearly Choice.

737 **1915'D' Choice Brilliant Uncirculated.** Pleasing russet-gold, a light strike hallmark this Denver coin.

CLASSIC 1921 HALF DOLLAR

Lot No. 752

752 **1921 Choice Brilliant Uncirculated.** Here is an especially pleasing, virtually immaculate silver-white specimen of this important low mintage Philadelphia date, one of the most sought-after in the Walking Liberty series. A wealth of fine detail can be seen on Liberty's face, hands and robe, adding to the coin's great visual appeal. ***(SEE COLOR PLATE)***

All 1921 Walking Liberty Halves are exceptionally scarce or forthrightly rare. The vicious post-war depression cut back on coin demand and all three Mints reduced their output to a fraction of their normal levels. The prevailing economic dislocation made keeping any number of pieces difficult for the average American, adding to the scarcity of Mint State examples.

SPECTACULAR GEM 1921'D' HALF DOLLAR

Lot No. 753

753 **1921'D' Gem Brilliant Uncirculated.** Glorious silver mint frost combines with a bold strike in this highest quality specimen of the lowest mintage date of A.A. SIGNIFICANT 1921'S' HALF DOLLAR

Lot No. 754

754 **1921'S' Choice Brilliant Uncirculated.** A faint gold permeates the smooth silver lustre on this lovely San Francisco strike, rarest of the entire series though not the lowest mintage. While more San Francisco coins were struck, far fewer strictly Mint State pieces can be found today in comparison with the lower-mintage Philadelphia and Denver issues. ***(SEE COLOR PLATE)***

Brilliant Uncirculated to Very Choice Brilliant Uncirculated.** All coins show bold lustre, strike of many is above average. 768 **1918'D' Brilliant Uncirculated.** Frosty, with a lovely blend of light gray and rose toning. Better struck than many, though not without a bit of typical weakness at Miss Liberty's skirt lines. Pleasing surfaces.

CHOICE 1921'D' HALF DOLLAR

Lot No. 769

769 **1921'D' Choice Brilliant Uncirculated.** An outstanding example of this key issue. Both the obverse and reverse are bright white and untoned. Full mint lustre can be seen and the surfaces are frosty. Typical Denver Mint strike, obverse center and eagle's left leg soft. Lowest mintage of the type. ***(SEE COLOR PLATE)***

770 **1934, 1936 Brilliant Uncirculated,** virtually Choice. The first lustrous with a fingerprint, the latter frosty and displaying russet rims. **2** pieces.

Brightly polished surfaces. **2** pieces.

773 **1934'S' Choice Brilliant Uncirculated,** or very close to it. Unbroken flashy lustre and few marks contribute to the desirability of this appealing coin; **1936'S' Choice Brilliant Uncirculated,** kept from a higher grade by the chatter marks in the skirt over the leg. Stunning lustre. **2** pieces.

774 **1936, 1937, 1938 Choice Brilliant Uncirculated,** with claims to higher grades. Bright silver to champagne rose-gold toning. A very pretty trio. **3** pieces.

775 **1936, 1939'D', 1940 Brilliant Uncirculated,** or slightly better. A few fly specks on the latter coin. Otherwise satiny silver to a hint of clear gold on the Denver coin. 3 pieces.

776 **1937 Gem Brilliant Proof.** Traces of light toning show over deeply reflective fields. Scarce, *only 5,728 were struck.*

777 **1937'D' Brilliant Uncirculated.** Unnaturally bright surfaces reveal only a mark or two. A desirable late issue; **1937'S' Choice Brilliant Uncirculated.** Exquisite, blazing mint lustre. A well-hidden mark from a higher grade. 2 pieces.

778 **1938'D' Choice Brilliant Uncirculated.** Full, unbroken mint lustre reveals only the smallest of insignificant marks. Virtually Gem. The key date in the late series. Always in demand.

U. S. SILVER DOLLARS

U. S. FLOWING HAIR SILVER DOLLARS

HISTORIC 1794 SILVER DOLLAR

Lot No. 801

801 **1794** Bolender 1 (R-5). Very Fine. This remarkable specimen of an estimated *1,758 struck* shows steel and luminous red-gold toning. Typically misaligned dies resulted in an uneven strike with weakness in the left stars and UNITED. Liberty's head, the right stars, word LIBERTY are fully defined, as are the eagle, wreath and STATES OF AMERICA. The obverse shows a blush of fiery orange-gold at 6:00, and close examination reveals evidence of strengthening on left stars and corresponding area of the reverse. Nonetheless this is a very acceptable example of America's rarest early Dollar after the famous 1804 pieces, worthy of close attention by type collector or specialist. ***(SEE COLOR PLATE)***

The Silver bullion from which the nation's first Silver Dollars were struck was deposited by the Bank of Maryland in the form of French Ecus and minor coins of .917 fineness. Acting on his own authority, Mint Director David Rittenhouse disregarded the statutory fineness of 179 parts Silver to 1,664 parts of Copper and refined the French Silver to a uniform .900 fine. Researchers believe that not more than 100 1794 Dollars exist in all grades, with Very Fine the highest grade normally encountered. Any example of this historic coinage will seize the attention of 20th century American collectors, as the date remains always in demand.

OUTSTANDING 1795 B.9 SILVER DOLLAR

Lot No. 802

802 **1795.** B. 9. Choice About Uncirculated, virtually Mint State. An outstanding specimen of this issue and one securely lodged high in the Condition Census. In the recent Bowers roster of high grade examples this coin would place second. Both sides are deeply and evenly toned in a medium shade of silver gray. There are very faint traces of original mint lustre that can be seen around the rims. The roughness in the field behind Liberty's head appears to be typical of the variety in the pre-clash state of the obverse. The reverse planchet surface, which appears to be somewhat striated, shows how difficult it was for the early Mint to prepare its planchets for the denomination. ***(SEE COLOR PLATE)***

U. S. DRAPED BUST SILVER DOLLARS

MAGNIFICENT 1795 SILVER DOLLAR

Lot No. 803

803 **1795** B.15. **Choice Brilliant Uncirculated.** One of the finest Draped Bust Small Eagle Dollars anyone can hope to find. This specimen would rank as tied for second place in the recent Bowers roster of the finest examples of B.15 he knew. Bowers notes that the "average" B.15 grades Very Fine. Both the obverse and reverse of this coin are spectacularly toned in a dramatic combination of iridescent rose and electric blue. The fields on both sides are lightly reflective and shine through the toning. The strike on both sides is sharp, with just the slightest rub on the high points of the eagle's breast feathers. The Draped Bust Small Eagle type is the highlight of any collection of Bust Dollars. Struck from the usually seen State V of the dies. ***(SEE COLOR PLATE)***

APPEALING 1796 SMALL DATE SILVER DOLLAR

Lot No. 804

804 **1796** B.4. Small Date, Large Letters. About Uncirculated. This pleasing coin exhibits very sharp overall detail, a single obverse edge bruise and a few scattered marks including abrasion on the eagle's breast. Cleaned at one time, this well centered coin is now a smooth silver.

HIGH GRADE 1797 B.1 SILVER DOLLAR

Lot No. 805

805 **1797.** B.1. Stars 9x7. Choice About Uncirculated. Another outstanding Bust Dollar. This coin could be included in the recent Bowers roster of the finest he knew. The obverse and reverse are toned in light gold and gray, the reverse being mostly gold. Some light striations can be seen, but these are really unimportant for the quality of the coin. Most B.1's grade only Very Fine. Struck from the earliest state of the dies, with the lump under the 9th star strong and the die file marks under Liberty's chin bold. Some die rust spots can be seen in the right field, as well. ***(SEE COLOR PLATE)***

ATTRACTIVE 1797 B.3 SILVER DOLLAR

Lot No. 806

806 **1797** B.3. Stars 10x6. Very Fine. A good coin for the grade, evenly toned in deep gray with just a couple of light rim tics. Reverse rim tooled above RIC.

POSSIBLE FINEST 1798 B.17 SILVER DOLLAR

Lot No. 807

807 **1798** B.17. Choice About Uncirculated. Far finer than any listed recently by Bowers, whose Condition Census listing only goes up to Extremely Fine-45. This example may well be the finest known of the B.17 variety of the year. Both the obverse and reverse are an even, medium steel gray and blue in color. A short and largely hidden lamination at Liberty's neck will hallmark this specimen. Struck from the very late states of the dies, the obverse bulging behind Liberty's head and the left rim breaking up, giving the coins struck by these dies a distinctive oval shape. ***(SEE COLOR PLATE)***

1798 B.24a SILVER DOLLAR

Lot No. 808

808 **1798** B.24a. Extremely Fine. Pale gray as a result of cleaning long ago, with some old toning clinging to protected areas of Miss Liberty and the obverse stars. A few mint origin adjustment marks cross her neck and bust. This variety offers interesting die breaks on both sides.

ONE OF THE FINEST 1799 B.4 SILVER DOLLARS

Lot No. 809

809 **1799** B.4. Choice About Uncirculated. Another outstanding Bust Dollar from an old time collection. This example would rank as the second finest known in the 1993 Bowers Condition census listing. Both sides are nicely toned in gray with light gold overtones. Some adjustment marks cross the reverse shield. The obverse strike is sharp save for the curls over Liberty's ear, which show here as soft areas. Overall, the coin is highly attractive, free from most problems, and would nicely fit into an exceptional collection of Bust Dollars. Struck from State II of the dies, the obverse breaking around the periphery. ***(SEE COLOR PLATE)***

HANDSOME 1799 B.5 SILVER DOLLAR

Lot No. 810

810 **1799** B.5 (R-5). Choice About Uncirculated, virtually full Mint State. Date is spaced 17 9 9, reverse shows defective left top on U, die crack through OF. Iridescent silver-gray shows overtones of pink. ***(SEE COLOR PLATE)***

HIGH GRADE 1799 B.14 SILVER DOLLAR

Lot No. 811

811 **1799** B.14. Choice About Uncirculated. A very high grade example of this variety, nicknamed the "Tears" variety from the die flaws in the field before Liberty's eye. This specimen is nicely toned in an even, light silver gray shade with hints of iridescent blue in places. Two short areas of planchet roughness are noted on the obverse. In terms of the technical grade, this coin would be included in Bowers 1993 census of the finest specimen he knew at the time.

ONE OF THE FINEST 1799 B.23 SILVER DOLLARS

Lot No. 812

812 **1799.** B.23. Stars 8x5. **Brilliant Uncirculated.** One of the finest known of this unique variety. No other 1799 Dollar has its obverse stars arranged with 8 behind and five in front of Liberty's head. This example is nicely toned in light silver with hints of iridescent blue and rose on the obverse, while the reverse is an even light gray in color. The centers are well struck up, with nearly complete detail showing in Liberty's hair on the front and some breast feathers visible on the eagle on the back. Over the years several examples have been catalogued as "Uncirculated," but few of them could equal the quality of this one. ***(SEE COLOR PLATE)***

DESIRABLE 1803 SILVER DOLLAR

Lot No. 813

813 **1803** B.3. Extremely Fine. Light circulation, bold detail and harmonious steel and gold toning make this coin a standout. ANACS Cache EF40.

U. S. LIBERTY SEATED DOLLARS

GEM MINT STATE 1841 SILVER DOLLAR

Lot No. 814

814 **1841 Gem Brilliant Uncirculated.** A lovely specimen which has prooflike fields. Both sides are toned in the rich silver gray and rose that carefully preserved original Seated Dollars have. While not struck from the Proof dies, this is nevertheless a very pleasing example of the date. Both sides are fully struck up, and there is bright prooflike "flash" visible in the protected areas of each. ***(SEE COLOR PLATE)***

815 **1842 Choice Brilliant Uncirculated.** Some prooflike gleam surrounds the sharply defined reliefs, fields are a light mark or two from higher grade.

Lot No. 816

816 **1843** Choice About Uncirculated. An appealing coin with prooflike flash, some hairline scratches hidden in the stars.

817 **1843** Extremely Fine. Golden toning on both sides. Light abrasion on the reverse rim; **1853** Very Fine. Holed and plugged. **2** pieces.

818 **1846** Choice About Uncirculated. Dignified clear steel toning deepens toward ebony on this boldly struck example. PCGS AU55.

GEM PROOFLIKE 1847 DOLLAR

Lot No. 819

819 **1847 Gem Brilliant Uncirculated. Fully prooflike** and with the satiny gray and rose toning and surface quality that one usually associates with the best Proof coins. The rims are squared off like a Proof's would be, and the fields have the watery appearance expected of Proofs, too. The fields "flash" like a Proof's do, as well. Although not struck from the dies used to make Proofs this year, this is a very attractive example of the date and about as close to being a Proof as one could wish for. ***(SEE COLOR PLATE)***

Lot No. 820

820 **1849 Brilliant Uncirculated.** Another prooflike Seated Dollar. This example is lightly toned in pale silver gray on both sides with light blue and gold around the rims. Somewhat softly struck on Liberty's hair.

821 **1863 Choice Brilliant Proof.** *One of 460 struck,* glittering mirror lies under ebony and iridescent blue.

822 **1868 Brilliant Proof.** Faint gold and a band of deep russet cover smooth silver.

823 **1870 Brilliant Proof.** Silver surfaces show some pale gold, faint hairlines in the fields.

HIGH GRADE 1871 SILVER DOLLAR

Lot No. 824

824 **1871 Choice Brilliant Uncirculated,** or nearly so. Slightly reflective fields highlight frosted devices. Russet toning clings to the devices. The reverse is well struck, while the obverse features of Miss Liberty lack strong definition, as is normally encountered on this date. Minimal contact marks.

825 **1871** Extremely Fine. Much lustre, fields show a scattering of tiny contact marks.

826 **1871** About Fine. Uniform wear, a dark toning spot can be seen at first two stars; **1873** Fine or better overall, some light gold toning at the peripheries. **2** pieces.

COLORFUL 1872 SILVER DOLLAR

Lot No. 827

827 **1872 Choice Brilliant Uncirculated.** Toned in a colorful array, ranging from bright sunset to varying shades violet and blue, and providing a lively sparkle to the natural beauty of this classic design. Minimal contact marks place this example far, far above the quality normally encountered on these large, heavy silver coins. Here is a great example for inclusion in a Mint State type set.

U. S. TRADE DOLLARS

828 **1874 Brilliant Uncirculated.** A touch of sunset toning glistens over somewhat muted mint frost. Surfaces are satin-like, and show minimal marks or hairlines, rendering this example nearly Choice.

829 **1875 Brilliant Proof.** Stark silver showing some swirling hairlines in the bright mirror fields.

Lot No. 830

830 **1875'S' Very Choice Brilliant Uncirculated**, or nearly so. Well struck with pleasing frosty and lustrous surfaces. The coin has a few light bagmarks consistent with the grade, but all in all this is a lovely example of the type.

831 **1876 Brilliant Uncirculated,** on the cusp of Choice. Smooth surfaces glow with underlying silver and gray-gold highlights.

832 **1876'S' Brilliant Uncirculated.** Large mintmark. Some prooflike surface can be seen. Light silver and gold toning characterize this specimen.

833 **1877'S'** Choice About Uncirculated. Lustre in protected areas, some gold toning highlight this coin.

834 **1878'S' Brilliant Uncirculated.** Gleaming prooflike fields join unusually sharp devices.

CHOICE PROOF 1880 TRADE DOLLAR

Lot No. 835

835 **1880 Choice Brilliant Proof.** A very high grade specimen that is very close to full Gem status. *Only 1,987 were struck in this Proof only year.* Both sides of this example are fully bright and reflective, with deep mirror fields and proof "flash" in some of the protected areas. The palest gray toning can be seen on both sides. The strike is sharp, with nearly full detail visible in Liberty's hair and the eagle's feathers sharp.

836 **1880** Another. **Brilliant Proof.** This coin was lightly cleaned at one time leaving light fine hairlines across the surfaces. The color of the coin is a whitish-silver and the surfaces are completely devoid of any toning.

EYE APPEALING PROOF-ONLY 1883 TRADE DOLLAR

Lot No. 837

837 **1883 Choice Brilliant Proof.** Toned in a pretty blend of lavender, gold, violet, and bright blue. Fields retain a pleasing mirror-like depth and devices provide a slight frosty contrast. Hairlines are well concealed, giving this coin at first glance the appearance of a higher grade. *Total mintage for this date was just 979, all Proofs.*

Close study reveals a scattering of typical bagmarks. This coin has long been recognized as one of the major keys to the Morgan series. 1893'S' began as a low-mintage year, and its rarity was vastly increased by the several meltings of unissued Silver Dollars held by the Treasury. Apparently the larger part of this issue perished in these meltings and this Branch Mint date is now in the greatest demand among all interested in this perennially popular series. Accompanied by ANACS authenticity certificate. ***(SEE COLOR PLATE)***

Close examination with a glass reveals a few hairlines typical of so many 19th century Proofs. Although 12,000 business strikes are reported, none are known today. All 1895's existing today are Proofs, *and only 880 were struck.* This exciting coin is certain to become the highlight of some carefully assembled collection of Morgan Dollars. ***(SEE COLOR PLATE)***

A MINI-HOARD OF 1886'S' MORGAN DOLLARS

The following lots offer a rare opportunity to acquire unusually high grade examples of this scarce San Francisco date. 994 **1888'O', 1889, 1889'S' Choice Brilliant Uncirculated.** All three coins display silver lustre. The 1889'S' especially bright, a pinscratch before the face, but with considerably fewer bagmarks than unusual for this San Francisco Mint Silver Dollar. **3** pieces.

The 1891 evidences the usual weakness on the breast feathers; **1892 Brilliant Uncirculated,** or slightly better. A lustrous example displaying numerous light marks. **3** pieces.

1001 **1890'O' Choice Brilliant Uncirculated**, or better. Soft mint lustre. This coin has minimal contact marks, and if the strike were a bit sharper it would be a Gem.

1002 **1890'S', 1891'S' Choice Brilliant Uncirculated.** Blazing mint lustre; **1896 Very Choice Brilliant Uncirculated.** Prooflike with gleaming mirrored fields and a strong strike. **3** pieces.

LOVELY OFFERING OF U. S. PEACE SILVER DOLLARS

This lovely set is pedigreed to the consignor of the earlier set of Morgan Silver Dollars. The quality of this set is tremendous. The astute collector should pay particular attention the rare dates as their quality is remarkable and would be the centerpiece of any high grade set.

1067 **1921 Brilliant Uncirculated.** Lustrous and attractive. Typically struck, and showing light hairlines.

1068 **1922 Very Choice Brilliant Uncirculated; 1922'D' Brilliant Uncirculated; 1922'S' Very Choice Brilliant Uncirculated.** All have gorgeous matching mint lustre. **3** pieces.

1069 **1923, 1923'D'**, and **1923'S'.** Each grades **Choice Brilliant Uncirculated.** All have full original mint lustre. **3** pieces.

1070 **1924 Brilliant Uncirculated** and nearly Choice; **1925 Very Choice Brilliant Uncirculated.** The latter has delicate golden toning, characteristic of an exceptional group of this date distributed in the 1970's. They are seldom encountered today. **2** pieces.

1071 **1924'S' Very Choice Brilliant Uncirculated.** Well struck. Deep lustrous mint frost. Excellent eye appeal, and not an easily acquired issue this nice. Close to Gem quality.

SUPERB 1925'S' SILVER DOLLAR

Lot No. 1072

1072 **1925'S' Very Choice Brilliant Uncirculated.** Full mint lustre. Better struck than most, though high point eagle feather details are a bit soft.

1073 **1926, 1926'D' Choice Brilliant Uncirculated.** They have bold mint lustre, with nearly identical pale champagne golden iridescence. **2** pieces.

Lot No. 1074

1074 **1926'S' Very Choice Brilliant Uncirculated.** Flashy original mint lustre. Surfaces are smooth and satiny, with minimal contact marks.

NEAR GEM 1927 SILVER DOLLAR

Lot No. 1075

1075 **1927 Very Choice Brilliant Uncirculated**, and nearly in the Gem category. Blazing mint lustre and a sharp strike highlight this impressive coin. It is a low mintage date that is particularly underrated in this high grade.

1076 **1927'D' Very Choice Brilliant Uncirculated.** Soft natural mint frost, with a hint of rose-lavender iridescence.

EXCEPTIONAL 1927'S' SILVER DOLLAR

Lot No. 1077

1077 **1927'S' Very Choice Brilliant Uncirculated.** Bold, nearly pure white natural mint lustre and a strong strike highlight this coin. Here is another exceptionally flashy example, and seldom obtainable as such.

Lot No. 1078

1078 **1928 Choice Brilliant Uncirculated**, or better. Satin-like, with a pretty sunset glimmer over surfaces possessing minimal contact marks. There are a few trivial obverse "slide marks" on Miss Liberty's cheek which keep this coin from being a solid Gem. This date is popular as the lowest mintage of the series.

MAGNIFICENT 1928'S' PEACE DOLLAR

Lot No. 1079

1079 **1928'S' Gem Brilliant Uncirculated.** Small mintmark. Sharply struck, with every strand of Liberty's hair and all of the eagle's feathers bold. Surfaces are nearly without contact marks, complementing solid satin-like mint frost and enhancing the beauty of this important 20th Century condition rarity. ***(SEE COLOR PLATE)***

Several original bags were in the Redfield Hoard, dispersed to the numismatic public in the 1970's. However, they were noted for being marred and scuffed, resulting in a new appreciation for Gem quality examples as demand for Peace Dollars increased. Now, nearly a quarter of a century later, tlhis issue is among the most appreciated of the series in superlative condition, as is the above offered example.

1080 **1934 Very Choice Brilliant Uncirculated.** A borderline gem, with virtually no contact marks and only a few scattered hairlines; **1934'D' Choice Brilliant Uncirculated.** Moderate reverse contact marks. Both examples have beautiful original mint lustre. **2** pieces.

SUPERB 1934'S' PEACE DOLLAR

Lot No. 1081

1081 **1934'S' Gem Brilliant Uncirculated.** Unquestionably among the finest examples of this coveted key Peace Dollar issue. It is sharply struck, with unbroken cold mint frost and virtually no marks. Reflection in the light reveals a faint golden glow, providing spectacular visual appeal. ***(SEE COLOR PLATE)***

Most examples owe their existence to a few bags retained and dispersed as singles and in small quantities at the San Francisco Mint commencing in the late 1930's and extending into the 1950's. Many of those went through non-numismatic channels and saw moderate handling and circulation. It is doubtful that even a single original bag survived after the mid-1950's. The LeVere Redfield Hoard had none. The 1960's and 1970's saw the occasional appearance of a few smaller quantities, perhaps a couple of rolls at a time. Today, rolls are gone, and the appearance of a single outstanding specimen always creates quite a stir, as the importance of this issue is well known and demand is always strong. We are delighted to offer the above example.

1082 **1935 Gem Brilliant Uncirculated.** Exceptional quality. Deep satiny surfaces possess a warm sunset glow. It is a virtually unimproveable example, worthy of the finest collection.

1083 **1935'S' Very Choice Brilliant Uncirculated**. Well struck. Lovely satiny surfaces. There are a few trivial reverse contact marks, well concealed in the eagle's feathers, otherwise is coin would be a Gem.

ADDITIONAL U. S. PEACE SILVER DOLLARS

1084 **1921 Brilliant Uncirculated,** Choice were it not for the hairlines. Sharply struck and bursting with clear champagne-gold lustre. Always in demand.

1085 **1922, 1922'D, 1922'S' Choice Brilliant Uncirculated.** The Philadelphia Mint coin is Gem, or nearly so, and exhibits pleasing pale golden toning. 3 pieces.

1086 **1922'D', 1923, 1923'D' Choice Brilliant Uncirculated,** or so. Pale gold to bright silver lustre. 3 pieces.

1087 **1923, 1923'D', 1923'S' Choice Brilliant Uncirculated.** Pale gold to bright silver lustre. A pretty trio. 3 pieces.

1088 **1923'S', 1924, 1925 Choice Brilliant Uncirculated,** the latter coin with claims to a higher grade. Considerable mint lustre and very few marks. 3 pieces.

1089 **1924'S' Brilliant Uncirculated,** or somewhat better. Lustrous surfaces possess a golden hue. Mint State examples are in demand.

1090 **1925 Gem Brilliant Uncirculated.** Fully lustrous and hosed in an AccuGrade MS 67 holder.

1091 **1925** Another. **Very Choice Brilliant Uncirculated.** One mark on the neck from full Gem status. Bold mint lustre.

1092 **1925, 1925'S', 1926 Brilliant Uncirculated,** with claims to a higher grade. The 1925 hosts golden-rainbow iridescent obverse toning, the others satiny silver. 3 pieces.

Lot No. 1093

1093 **1925'S' Choice Brilliant Uncirculated.** Rich mint frost. Somewhat softly struck at the centers, otherwise it is a virtual Gem.

1094 **1926'D', 1926'S' Brilliant Uncirculated,** just a few light marks from the Choice category. The 1926'D' reveals an especially sharp strike. Both show off lustrous surfaces. 2 pieces.

1095 **1926'D', 1926'S'** Another pair. **Choice Brilliant Uncirculated,** or nearly so. Blazing mint lustre graces both coins. A few chatter marks on the cheek of the first Denver Mint coin. 2 pieces.

1096 **1926'S', 1927 Choice Brilliant Uncirculated,** or virtually so. The first coin manifests radiant silver lustre, the second with more subdued lustre. 2 pieces.

1097 **1927, 1934 Brilliant Uncirculated** to nearly Choice. A lustrous duo. The 1927 reverse and 1934 obverse are especially free from serious marks. 2 pieces.

1098 **1927'D' Brilliant Uncirculated.** Light hairlines visible over satiny mint lustre. Scattered ties on the face; **1927'S' Brilliant Uncirculated.** Extraordinary mint lustre for the issue, exhibiting the typical soft strike. A scrape before the face keeps the coin from a full Choice designation. 2 pieces.

Lot No. 1099

1099 **1928 Choice Brilliant Uncirculated.** Another. Bold strike, subtle champagne-gold toning, and very few marks create a charming example of this popular and important date within the Peace Dollar Series.

1100 **1928'S' Very Choice Brilliant Uncirculated.** Excellent surfaces and lustre, with a touch of rose iridescence.

1101 **1928'S'** Another. **Choice Brilliant Uncirculated,** a near Gem of wonderful satin beauty highlighted in clear gold of great delicacy.

1102 **1928'S'** A third. **Brilliant Uncirculated,** the coin would be a full Gem were it not for a detracting scuff in the field before the neck, on the neck and chin, perhaps as minted. Flashy full mint lustre.

1103 **1928'S'** A fourth. **Brilliant Uncirculated,** approaching the Choice category. The hint of a band of pale champagne-gold across the central obverse. Lustrous.

1104 **1934 Very Choice Brilliant Uncirculated,** and nearly Gem. Satiny mint lustre, and virtually mark-free, save a few very light obverse hairlines.

1105 **1934** Another. **Brilliant Uncirculated.** Subdued lustre, typical of the date, with a hint of lavender toning. It appears Choice at first glance, though there are scattered light hairlines.

1106 **1934'D' Brilliant Uncirculated,** on the cusp of Choice. Light hairlines and only a few light facial tics from a much higher grade. Satiny mint lustre.

1107 **1935 Very Choice Brilliant Uncirculated.** Satin reflectivity, a coin only a tic or so from full Gem. NGC MS64.

1108 **1935, 1935'S' Brilliant Uncirculated** to **Choice Brilliant Uncirculated.** The first coin displays bright lustre, the second with unbroken white mint frost. 2 pieces.
